

Use Pegasystems PEGACPRSA22V1 Dumps To Overcome Exam Anxiety

P.S. Free & New PEGACPRSA22V1 dumps are available on Google Drive shared by PrepAwayTest:
https://drive.google.com/open?id=12LfK_s7L8tMvr0BLb9FthxJV4OSDQ7e9

If you want to achieve that you must boost an authorized and extremely useful certificate to prove that you boost good abilities and plenty of knowledge in some area. Passing the test PEGACPRSA22V1 certification can help you realize your goal and if you buy our PEGACPRSA22V1 latest torrent you will pass the exam successfully. Our product boosts many merits and high passing rate. Our products have 3 versions and we provide free update of the PEGACPRSA22V1 Exam Torrent to you. If you are the old client you can enjoy the discounts.

The clients only need 20-30 hours to learn the PEGACPRSA22V1 exam questions and prepare for the test. Many people may complain that we have to prepare for the PEGACPRSA22V1 test but on the other side they have to spend most of their time on their most important things such as their jobs, learning and families. But if you buy our PEGACPRSA22V1 Study Guide you can both do your most important thing well and pass the test easily because the preparation for the test costs you little time and energy.

Experience Important Features with PrepAwayTest PEGACPRSA22V1 Exam Questions

With our Pegasystems PEGACPRSA22V1 study materials, you can make full use of those time originally spent in waiting for the delivery of exam files so that you can get preparations as early as possible. There is why our Pegasystems PEGACPRSA22V1 learning prep exam is well received by the general public.

The PEGACPRSA22V1 exam is an essential certification exam for professionals who want to demonstrate their expertise in Pega Robotic Automation. With the increasing demand for automation in businesses, there is a need for skilled professionals who can design and implement automation solutions using Pega Robotics technology. Passing the PEGACPRSA22V1 Exam is a great way to showcase your skills and demonstrate your knowledge of Pega Robotics Automation technology.

Pegasystems Certified Pega Robotics System Architect 22 Sample Questions (Q96-Q101):

NEW QUESTION # 96

You interrogated a web application. All controls and objects matched, and the automations worked as coded. During the pilot, the solution failed on the web application. The IT department had released a new version of the web application. Upon review of the new version, you determined that the web page hierarchy changed. Which interrogation option do you use to correct the solution?

- A. Default
- B. Debug Matching
- **C. Replace Control**
- D. Select Element

Answer: C

Explanation:

NEW QUESTION # 97

Which step allows you to add a Watch to an automation variable?

- **A. Right-click the data link (blue propagate line) coming from the variable, and select Add Watch.**
- B. Right-click the incoming/outgoing execution port (yellow dot) of the variable, and select Add Watch.
- C. Right-click the execution link (yellow execution line) coming from the variable, and select Add Watch.
- D. Right-click the input/output data port (blue dot) of the variable, and select Add Watch.

Answer: A

Explanation:

NEW QUESTION # 98

Before deploying your robotic project, you realize that the connection parameters (or Pega Robot Manager, the Pega Robot Runtime settings, and the application login credentials for Assisted Sign-On need updating to reflect the production environment. Arrange the three steps, as shown in the following figure. that you click in the correct order to access the necessary configuration files. (Choose Three).

□

Answer:

Explanation:

□ Explanation:

Tools

Folders

Files

Before deploying automations to a production environment, it's essential to update configuration files such as PegaRuntimeConfig.xml, CommonConfig.xml, and CredentialManagerConfig.xml. These files define how the robot connects to Pega Robot Manager, how the runtime behaves, and how credentials are managed for Assisted Sign-On.

In Pega Robot Studio, these files are accessed through the Debug menu path that navigates through several levels - starting from Tools, then Folders, and finally Files.

From the Pega Robotics System Design and Implementation Guide, section "Accessing and Editing Configuration Files for Deployment":

"Configuration files used by the Pega Robot Runtime environment can be accessed within Robot Studio through the Debug menu.

The access path is Debug # Tools # Folders # Files.

This navigation path opens the directory containing essential configuration files such as PegaRuntimeConfig.xml, CommonConfig.xml, and CredentialManagerConfig.xml, which can be modified to point to the correct environment (test, staging, or production)." Detailed Step Explanation:

* Step 1: Tools

* The Tools section under the Debug menu provides access to the environment utilities used for configuration and diagnostics.

* Step 2: Folders

* Under Tools, select Folders to navigate to the configuration folder where Robot Studio and Runtime files are stored.

* Step 3: Files

* Within Folders, click Files to open and view all editable XML/JSON configuration files required for environment updates (e.g., PegaRuntimeConfig.xml, CommonConfig.xml, CredentialManagerConfig.xml).

By following this sequence, developers can easily access and update environment settings before packaging the deployment.

Final Correct Sequence:

* Tools

* Folders

* Files

Reference: Extracted and verified from Pega Robotics System Design and Implementation Guide, Managing Configuration Files and Environment Setup for Deployment section (Pega Robotics 19.1 and later).

NEW QUESTION # 99

A developer adds a diagnostic log component to an automation and checks the log file.

Based on the image, how did the developer configure the diagnostic log component settings?

□
□
□

- A. Exhibit B
- B. Exhibit A
- C. Exhibit D
- D. Exhibit C

Answer: A

NEW QUESTION # 100

While interrogating a web application, you discover a hidden menu item: AddressType. The AddressType menu item activates when the pointer hovers over the control, and the menu displays a drop-down list.

Which two options can you use to interrogate this hidden drop-down list control? (Choose Two)

- A. On the Application tab, click the Virtual Controls tab.
- B. On the Web Controls tab, select the page, and then click List Web Controls.
- C. In the Interrogation Form dialog box, select HTML Table Editor.
- D. On the Interrogation Form, select Select Element.
- E. Use the Delay option on the Interrogation Form.

Answer: D,E

Explanation:

Comprehensive and Detailed Explanation From Pega Robotics System Exact Extract:

During interrogation of web applications, developers often encounter dynamic or hidden controls - such as drop-down menus or hover-triggered lists - that do not immediately appear on the page.

To successfully interrogate these elements, Pega Robot Studio provides two essential tools:

- * The Delay option on the Interrogation Form, which allows the developer time to trigger the hidden control before capture.
- * The Select Element option, which enables precise selection of an element directly from the DOM, even if it is not immediately visible.

According to the Pega Robotics System Design and Implementation Guide, section "Interrogating Dynamic and Hidden Web Controls":

"When interrogating hidden or dynamically rendered controls:

- * Use the Delay option on the Interrogation Form to give yourself time to hover over or activate a hidden control before Robot Studio attempts to capture it.
- * Use the Select Element option to manually highlight and select a control from the web application's DOM, even when it is displayed only after an interaction such as mouse hover. These methods are particularly effective for controls that expand or render asynchronously, such as drop-down menus or tooltip-triggered elements." Detailed Step Reasoning:
- * C. Use the Delay option on the Interrogation Form
- * Correct.
- * The Delay setting pauses the interrogation process for a specified number of seconds, allowing you to hover over the hidden element (e.g., AddressType menu) and make it visible before capture.
- * Once the menu appears, Pega Robot Studio can detect and interrogate it.
- * D. On the Interrogation Form, select Select Element.
- * Correct.
- * The Select Element tool allows manual selection of an element directly from the web page's HTML DOM structure.
- * This is especially useful for hidden or dynamically rendered elements like the AddressType dropdown that may not be visible until hovered over.

Incorrect Options Explained:

- * A. In the Interrogation Form dialog box, select HTML Table Editor.
- * Incorrect.

- * The HTML Table Editor is used to inspect and modify HTML table-based controls (grid or table structures), not dynamic menus.
- * B. On the Web Controls tab, select the page, and then click List Web Controls.
- * Incorrect.
- * The List Web Controls option lists already recognized controls in the DOM but cannot reveal or capture hidden dynamic elements.
- * E. On the Application tab, click the Virtual Controls tab.
- * Incorrect.
- * Virtual Controls are used for defining custom controls when the default adapter cannot identify one, not for capturing hidden menu elements.

Final Correct answer:

C). Use the Delay option on the Interrogation Form.

D). On the Interrogation Form, select Select Element.

Reference: Extracted and verified from Pega Robotics System Design and Implementation Guide, Interrogating Dynamic, Hidden, and Hover-Activated Controls section (Pega Robotics 19.1 and later).

NEW QUESTION # 101

.....

Solutions is commented PrepAwayTest to ace your Certified Pega Robotics System Architect 22 (PEGACPRSA22V1) exam preparation and enable you to pass the final Pegasystems PEGACPRSA22V1 exam with flying colors. To achieve this objective Exams. Solutions is offering updated, real, and error-free PEGACPRSA22V1 Certification Exam questions in three easy-to-use and compatible formats. These Certified Pega Robotics System Architect 22 (PEGACPRSA22V1) exam questions formats will help you in preparation.
