You don't know how to acquire a promotion quickly while you're trying to get a new job or already have one but need a promotion. The sole option is Workday Workday-Pro-Time-Tracking certification, which makes it simple for you to advance in your career. Your skills will advance and your resume will be enhanced thanks to the Workday Workday-Pro-Time-Tracking Certification.

Workday ProTime Tracking Exam Sample Questions (Q22-Q27):

NEW QUESTION # 22

What EIB is used for loading legacy time entry data for configuration testing?

- **A. Import Reported Time Blocks**
- B. Payroll Input
- C. Put Period Schedule
- D. Put Holiday Calendar

Answer: A

Explanation:

The correct answer is B. Import Reported Time Blocks .

In Workday Time Tracking, when an organization needs to load legacy time entry data into the tenant for configuration testing , the appropriate Enterprise Interface Builder (EIB) is Import Reported Time Blocks .

This EIB is specifically designed to bring in historical or external reported time entries so that organizations can validate how Workday processes time calculations, overtime rules, validations, approvals, and downstream integrations using realistic data.

This is especially useful during implementation or testing cycles when the team wants to confirm that configured time entry templates, time calculations, and administrative processes behave correctly with actual time data patterns from the legacy system. By importing reported time blocks, Workday can apply the configured rules and allow testers to compare expected and actual outcomes.

The other options are not intended for loading time entry history. Payroll Input is used for payroll-related input data, not for time entry blocks. Put Period Schedule is used to maintain or load period schedule information. Put Holiday Calendar is for holiday setup, not worker time records. None of those options load the detailed reported worked-time entries needed for time tracking configuration testing.

Therefore, the correct EIB for loading legacy time entry data into Workday Time Tracking is Import Reported Time Blocks .

NEW QUESTION # 23

What app provides a central location for cards that display frequently used tasks and reports for Time Tracking?

- **A. Time Administrator Home**
- B. View Worker's Time Eligibility
- C. View Worker's Time Eligibility by Organization
- D. All Time Entry Templates

Answer: A

Explanation:

The correct answer is D. Time Administrator Home .

In Workday Time Tracking, Time Administrator Home is the app designed to provide administrators with a centralized workspace for managing time tracking activities. It displays cards that surface commonly used tasks, reports, alerts, and administrative actions, making it easier for time administrators to access the most relevant tools from one place. This home page is intended to improve efficiency by organizing frequent Time Tracking functions into a single operational hub.

The other options are not apps that provide a card-based administrative home experience. All Time Entry Templates is a report or task used to review configured templates, not a central home app. View Worker's Time Eligibility is a worker-specific report used to review which time tracking components apply to a worker. View Worker's Time Eligibility by Organization is also a reporting function, focused on reviewing eligibility across organizations rather than serving as a dashboard.

Because the question specifically asks for an app that offers a central location for cards showing frequently used Time Tracking tasks and reports, Time Administrator Home is the only option that fits that description.

It is the main administrative landing area for ongoing monitoring and action in Workday Time Tracking.

Therefore, the correct answer is D. Time Administrator Home .

NEW QUESTION # 24

A worker's Work Schedule Calendar has a Day Breaker of 2:00 AM (current day from previous day). They report regular hours from 8:00 PM, April 05 to 4:00 AM, April 06.

How will the calculated hours show on the time block?

- A. Six regular hours on April 05 and two regular hours on April 06.
- B. Two regular hours on April 05 and six regular hours on April 06.
- C. Four regular hours on April 05 and four regular hours on April 06.
- D. Eight regular hours on April 05 and no regular hours on April 06.

Answer: A

Explanation:

The correct answer is D. Six regular hours on April 05 and two regular hours on April 06 .

In Workday Time Tracking, a Day Breaker determines when one workday ends and the next workday begins for time calculation purposes. When the Day Breaker is set to 2:00 AM , any time worked before 2:00 AM is treated as belonging to the previous day , and any time worked at or after 2:00 AM belongs to the current day .

In this example, the worker enters time from 8:00 PM on April 05 to 4:00 AM on April 06 , which equals 8 total hours . These hours split as follows:

* 8:00 PM to 12:00 AM = 4 hours on April 05

* 12:00 AM to 2:00 AM = 2 hours, but because of the 2:00 AM Day Breaker, these hours still belong to April 05

* 2:00 AM to 4:00 AM = 2 hours that belong to April 06

That produces:

* 6 regular hours on April 05

* 2 regular hours on April 06

The key concept is that Workday does not simply split time at midnight when a Day Breaker is defined.

Instead, it uses the configured Day Breaker to assign hours to the proper workday for scheduling, calculations, and reporting.

NEW QUESTION # 25

What report should you use to check if a worker is eligible for more than one time entry template at a given time?

- A. View Worker's Time Eligibility
- B. Audit - Workers with Multiple Time Entry Templates
- C. All Time Approval Templates
- D. All Time Entry Templates

Answer: B

Explanation:

The correct answer is C. Audit - Workers with Multiple Time Entry Templates .

In Workday Time Tracking, a worker should normally be eligible for only one active time entry template at a time. The time entry template controls how the worker records time, such as hours versus in/out entry, required fields, worktags, and related entry behavior. If a worker becomes eligible for more than one template simultaneously, it can create inconsistent time entry behavior and configuration conflicts. To detect this kind of setup issue, Workday provides a dedicated audit report: Audit - Workers with Multiple Time Entry Templates .

This report is specifically designed to identify workers whose eligibility rules cause overlap across templates.

That makes it the best tool for administrators who are validating setup and trying to prevent template assignment conflicts before they affect time entry.

Option A , All Time Entry Templates , lists templates but does not specifically identify workers with overlapping eligibility. Option B , All Time Approval Templates , relates to approval routing, not time entry template eligibility. Option D , View Worker's Time Eligibility , can help review an individual worker's eligibility setup, but it is not the primary audit report used to systematically find workers with multiple time entry templates at the same time.

So the most accurate and purpose-built report is C .

NEW QUESTION # 26

Refer to the following scenario to answer the question below.

☐ You must create a new time calculation to determine when workers work more than 20 hours in one week with the 1-Supervisor Premium tag.

What is the appropriate priority for the new calculation?

- A. USA_HRL_30
- B. USA_HRL_60
- C. USA_HRL_70
- D. USA_HRL_10

Answer: C

Explanation:

The correct answer is C. USA_HRL_70 . In this scenario, the new calculation is designed to evaluate hours that already have the 1-Supervisor Premium tag. In the report, the existing 1-Supervisor Premium calculation has a priority of USA_HRL_60 . In Workday Time Tracking, when a calculation depends on the output of another calculation, it must run after the earlier calculation has already assigned its tag. Otherwise, the new calculation would run too soon and would not find the tagged hours it is supposed to evaluate. Because this new weekly calculation is specifically looking for hours with the 1-Supervisor Premium tag that exceed 20 hours in a week , it must be placed at a priority after USA_HRL_60 . Among the answer choices, USA_HRL_70 is the correct next priority that ensures proper sequencing.

The other options are not appropriate. USA_HRL_30 and USA_HRL_10 would run before the Supervisor Premium calculation, so the required tag would not yet exist. USA_HRL_60 is the same priority as the existing calculation and does not clearly guarantee the dependent logic runs afterward. Therefore, the best and correct priority for the new calculation is USA_HRL_70 .

NEW QUESTION # 27

.....

Students are worried about whether the Workday-Pro-Time-Tracking practice materials they have purchased can help them pass the exam and obtain a certificate. They often encounter situations in which the materials do not match the contents of the exam that make them waste a lot of time and effort. But with Workday-Pro-Time-Tracking exam dump, you do not need to worry about similar problems. Because our study material is prepared strictly according to the exam outline by industry experts, whose purpose is to help students pass the exam smoothly. As the authoritative provider of Workday-Pro-Time-Tracking Test Guide, we always pursue high passing rates compared with our peers to gain more attention from potential customers. In order to gain the trust of new customers, Workday-Pro-Time-Tracking practice materials provide 100% pass rate guarantee for all purchasers. We have full confidence that you can successfully pass the exam as long as you practice according to the content provided by Workday-Pro-Time-Tracking exam dump. Of course, if you fail to pass the exam, we will give you a 100% full refund.
