Salesforce Certified OmniStudio Developer Sample Questions (Q44-Q49):

NEW QUESTION # 44

An integration Procedure uses an HTTP action to makea REST API call. The response from the REST API must be converted into a specific XML structure before sending it as an input to another external wen service.

How should the developer configure the Integration Procedure to meet this requirement?

- A. Use aRemote Action that calls the XMLStreamReader class
- B. Use a DataRaptor Transform to convert JSON to XML
- C. Use a DataRaptor Extract and check the XML checkbox on the Output JSON Path.
- D. Use a Remote Action that calls the XMLStreamWriter class

Answer: B

Explanation:
According to the OmniStudio Developer Guide, "DataRaptor Transform actions can convert JSON to XML and vice versa."
Therefore, the correct answer is C.

NEW QUESTION # 45

In an Integration Procedure, a developer needs to perform a multi-step calculation on every element of an array.

Based on best practices, what two methods are recommended?
Choose 2 answers

- A. Use a Set Values Element inside a Loop Block.
- B. Use a Calculation Action to call a Calculation Procedure.
- C. Use a Matrix Action to call a Calculation Matrix.
- D. Use a ListAction tomerge the array elements together.

Answer: B,C

Explanation:
Explanation
According to the Integration Procedure Actions page, a Calculation Action can be used to "call a Calculation Procedure that performs calculations on input data" and a Matrix Action can be used to "call a Calculation Matrix that performs calculations on input data".

NEW QUESTION # 46

An integration procedure contains a Remote Action element that calls a method of an APEX class. The method requires two fields are input: Accountid and ProductId.The integration Procedure data JSON contains the following nodes:
How should the Remote Action element be configured to pass the data correctly to the method?

- A. Check the DataRaptor Transform checkbox, and add the following Key/Value pairs to Output JSON Path:

    □
- B. Check the Send Only Additional Input checkbox, and the following/ value pairs to Additionalinput:

    □
- C. Set Return Only Additional Output to true, and add the following Key/Value pairs to additional input.

    □
- D. Add the following to Send JSON Path: accountId: %Accountd% ProductId% Details Products%

Answer: C

NEW QUESTION # 47
□

- A. □
- B. □

Answer: A

Explanation:
Explanation

The correct answer is Option B, which shows a FlexCard with a header, a body, and a footer. The header contains the title and the icon of the FlexCard. The body contains a Data table element that displays the records from the parent FlexCard. The footer contains a navigation Action that invokes an OmniScript. Option A is incorrect because it shows a FlexCard with only a header and a body, and no footer.

NEW QUESTION # 48

While using the Lightning App Builder, you add a Custom Component to the console, but the component you want to add does not appearin the dropdown list.
What could cause this?

- A. The FlexCard does not have an active version.
- B. The FlexCard has a recordid that is for the wrong record type.
- C. The data source for the FlexCard is not active.
- D. The record displayed in the Lightning App Builder preview has no data for the record displayed.

Answer: A

NEW QUESTION # 49
