最有效的COBIT-2019證照信息，免費下載COBIT-2019考試題庫得到妳想要的ISACA證書

據調查，現在IT行業認證考試中大家最想參加的是ISACA的COBIT-2019考試。確實，這是一個非常重要的考試，這個考試已經被公開認證了。此外，這個考試資格可以證明你擁有了高技能。然而，和考試的重要性一樣，這個考試也是非常難的。要想通過考試是很困難的，但是請不要擔心。因為NewDumps可以幫助你通過困難的COBIT-2019認證考試。

最新的 COBIT Foundation COBIT-2019 免費考試真題 (Q114-Q119):

問題 #114
When assessing organizational structures, it is MOST helpful when subcriteria for each criterion are defined and linked to:

- A. performance metrics.
- B. capability levels.
- C. job descriptions.

答案：B

解題說明：
Explanation
When assessing organizational structures, it is most helpful when subcriteria for each criterion are defined and linked to capability levels. Organizational structures are the arrangements of roles and responsibilities that enable the enterprise to achieve its objectives. Organizational structures can be assessed using six criteria:
clarity, comprehensiveness, integration, alignment, authority, and accountability. Each criterion can be further divided into subcriteria that describe the specific aspects or attributes of the criterion. Capability levels are the measures of how well a process or activity is performed in terms of effectiveness, efficiency, completeness, reliability, etc. Capability levels can range from 0 (incomplete) to 5 (optimizing). Defining and linking subcriteria to capability levels helps to evaluate the current and desired state of organizational structures, as well as to identify gaps and improvement opportunities.123 COBIT 2019 Framework:

問題 #115
When reviewing the risk profile of an enterprise during the governance design phase, what MUST be established prior to conducting a high-level risk analysis?

- A. Enterprise's risk appetite
- B. Risk response strategy
- C. Risk management framework
- D. Key risk indicators (KRIs)

答案：A

解題說明：
Explanation
The risk profile of an enterprise is a design factor that describes how an enterprise identifies, assesses, responds to, monitors, and reports on information and technology risks. The risk profile helps to determine the level of risk appetite and tolerance that an enterprise has for its information and technology activities, as well as the level of control and assurance that is required for its governance framework. When reviewing the risk profile of an enterprise during the governance design phase, one of the prerequisites that must be established prior to conducting a high-level risk analysis is the enterprise's risk appetite. The risk appetite is the amount and type of risk that an enterprise is willing to accept in pursuit of its objectives. The risk appetite provides a basis for defining the risk criteria, thresholds, indicators, and responses that will be used in the risk analysis process. The risk appetite also helps to align the governance framework with the enterprise's strategy and objectives.References: : COBIT 2019 Design Guide, page 41-43 : COBIT 2019 Framework: Introduction and Methodology, page 28-29

問題 #116
When tailoring a governance system for an enterprise, which of the following is MOST important to consider for an operating environment with a high compliance requirement?

- A. Enterprise goals
- B. Threat landscape
- C. Enterprise strategy
- D. Geopolitical situation

答案：B

解題說明：
The threat landscape is a design factor that describes the types and levels of threats that an enterprise faces from internal and external sources that could compromise its information and technology assets. The threat landscape helps to determine the level of security and resilience that an enterprise needs to protect its information and technology assets from unauthorized access, use, disclosure, modification, destruction, or disruption. When tailoring a governance system for an enterprise, one of the most important factors to consider for an operating environment with a high compliance requirement is the threat landscape. The compliance requirement is another design factor that describes the extent and nature of laws, regulations, standards, guidelines, contracts, or agreements that an enterprise must comply with regarding its information and technology activities. The compliance requirement influences the level of control and assurance that an enterprise needs to demonstrate its adherence to the applicable rules and obligations. By considering the threat landscape in relation to the compliance requirement, an enterprise can ensure that its governance system is appropriate for its risk profile and context, and that it can effectively manage the potential impacts of threats on its compliance status34 References: 3: COBIT 2019 Design Guide: page 41-43 4: COBIT 2019 Design Guide: page 47-48

問題 #117
What is the PRIMARY role of business leadership when defining the future state in a business case?

- A. Assess proposed solutions against goals.
- B. Review compliance with legal issues.
- C. Determine capabilities required from IT.
- D. Verify the as-is assessment results.

答案：A

解題說明：
The primary role of business leadership when defining the future state in a business case is to determine the capabilities required from IT. This is accomplished by assessing the proposed solutions against the goals of the organization, reviewing compliance with legal issues, and verifying the as-is assessment results. This is outlined in the COBIT 2019 Framework, which provides guidance on enterprise governance of information and technology (EGIT). This includes determining the IT capabilities needed to meet the organization's objectives and assessing the proposed solutions against those needs [1]. Additionally, the framework provides guidance on how to review compliance with legal issues and verify the as-is assessment results.
According to ISACA COBIT 2019, the primary role of business leadership in defining the future state of a business case is to assess the proposed solutions against the defined goals and ensure alignment with the overall business strategy. This involves evaluating the feasibility and viability of the proposed solutions and ensuring that they support the achievement of the organization's objectives. Business leaders are responsible for ensuring that the solutions proposed are in line with the organization's strategy, mission, and vision, and that they are adequately supported by the necessary resources.

問題 #118
Once IT governance is implemented, what is the NEXT phase in the life cycle of governance?

- A. Measuring objectives
- B. Updating the program
- C. Initiating improvements

答案：A

解題說明：
Explanation
Measuring objectives is the next phase in the life cycle of governance after IT governance is implemented.
The life cycle of governance is a continuous process that involves designing, implementing, evaluating, and improving the IT governance system. Measuring objectives is the phase that involves assessing and monitoring the performance and outcomes of the IT governance system against predefined metrics and targets. Measuring objectives is the next phase after IT governance is implemented because it helps to determine whether the IT governance system is effective, efficient, and aligned with the enterprise goals.13 References: COBIT 2019 Framework: Introduction and Methodology, COBIT 2019 Implementation Guide: Implementing an Information and Technology Governance Solution

問題 #119
......

有了目標就要勇敢的去實現。每一個選擇IT行業的人應該都不會只是安於現狀那樣簡單點的生活，現在各行各業的競爭壓力可想而知，IT行業也不例外，所以你們要是有了目標就要勇敢的去實現，其中通過 ISACA的COBIT-2019考試認證也是一次不小的競爭方式之一，通過了此考試，那麼你的IT生涯將會大展宏圖，會有一幅不一樣的藍圖等著你去勾勒，而我們NewDumps網站可以提供你真實準確的培訓資料，幫助你通過考試獲得認證，從而實現你的藍圖理想。
