TestPassKing web-based SAP Certified Associate - WalkMe Digital Adoption Consultant (C-WME-2506) practice exam software is usable only with a good internet connection.

SAP C-WME-2506 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Starting your Digital Adoption Journey: WalkMe Fundamentals: This section of the exam measures the skills of SAP project managers and covers the foundational concepts of digital adoption within SAP environments using WalkMe. Candidates are expected to understand the value of digital adoption platforms, the basic components of WalkMe, and how these tools align with business goals. The section emphasizes knowledge of the user experience within SAP and the ability to identify opportunities for improving digital workflows through in-app guidance and automation.
Topic 2	<ul style="list-style-type: none"> Getting Started with Building WalkMe Solutions: This section of the exam evaluates the capabilities of WalkMe implementers and focuses on the practical aspects of creating and configuring WalkMe solutions. It includes understanding the WalkMe Editor, planning solution flows, creating Smart Walk-Thrus, Launchers, and ShoutOuts, and managing end-user guidance effectively. Candidates should be comfortable building initial WalkMe experiences that improve SAP usability and provide contextual help for users navigating SAP applications.
Topic 3	<ul style="list-style-type: none"> Advancing your Skills in Building WalkMe Solutions: This section of the exam tests the advanced competencies of functional and business analysts in designing more complex and customized WalkMe solutions within SAP platforms. It requires a deeper understanding of user segmentation, advanced rules and triggers, performance optimization, and the use of analytics to refine user experiences. Candidates are expected to demonstrate their ability to design scalable and impactful guidance that aligns with SAP business processes and drives user adoption across the enterprise.

SAP Certified Associate - WalkMe Digital Adoption Consultant Sample Questions (Q37-Q42):

NEW QUESTION # 37

Which steps would you take to publish items to Production that you add to the user-facing Menu in the Menu Organizer?

- **A. Manually publishing the item to Production after adding it to the Menu Organizer and saving it.**
- B. Adding an item to the user-facing Menu and clicking Save automatically publishes it to Production.
- C. Adding items to the user-facing Menu are automatically published to Production.
- D. Changing the name of an added item in the Menu Organizer publishes it to Production.

Answer: A

Explanation:

In WalkMe, adding items to the user-facing Menu via the Menu Organizer does not automatically publish them to Production. After adding and saving items in the Menu Organizer, Builders must manually publish the changes to the Production environment using the WalkMe Editor's publish feature. This ensures that only reviewed and tested content is deployed, maintaining control over what end users see.

The other options are incorrect:

- * Option A is wrong because adding items requires manual publishing.
- * Option B is incorrect, as renaming doesn't trigger publishing.
- * Option D is false, as saving in the Menu Organizer doesn't publish to Production.

Extract from Official WalkMe Documentation:

According to the WalkMe Editor User Guide (SAP WalkMe Digital Adoption Consultant Study Guide, Section 1.5: WalkMe Menu):

"After adding items to the Menu Organizer and saving changes, manually publish the updated Menu to Production using the Editor's publish feature to make it available to end users." The course Getting Started with Building WalkMe Solutions states:

"To deploy Menu changes, add and save items in the Menu Organizer, then manually publish them to Production to ensure controlled deployment." Option C correctly describes the publishing process.

SAP WalkMe Digital Adoption Consultant Study Guide, Section 1.5: WalkMe Menu.

WalkMe Editor User Guide, "Publishing Menu Changes" Section.

Course: Getting Started with Building WalkMe Solutions, Module 4: Managing the WalkMe Menu.

NEW QUESTION # 38

Which is the syntax that you type into the developer console to check your jQuery selectors using WalkMe?

- A. WMjquery InsertSelectorHere
- B. walkmejQuery("InsertSelectorHere")
- **C. wmjQuery("InsertSelectorHere")**
- D. jQuery("InsertSelectorHere")

Answer: C

Explanation:

WalkMe provides a custom jQuery wrapper, wmjQuery, to test and validate jQuery selectors within the WalkMe environment. This wrapper ensures that selectors are evaluated in the context of WalkMe's framework, accounting for its specific DOM interactions and configurations. To check a jQuery selector, Builders type wmjQuery("InsertSelectorHere") into the browser's developer console, replacing InsertSelectorHere with the desired selector (e.g., wmjQuery("#myButton")). This returns the matched elements, confirming the selector's accuracy.

The other options are incorrect:

- * WMjquery InsertSelectorHere(A) is not a valid syntax and lacks proper formatting.
- * walkmejQuery("InsertSelectorHere")(B) uses incorrect capitalization and naming.
- * jQuery("InsertSelectorHere")(C) uses standard jQuery, which may not account for WalkMe's specific environment.

Extract from Official WalkMe Documentation:

Per the WalkMe Editor User Guide (SAP WalkMe Digital Adoption Consultant Study Guide, Section 2.7:

jQuery Selectors):

"To test jQuery selectors in the WalkMe environment, use the wmjQuery function in the browser's developer console. Syntax: wmjQuery("selector"). This ensures compatibility with WalkMe's framework and accurate element targeting." The course Advancing Your Skills in Building WalkMe Solutions explains:

"When troubleshooting or validating jQuery selectors, always use wmjQuery("selector") in the developer console to ensure the selector works within WalkMe's context, as standard jQuery may produce inconsistent results." Option D, wmjQuery("InsertSelectorHere"), is the correct syntax.

References:

SAP WalkMe Digital Adoption Consultant Study Guide, Section 2.7: jQuery Selectors.

WalkMe Editor User Guide, "Testing jQuery Selectors" Section.

Course: Advancing Your Skills in Building WalkMe Solutions, Module 10: Advanced Selector Techniques.

NEW QUESTION # 39

What does WalkMe's UI Intelligence feature do?

- A. It eliminates the need for data collection
- B. It forces users to complete forms without assistance
- C. It blocks users from entering incorrect data
- **D. It analyzes form interactions and provides actionable insights**

Answer: D

NEW QUESTION # 40

Which of the options below is a use case for when to use jQuery?

Note: There are 3 correct answers to this question.

- **A. To target a very specific element on your website.**
- B. To close the WalkMe menu and start an Onboarding task.
- **C. To grab a dynamic value from an on screen element and incorporate it into a ShoutOut for a personalized experience.**
- **D. If the WalkMe element selector algorithm is not consistently identifying your element.**
- E. To redesign the entire layout of the WalkMe balloons.

Answer: A,C,D

NEW QUESTION # 41

Your company just provided you with the new company logo that they want you to use in all of your WalkMe deployables. Where

is the best place to store the logo?

- A. WalkMe Admin Center
- **B. The Asset Library**
- C. Engaged Elements
- D. Local Settings

Answer: B

Explanation:

The WalkMe Asset Library is the centralized repository for storing and managing reusable assets, such as images, videos, and other media files, used across WalkMe deployables (e.g., Smart Walk-Thrus, ShoutOuts, Launchers). Storing the company logo in the Asset Library ensures it is easily accessible for consistent use across all WalkMe content, supports version control, and allows for efficient updates if the logo changes. This approach aligns with WalkMe's best practices for asset management, as it promotes scalability and maintainability.

The other options are not suitable for storing a logo:

- * WalkMe Admin Center is used for account management, user permissions, and configuration settings, not for storing media assets.
- * Local Settings are specific to individual WalkMe items or environments and are not designed for centralized asset storage.
- * Engaged Elements refers to UI elements targeted by WalkMe for interaction, not a storage location for assets.

Extract from Official WalkMe Documentation:

Per the WalkMe Editor User Guide (SAP WalkMe Digital Adoption Consultant Study Guide, Section 2.4:

Asset Management):

"The Asset Library is a centralized hub within the WalkMe Editor where Builders can upload and manage images, videos, and other media files. Assets stored here can be reused across multiple deployables, ensuring consistency and simplifying updates." The course Advancing Your Skills in Building WalkMe Solutions further states:

"To maintain brand consistency, store commonly used assets like logos in the Asset Library. This allows Builders to apply the same asset across ShoutOuts, SmartTips, and other content types without redundant uploads." Thus, option A, "The Asset Library," is the best place to store the company logo for use in WalkMe deployables.
