

# Pass Guaranteed Quiz Updated HP - HPE7-A03 - Well Aruba Certified Campus Access Architect Exam Prep

BONUS!!! Download part of Exams4sures HPE7-A03 dumps for free: <https://drive.google.com/open?id=1y8lsUxouZnv-DZ9vm90pi7LiG6ocfEfV>

Do you want to spend half of time and efforts to pass HPE7-A03 certification exam? Then you can choose Exams4sures. With efforts for years, the passing rate of HPE7-A03 exam training, which is implemented by the Exams4sures website worldwide, is the highest of all. With Exams4sures website you can download HPE7-A03 free demo and answers to know how high is the accuracy rate of HPE7-A03 test certification training materials, and to determine your selection.

## HP HPE7-A03 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> <li>Propose the Solution: The focal point of this topic is creating the design documentation and the final design. Moreover, the topic also focuses on presenting the solution.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>Analyze Requirements: It focuses on determining possible high-level solutions. The topic also discusses mapping the needs into technical solutions and evaluating the proposed solution against project objectives and dependencies. Moreover, it also focuses on documenting assumptions.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>Discover Requirements: This topic defines the goals and identifies the current environment and the objectives. Lastly, it also focuses on collecting information.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>Architect the Solution: It measures your knowledge about identifying the solution options, designing high-level topologies, selecting the correct products, and determining the suitable overlay and underlay design. Additionally, the topic discusses how to verify that the design meets the original requirements.</li> </ul>

## Exam HP HPE7-A03 Training & HPE7-A03 Test Guide Online

There are three different versions of our HPE7-A03 exam questions to meet customers' needs you can choose the version that is suitable for you to study. If you buy our HPE7-A03 test torrent, you will have the opportunity to make good use of your scattered time to learn. If you choose our HPE7-A03 study torrent, you can make the most of your free time. So using our HPE7-A03 Exam Prep will help customers make good use of their fragmentation time to study and improve their efficiency of learning. It will be easier

for you to pass your HPE7-A03 exam and get your certification in a short time.

## HP Aruba Certified Campus Access Architect Exam Sample Questions (Q18-Q23):

### NEW QUESTION # 18

A large multinational financial institution has contracted you to design a new full-stack wired and wireless network for their new 6-story regional office building. The bottom two floors of this facility will be retail space for a large banking branch. The upper floors will be carpeted office space for corporate users, each floor being approximately 100,000 sq ft (9290 sq m). Data centers are all offsite and will be out of scope for this project. The customer is underserved by its existing L2-based network infrastructure and would like to take advantage of modern best practices in the new design. The network should be fully resilient and fault-tolerant, with dynamic segmentation at the edge.

The retail space will include public guest Wi-Fi access. Retail associates will have corporate tablets for customer service, and there will be a mix of wired and wireless devices throughout the retail floors. The corporate users will primarily use wireless for connectivity, but several wired clients, printers, and hard VoIP phones will be in use.

The customer is also planning on renovating the corporate office space in order to take advantage of 'smart office' technology. These improvements will drive blue-dot wayfinding, presence analytics, and other location-based services.

The client decided that wired headless devices would be authenticated using Mac Authentication and would have RADIUS attributes sent back to the NAD to assign VLAN and port access parameters to the authentication session on the switch port.

What would be critical in making this a successful deployment? (Choose two.)

- A. Mobility Gateway
- B. DHCP
- C. Airwave
- D. ClearPass

**Answer: B,D**

Explanation:

For a successful deployment of MAC Authentication with RADIUS attributes for VLAN and port access parameters, ClearPass is critical. ClearPass Policy Manager offers advanced network access control, policy management, and is capable of handling MAC Authentication effectively. It can communicate with the Network Access Devices (NADs) to apply the correct access policies based on RADIUS attributes received during the authentication process. DHCP is also crucial in this setup for dynamically assigning IP addresses to authenticated devices, ensuring that they can connect to the network with the appropriate network settings. Together, ClearPass and DHCP services form the backbone of a secure, manageable, and dynamically segmented network infrastructure, ensuring devices are authenticated and receive the correct network configuration.

### NEW QUESTION # 19

ACME retail has 38 locations spread out across Ave US states and two provinces in Canada. They are looking to grow 20% over the next two years. They have an HO with a staff of 200 employees. The organization has eight Regional Managers and two VPs who work from home and the road. Stores typically have 17 employees on average per location.

The two warehouses have a remote loading system and 20 employees each to load the trucks and fulfill the online orders. The warehouse has 40-foot ceilings and large metal racks to store inventory. The main location is 240K sq ft (22300 st) m) and the Canadian warehouse is 130K sq ft (12100 sq m). The forklifts on the loading docks are equipped with a wireless tablet on board.

A typical store is reportedly about 60,000 sq ft (5575 sqm) and smaller stores are planned at 25,000 sq ft (2320 sq m). The locations need to expand the abilities to vendors that need to add setup displays or Interactive kiosks in the stores. The current Infrastructure was installed in 2015 and used wireless N technology in a coverage model. The wiring is Cat5, and they are unsure of the fiber connections. The inventory is all placed on the floor when it is delivered to the local store.

Inventory control is handled through Zebra barcode scanners, and they have had a lot of issues in getting signals throughout the stores and this makes monthly inventory difficult. The organization has a small help desk to troubleshoot issues that happen at the retail locations and PC support for the office. The company is looking to upgrade away from the current pbx system later this year. With the need to grow and cut costs, they are interested in moving the data to the cloud but need to get almost real-time inventory control for the online service to function.

The network has all been wired over the last ten years, but with the new systems being all wireless, they have seen the trend to offer wireless to all the vendors for their needs but also would like to allow employees, guests, and contractors all to use it. With the new IT director starting next week, the project has been set by the CTO of the company. The marketing group has asked how they can interact with the customers and get more info, while the IT support desk needs to cut staff in half.

The office has an MDF and two IDF's located on floors one and two. The HOF is in the basement, and you have multiple WAN circuits for the HO links. Each store has a local handoff from the cable company (ethernet) in the middle of the store in the office, so

distance for the wiring is not an issue.

The customer has budget concerns but does want something that could last 7+ years.

Based on the scenario, where would you look to add additional items to the BOM to aid the company goals?(Select three.)

- **A. Marketing**
- B. Security Team/CISO
- C. Customer Experience Officer
- D. Sales Management
- **E. Finance Team**
- **F. Building Facilities**

**Answer: A,E,F**

Explanation:

In addressing the company's goals and the challenges presented in the scenario, adding items to the Bill of Materials (BOM) that would involve the Building Facilities team could include infrastructure upgrades like improved cabling (moving from Cat5 to a higher category) or enhancements to support the new wireless and VoIP systems. For the Marketing team, technologies that could enable better interaction with customers, such as location-based services or analytics tools, would be beneficial. These could help in understanding customer behavior within the stores and tailoring marketing efforts accordingly. Finally, input from the Finance Team would be essential in ensuring that the solutions chosen fit within the budget constraints and offer a good return on investment, especially considering the company's desire for a solution that could last 7+ years and support their growth plans.

#### **NEW QUESTION # 20**

During the Stakeholder interview, an agenda is built where customer expectations are clarified. The customer is worried about future business requirements where network scalability and flexibility are key.

Which expectations can be considered for solving upcoming business problems? (Select two).

- A. critical needs
- **B. business outcomes**
- C. pain points
- **D. anticipated growth**
- E. network deployment

**Answer: B,D**

#### **NEW QUESTION # 21**

You and the customer decide that DUR should be used for centralized policy management. The plan also includes dynamic VNBT-based distributed Dynamic Segmentation. Which switch model should be used?

- A. 6200F/M
- B. 0
- C. 1
- **D. 6300F/M**

**Answer: D**

Explanation:

To support a combination of Downloadable User Roles (DUR) and VNBT-based (Virtual Network Based Tunneling) distributed Dynamic Segmentation, the hardware must support specific advanced Layer 3 and VXLAN capabilities at the access layer.

\* Distributed Dynamic Segmentation: This architecture requires switches to act as VXLAN Tunnel End Points (VTEPs) to encapsulate traffic into VXLAN tunnels based on the assigned User Role.

\* 6300F/M Capability: The AOS-CX 6300 series is the primary access layer switch designed for this role. It provides the necessary hardware support for VXLAN and GBPs (Group Based Policies) required for distributed Dynamic Segmentation.

\* DUR Support: Like other AOS-CX switches, the 6300 series integrates fully with Aruba ClearPass to download user roles dynamically upon authentication, ensuring centralized policy management.

\* Comparison:

\* 6200F/M: This is a "Value" access switch. While it supports DUR, it lacks the hardware capability for VXLAN/VTEP, meaning it cannot support VNBT-based distributed Dynamic Segmentation.

\* 8360 / 8100: These are core/aggregation switches. While they support VXLAN, they are not typically the point of ingress for user

authentication and DUR-based access control in a campus design.

### NEW QUESTION # 22

XYZ Regional Hospital is an integrated healthcare system of hospitals, neighborhood health centers, and small doctor offices. XYZ Regional Hospital has recently merged with 4x neighborhood health centers and 125 doctor branch offices. The wireless, wired access, and AAA solutions are outdated and need to be replaced.

XYZ Regional Hospital is looking to future-proof and improve efficiency across all sites by enhancing wired and wireless access and migrating to a centralized and unified wired/wireless and policy management that can provide uninterrupted availability of all systems.

Locations:

- XYZ Regional Hospital is located in New York City
- Dila Health Center is located in City A
- Mount Health Center is located in City B
- Rock Health Center is located in City C
- Branch clinics are located at different locations across the United States
- Requirements:
- Provide, via management software, one single pane of glass to manage wired and wireless LANs, and VPNs across campus, branch, and remote via web/cloud architecture providing near real-time insight, troubleshooting tools, and Service Level performance reporting.
- Seamless integration across wired, wireless, WAN, SD-Branch, IoT
- Provide secure wireless access to all the employees of the Regional Hospital and partners, as well as provide wireless Internet access to medical citizens when they visit our facilities.
- All-access points must support the following features and specifications: 802.11.ax (Wi-Fi 6E Certified)
- Security options including WPA2/WPA3, 802.1X with Radius secure authentication
- Identify and authenticate every wireless and wired device
- End-to-end role-based security
- Seamless mobility across the hospital for medical teams, patients, and visitors
- Cuts Wi-Fi deployment times from days to hours and enables Zero-Touch deployments across the site
- Establishes a resilient, future-ready network infrastructure with the intelligence, scalability, and intuitive toolsets to meet emerging needs
- Fully redundant branch solution with dynamic path selection to the hospital
- A Regional Hospital will be implementing RADIUS authentication across all their switches. They are looking for a solution wherein they can use HPE Aruba Networking ClearPass Policy Manager to allow staff members from five different teams (AV team, security team, desktop/printer team, voice team, network & security team) to register these types of devices and control access to them to a specific team.

This registration, visibility, and access control to devices must be self-service. In addition, device registration needs to be removable on a scheduled basis.

What is the most appropriate solution for the hospital's requirements?

- A. HPE Aruba Networking ClearPass Endpoint Repository
- B. HPE Aruba Networking ClearPass Device Profiler
- **C. HPE Aruba Networking ClearPass Device Registration**
- D. HPE Aruba Networking ClearPass Device Insight

**Answer: C**

Explanation:

ClearPass Device Registration provides self-service onboarding for non-802.1X devices, allows role-based ownership by different teams, and supports scheduled removal. This directly matches the hospital's requirement to let multiple staff groups register and control their own device types with automated lifecycle management.

### NEW QUESTION # 23

.....

Our HPE7-A03 free dumps demo will provide you some basic information for the accuracy of our exam materials. All questions and answers in our HPE7-A03 real dumps are tested by our certified trainers with rich experience and one or two days is enough for you practicing Valid HPE7-A03 Exam Pdf. Our HPE7-A03 dumps torrent contains everything you want to solve the challenge of real exam.
