

100-160 Dump - Valid Test 100-160 Testking

P.S. Free 2026 Cisco 100-160 dumps are available on Google Drive shared by Real4Prep: <https://drive.google.com/open?id=16B3h4EsAAvmAnj0R6xPxGZ0iNU-QUepR>

Nowadays, it is hard to find a desirable job. A lot of people are forced to live their jobs because of lack of skills. So you must learn something in order to be washed out by the technology. Then our 100-160 study materials totally accord with your demands. With the latest information and knowledge in our 100-160 Exam Braindumps, we help numerous of our customers get better job or career with their dreaming 100-160 certification.

Cisco 100-160 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Endpoint Security Concepts: This section of the exam measures the skills of an Endpoint Security Specialist and includes securing individual devices, understanding protections such as antivirus, patching, and access control at the endpoint level, essential for maintaining device integrity.
Topic 2	<ul style="list-style-type: none"> Incident Handling: This section of the exam measures the skills of an Incident Responder and centers on recognizing security incidents, responding appropriately, and containing threats—forming the essential foundation of incident response procedures.
Topic 3	<ul style="list-style-type: none"> Essential Security Principles: This section of the exam measures the skills of a Cybersecurity Technician and covers foundational cybersecurity concepts such as the CIA triad (confidentiality, integrity, availability), along with basic threat types and vulnerabilities, laying the conceptual groundwork for understanding how to protect information systems.
Topic 4	<ul style="list-style-type: none"> Basic Network Security Concepts: This section of the exam measures the skills of a Network Defender and focuses on understanding network-level protections, including firewalls, VPNs, and intrusion detection prevention systems, providing insight into how threats are mitigated within network environments.
Topic 5	<ul style="list-style-type: none"> Vulnerability Assessment and Risk Management: This section of the exam measures the skills of a Risk Management Analyst and entails identifying and assessing vulnerabilities, understanding risk priorities, and applying mitigation strategies that help manage threats proactively within an organization's systems

Efficient and Convenient Preparation with Real4Prep's Updated Cisco 100-160 Exam Dumps

In addition to the advantages of high quality, our 100-160 study materials also provide various versions. In order to meet your personal habits, you can freely choose any version within PDF, APP or PC version. Among them, the PDF version is most suitable for candidates who prefer paper materials, because it supports printing. If you want to use our 100-160 Study Materials on your phone at any time, then APP version is your best choice as long as you have browsers on your phone.

Cisco Certified Support Technician (CCST) Cybersecurity Sample Questions (Q218-Q223):

NEW QUESTION # 218

Move each worm mitigation step from the list on the left to the correct description on the right.

Note: You will receive partial credit for each correct answer.

Answer:

Explanation:

NEW QUESTION # 219

What is the purpose of a VPN?

- A. To detect network vulnerabilities
- **B. To encrypt network traffic**
- C. To authenticate users
- D. To block unauthorized access

Answer: B

Explanation:

A VPN (Virtual Private Network) is used to create a secure connection between a user's device and a private network, such as a corporate network or the internet. It encrypts the data that is transmitted between the user and the network, ensuring that even if intercepted, the data is unreadable by unauthorized individuals.

NEW QUESTION # 220

Which Windows app is a command-line interface that includes a sophisticated scripting language used to automate Windows tasks?

- A. Microsoft Management Console
- B. MS-DOS
- C. Vim
- **D. PowerShell**

Answer: D

Explanation:

The CCST Cybersecurity course identifies Windows PowerShell as both a command-line interface (CLI) and a robust scripting environment. It is used by system administrators for automation, configuration, and task scheduling.

"PowerShell is a Windows command-line shell and scripting language built on the .NET framework. It allows administrators to automate administrative tasks, manage system configurations, and execute complex scripts for system management." (CCST Cybersecurity, Endpoint Security Concepts, System Administration Tools section, Cisco Networking Academy) A is correct: PowerShell provides both interactive command execution and scripting capabilities.

B (MMC) is a GUI-based management console, not a CLI.

C (Vim) is a text editor, not a Windows-native CLI.

D (MS-DOS) is a legacy command shell with no advanced scripting features comparable to PowerShell.

NEW QUESTION # 221

Which of the following is a key feature of a disaster recovery plan?

- A. Data encryption
- B. Employee training
- C. Offsite backups
- D. Regular software updates

Answer: C

Explanation:

Offsite backups are an essential feature of a disaster recovery plan. They involve storing copies of data in a separate physical location away from the primary site. In the event of a disaster, these backups ensure that data can be restored and accessed even if the primary site is no longer functional.

NEW QUESTION # 222

Which feature allows endpoints to communicate directly with each other, bypassing the network?

- A. Peer-to-Peer
- B. VPN
- C. Firewall
- D. IPS

Answer: A

Explanation:

Option 1: Incorrect. A firewall is a network security device that monitors and filters incoming and outgoing network traffic based on predetermined security rules.

Option 2: Incorrect. An IPS (Intrusion Prevention System) is a network security device that monitors network traffic for malicious activity and takes immediate action to prevent attacks.

Option 3: Incorrect. A VPN (Virtual Private Network) is a secure connection between two or more endpoints over a public network, providing encryption and privacy for data communication.

Option 4: Correct. Peer-to-peer (P2P) is a decentralized communication model where endpoints can directly communicate with each other without the need for a central server or network infrastructure.

NEW QUESTION # 223

.....

100-160 practice exam will provide you with wholehearted service throughout your entire learning process. This means that unlike other products, the end of your payment means the end of the entire transaction our 100-160 learning materials will provide you with perfect services until you have successfully passed the 100-160 Exam. And if you have any questions, just feel free to us and we will give you advice on 100-160 study guide as soon as possible.
