

# Reliable AWS-Solutions-Architect-Professional Exam Voucher | AWS-Solutions-Architect-Professional Valid Exam Questions

BONUS!!! Download part of ITPassLeader AWS-Solutions-Architect-Professional dumps for free: [https://drive.google.com/open?id=1wPhTWQ1\\_xr8kJVKNXceN0BdjIFnzeYsB](https://drive.google.com/open?id=1wPhTWQ1_xr8kJVKNXceN0BdjIFnzeYsB)

There is no doubt that if you pass the AWS-Solutions-Architect-Professional exam certification test, which means that your ability and professional knowledge are acknowledged by the authority field, we suggest that you can try our AWS-Solutions-Architect-Professional reliable exam dumps. Although it is difficult to prepare the exam for most people, as long as you are attempting our AWS-Solutions-Architect-Professional Exam Dumps, you will find that it is not as hard as you think. What you will never worry about is that the quality of AWS-Solutions-Architect-Professional exam dumps, because once you haven't passed exam, we will have a 100% money back guarantee. You can easily pass the exam only if you spend some spare time studying our AWS-Solutions-Architect-Professional materials.

There are three different versions provided by our company. Every version is very convenient and practical. The three different versions of our AWS-Solutions-Architect-Professional study torrent have different function. We believe that you must find the version that is suitable for you. Now I am willing to show you the special function of the PDF version of AWS-Solutions-Architect-Professional test torrent. If you prefer to read paper materials rather than learning on computers, the PDF version of our AWS Certified Solutions Architect - Professional guide torrent must be the best choice for you. Because the study materials on the PDF version are printable, you can download our AWS-Solutions-Architect-Professional study torrent by the PDF version and print it on papers. We believe that it will be very helpful for you to protect your eyes. In addition, the PDF version also has many other special functions. If you use the PDF version of our AWS-Solutions-Architect-Professional test torrent, you will find more special function about the PDF version.

## Free Demo: 100% Amazon AWS-Solutions-Architect-Professional Exam Questions

The third format is desktop AWS-Solutions-Architect-Professional practice exam software that can be accessed easily after

installing it on your Windows PC or Laptop. These formats are there so that the students can use them as per their unique needs and prepare successfully for AWS-Solutions-Architect-Professional the on first try. The AWS-Solutions-Architect-Professional mock tests are specially built for you to evaluate what you have studied. These AWS Certified Solutions Architect - Professional (AWS-Solutions-Architect-Professional) practice exams (desktop and web-based) are customizable, which means that you can change the time and questions according to your needs. Our AWS-Solutions-Architect-Professional practice tests teach you time management so you can pass the AWS Certified Solutions Architect - Professional (AWS-Solutions-Architect-Professional) certification exam.

## Amazon AWS Certified Solutions Architect - Professional Sample Questions (Q162-Q167):

### NEW QUESTION # 162

A company uses AWS Organizations to manage its AWS accounts. The company needs a list of all its Amazon EC2 instances that have underutilized CPU or memory usage. The company also needs recommendations for how to downsize these underutilized instances.

Which solution will meet these requirements with the LEAST effort?

- A. Install the Amazon CloudWatch agent on all the EC2 instances by using AWS Systems Manager. Create an AWS Lambda function to extract CPU and memory usage from all the EC2 instances. Store the findings as files in Amazon S3. Use Amazon Athena to find underutilized instances. Reference EC2 instance pricing information for recommendations about downsizing options.
- B. Install a CPU and memory monitoring tool from AWS Marketplace on all the EC2 instances. Store the findings in Amazon S3. Implement a Python script to identify underutilized instances. Reference EC2 instance pricing information for recommendations about downsizing options.
- C. Install the Amazon CloudWatch agent on all the EC2 instances by using AWS Systems Manager. Retrieve the resource optimization recommendations from AWS Cost Explorer in the organization's management account. Use the recommendations to downsize underutilized instances in all accounts of the organization.
- D. Install the Amazon CloudWatch agent on all the EC2 instances by using AWS Systems Manager. Retrieve the resource optimization recommendations from AWS Cost Explorer in each account of the organization. Use the recommendations to downsize underutilized instances in all accounts of the organization.

**Answer: C**

### NEW QUESTION # 163

A company is storing data in several Amazon DynamoDB tables. A solutions architect must use a serverless architecture to make the data accessible publicly through a simple API over HTTPS. The solution must scale automatically in response to demand.

Which solutions meet these requirements? (Choose two.)

- A. Create an Amazon API Gateway HTTP API. Configure this API with direct integrations to Dynamo DB by using API Gateway's AWS integration type.
- B. Create an accelerator in AWS Global Accelerator. Configure this accelerator with AWS Lambda@Edge function integrations that return data from the DynamoDB tables.
- C. Create an Amazon API Gateway REST API. Configure this API with direct integrations to DynamoDB by using API Gateway's AWS integration type.
- D. Create a Network Load Balancer. Configure listener rules to forward requests to the appropriate AWS Lambda functions.
- E. Create an Amazon API Gateway HTTP API. Configure this API with integrations to AWS Lambda functions that return data from the DynamoDB tables.

**Answer: C,E**

Explanation:

<https://docs.aws.amazon.com/apigateway/latest/developerguide/api-gateway-overview-developer-experience.htm>

### NEW QUESTION # 164

A company is serving files to its customers through an SFTP server that is accessible over the internet. The SFTP server is running on a single Amazon EC2 instance with an Elastic IP address attached. Customers connect to the SFTP server through its Elastic IP address and use SSH for authentication. The EC2 instance also has an attached security group that allows access from all customer IP addresses.

A solutions architect must implement a solution to improve availability, minimize the complexity of infrastructure management, and

minimize the disruption to customers who access files. The solution must not change the way customers connect. Which solution will meet these requirements?

- A. Disassociate the Elastic IP address from the EC2 instance. Create a multi-attach Amazon Elastic Block Store (Amazon EBS) volume to be used to SFTP file hosting. Create a Network Load Balancer (NLB) with the Elastic IP address attached. Create an Auto Scaling group with EC2 instances that run an SFTP server. Define in the Auto Scaling group that instances that are launched should attach the new multi-attach EBS volume. Configure the Auto Scaling group to automatically add instances behind the NLB. Configure the Auto Scaling group to use the security group that allows customer IP addresses for the EC2 instances that the Auto Scaling group launches. Sync all files from the SFTP server to the new multi-attach EBS volume.
- B. Disassociate the Elastic IP address from the EC2 instance. Create a new Amazon Elastic File System (Amazon EFS) file system to be used for SFTP file hosting. Create an AWS Fargate task definition to run an SFTP server. Specify the EFS file system as a mount in the task definition. Create a Fargate service by using the task definition, and place a Network Load Balancer (NLB) front of the service. When configuring the service, attach the security group with customer IP addresses to the tasks that run the SFTP server. Associate the Elastic IP address with the NLB. Sync all files from the SFTP server to the S3 bucket.
- C. Disassociate the Elastic IP address from the EC2 instance. Create an Amazon S3 bucket to be used for SFTP file hosting. Create an AWS Transfer Family server. Configure the Transfer Family server with a VPC-hosted, internet-facing endpoint. Associate the SFTP Elastic IP address with the new endpoint. Attach the security group with customer IP addresses to the new endpoint. Point the Transfer Family server to the S3 bucket. Sync all files from the SFTP server to the S3 bucket.
- **D. Disassociate the Elastic IP address from the EC2 instance. Create an Amazon S3 bucket to be used for sftp file hosting. Create an AWS Transfer Family server. Configure the Transfer Family server with a publicly accessible endpoint. Associate the SFTP Elastic IP address with the new endpoint. Point the Transfer Family server to the S3 bucket. Sync all files from the SFTP server to the S3 bucket.**

**Answer: D**

#### NEW QUESTION # 165

A company CFO recently analyzed the company's AWS monthly bill and identified an opportunity to reduce the cost for AWS Elastic Beanstalk environments in use. The CFO has asked a Solutions Architect to design a highly available solution that will spin up an Elastic Beanstalk environment in the morning and terminate it at the end of the day.

The solution should be designed with minimal operational overhead and to minimize costs. It should also be able to handle the increased use of Elastic Beanstalk environments among different teams, and must provide a one-stop scheduler solution for all teams to keep the operational costs low.

What design will meet these requirements?

- A. Configure a time-based Auto Scaling group. In the morning, have the Auto Scaling group scale up an Amazon EC2 instance and put the Elastic Beanstalk environment start command in the EC2 instance user data. At the end of the day, scale down the instance number to 0 to terminate the EC2 instance.
- B. Set up a Linux EC2 Micro instance. Configure an IAM role to allow the start and stop of the Elastic Beanstalk environment and attach it to the instance. Create scripts on the instance to start and stop the Elastic Beanstalk environment. Configure cron jobs on the instance to execute the scripts.
- C. Develop an AWS Step Functions state machine with "wait" as its type to control the start and stop time. Use the activity task to start and stop the Elastic Beanstalk environment. Create a role for Step Functions to allow it to start and stop the Elastic Beanstalk environment. Invoke Step Functions daily.
- **D. Develop AWS Lambda functions to start and stop the Elastic Beanstalk environment. Configure a Lambda execution role granting Elastic Beanstalk environment start/stop permissions, and assign the role to the Lambda functions. Configure cron expression Amazon CloudWatch Events rules to trigger the Lambda functions.**

**Answer: D**

Explanation:

#### NEW QUESTION # 166

In DynamoDB, a projection is \_\_\_\_\_.

- A. systematic transformation of the latitudes and longitudes of the locations inside your table
- **B. the set of attributes that is copied from a table into a secondary index**

- C. importing data from your file to a table
- D. exporting data from a table to your file

**Answer: B**

Explanation:

Explanation

In DynamoDB, a projection is the set of attributes that is copied from a table into a secondary index.

## NEW QUESTION # 167

.....

We learned that a majority of the candidates for the exam are office workers or students who are occupied with a lot of things, and do not have plenty of time to prepare for the AWS-Solutions-Architect-Professional exam. Taking this into consideration, we have tried to improve the quality of our AWS-Solutions-Architect-Professional training materials for all our worth. Now, I am proud to tell you that our AWS-Solutions-Architect-Professional Exam Questions are definitely the best choice for those who have been yearning for success but without enough time to put into it. Just buy them and you will pass the exam by your first attempt!

**AWS-Solutions-Architect-Professional Valid Exam Questions:** <https://www.itpassleader.com/Amazon/AWS-Solutions-Architect-Professional-dumps-pass-exam.html>

This AWS-Solutions-Architect-Professional Valid Exam Questions - AWS Certified Solutions Architect - Professional exam serves to filter out the capable from incapable candidates, Our Amazon AWS-Solutions-Architect-Professional practice test software is the most distinguished source for the Amazon AWS-Solutions-Architect-Professional exam all over the world because it facilitates your practice in the practical form of the Amazon AWS-Solutions-Architect-Professional certification exam, AWS-Solutions-Architect-Professional free demo is available for free downloading, and you can do your decision according to the assessment.

To be very successful in selling your app, you have to create an app that a AWS-Solutions-Architect-Professional lot of people really want, Boehm, Software Engineering Economics, This AWS Certified Solutions Architect - Professional exam serves to filter out the capable from incapable candidates.

## High Pass Rate AWS-Solutions-Architect-Professional Study Materials Tool Helps You Get the AWS-Solutions-Architect-Professional Certification

Our Amazon AWS-Solutions-Architect-Professional Practice Test software is the most distinguished source for the Amazon AWS-Solutions-Architect-Professional exam all over the world because it facilitates your practice in the practical form of the Amazon AWS-Solutions-Architect-Professional certification exam.

AWS-Solutions-Architect-Professional free demo is available for free downloading, and you can do your decision according to the assessment, So please have a look of our AWS-Solutions-Architect-Professional exam torrent' traits and keep faithful to our AWS-Solutions-Architect-Professional exam guide.

Our AWS-Solutions-Architect-Professional real dumps was designed by many experts in different area, they have taken the different situation of customers into consideration and designed practical AWS-Solutions-Architect-Professional study materials for helping customers save time.
