The pass rate for C_SIGDA_2403 study guide materials is 99%, and if you choose us, we can ensure you that you will pass the exam successfully. You can also enjoy free update for one year if you buy C_SIGDA_2403 study materials from us, and the update version will be sent to your email automatically, therefore in the following year, you can get the free update version without spending money. Besides, our technicians will check the website constantly to ensure you have a good online shopping environment while buying C_SIGDA_2403 Exam Dumps from us.

SAP Certified Associate - Process Data Analyst - SAP Signavio Sample Questions (Q34-Q39):

NEW QUESTION # 34

What is the first step in starting an analysis in SAP Signavio Process Intelligence?

- A. Upload the attribute log
- B. Upload the event log
- C. Create a new investigation
- D. Create a new process

Answer: C

NEW QUESTION # 35

What can be defined within an 'Integration' in ETL Data Pipeline configuration? Note: There are 3 correct answers to this question.

Answer:

Explanation:

B,C,D

NEW QUESTION # 36

Which of the following Widgets need to be linked to a process model to provide insights? Note: There are 3 correct answers to this question.

- A. Process Funnel
- B. Process Discovery
- C. Process Conformance
- D. Diagram
- E. Variant Explorer

Answer: A,C,D

NEW QUESTION # 37

Why does extracted data typically need to be transformed? Note: There are 2 correct answers to this question.

- A. To uniform and standardize the extracted data
- B. To ensure all extracted data is correct
- C. To create a log file that includes all events
- D. To visualize dependencies between cases

Answer: A,B

Explanation:

The transformation of extracted data is a critical step in process mining and analysis, primarily to ensure uniformity and accuracy.

Uniforming and standardizing the extracted data is necessary to facilitate its analysis across different systems and processes, ensuring consistency in metrics and interpretations. Ensuring the correctness of all extracted data is also crucial to maintain the integrity of the analysis, as any inaccuracies can lead to flawed insights and decisions. Visualizing dependencies between cases and creating a log file with all events, while important, do not directly relate to the reasons why extracted data typically needs to be transformed.
