Test Professional-Cloud-Developer Study Guide, Professional-Cloud-Developer Best Study Material

Our products are compiled by experts from various industries and they are based on the true problems of the past years and the development trend of the industry. What's more, according to the development of the time, we will send the updated materials of Professional-Cloud-Developer test prep to the customers soon if we update the products. Under the guidance of our study materials, you can gain unexpected knowledge. Finally, you will pass the exam and get a Professional-Cloud-Developer Certification. Customers can learn according to their actual situation and it is flexible. Next I will introduce the advantages of our Professional-Cloud-Developer test prep so that you can enjoy our products.

Google Professional-Cloud-Developer certification exam is designed for professionals who are interested in validating their knowledge and skills in developing applications on Google Cloud Platform (GCP). Google Certified Professional - Cloud Developer certification exam is ideal for individuals who have experience in software development and are looking to expand their knowledge in cloud computing technologies. It is one of the most prestigious certifications in the cloud computing industry and is highly valued by employers.

Google Professional-Cloud-Developer certification exam is a credential offered by Google Cloud that validates a professional's expertise in designing, developing, and deploying applications on the Google Cloud Platform. Google Certified Professional - Cloud Developer certification is intended for developers who work with Google Cloud technologies and are responsible for creating cloud-native applications. Professional-Cloud-Developer Exam is designed to test one's ability to use Google Cloud's tools and services to build scalable and fault-tolerant applications that meet business requirements.

Google Certified Professional - Cloud Developer Sample Questions (Q230-

Q235):

NEW QUESTION # 230

You have recently instrumented a new application with OpenTelemetry, and you want to check the latency of your application requests in Trace. You want to ensure that a specific request is always traced. What should you do?

- A. Add the X-Cloud-Trace-Context header to the request with the appropriate parameters.
- B. Write a custom script that sends this type of request repeatedly from your dev project.
- C. Use the Trace API to apply custom attributes to the trace.
- D. Wait 10 minutes, then verify that Trace captures those types of requests automatically.

Answer: A

Explanation:

Explanation

<https://cloud.google.com/trace/docs/setup#force-trace>

Cloud Trace doesn't sample every request. To force a specific request to be traced, add an X-Cloud-Trace-Context header to the request.

NEW QUESTION # 231

Your company has deployed a new API to a Compute Engine instance. During testing, the API is not behaving as expected. You want to monitor the application over 12 hours to diagnose the problem within the application code without redeploying the application. Which tool should you use?

- A. Cloud Debugger logpoints
- B. Cloud Monitoring
- C. Cloud Trace
- D. Cloud Debugger snapshots

Answer: A

Explanation:

<https://cloud.google.com/debugger/docs/using/logpoints>

Logpoints allow you to inject logging into running services without restarting or interfering with the normal function of the service

NEW QUESTION # 232

You are writing from a Go application to a Cloud Spanner database. You want to optimize your application's performance using Google-recommended best practices. What should you do?

- A. Write to Cloud Spanner using Cloud Client Libraries.
- B. Write to Cloud Spanner using a custom gRPC client library.
- C. Write to Cloud Spanner using a third-party HTTP client library.
- D. Write to Cloud Spanner using Google API Client Libraries

Answer: B

Explanation:

<https://cloud.google.com/spanner/docs/reference/libraries>

NEW QUESTION # 233

Please refer to the following information to answer the questions on the right.

Lucille has issues with her Apple device and takes it to an Apple Service Provider where Baron, a technician, assists her. Without much knowledge about the technical aspects of her device, Lucille vaguely describes the issues to Baron.

Which two of the following behaviors will not help Baron understand Lucille's issue? (Choose two.)

- A. Reflect what Lucille says.
- B. Use appropriate body language to acknowledge Lucille's issue.
- C. Remain silent until Lucille is done.

- D. Try to prove that Lucille is wrong about the issue.
- E. Immediately suggest a solution to Lucille.

Answer: D,E

NEW QUESTION # 234

You are creating a Google Kubernetes Engine (GKE) cluster and run this command:

```
> gcloud container clusters create large-cluster --num-nodes 200
```

The command fails with the error:

```
insufficient regional quota to satisfy request: resource "CPUS": request requires '200.0' and is short '176.0'. project has a quota of '24.0' with '24.0' available
```

You want to resolve the issue. What should you do?

- A. Request additional Compute Engine quota in the GCP Console.
- B. Request additional GKE quota in the GCP Console.
- C. Decouple services in the cluster, and rewrite new clusters to function with fewer cores.
- D. Open a support case to request additional GKE quota.

Answer: B
