최신 SAP Certified Associate C-THR83-2505 무료샘플문제 (Q41-Q46):

질문 # 41

You want to link a field in the job requisition to a field in the offer details template. What attribute do you use?

- A. template-type="job-requisition"
- **B. template-type="job-req"**
- C. template-type="Simple Job Requisition"
- D. template-type="job-JRDM"

정답: B

설명:

When linking a field in the job requisition to a field in the offer details template, the correct attribute to use is template-type="job-req". This attribute specifies that the field being referenced is from the Job Requisition template and allows the offer details template to access and display that information.

* Use template-type Attribute:

* In the offer details template XML, include template-type="job-req" to link the field from the job requisition.

* Save and Test:

* After configuring, test the setup by creating an offer to verify that the linked field is correctly populated from the job requisition.

: SAP SuccessFactors Recruiting Management Implementation Guide - Linking Fields between Templates.

Explanation of Incorrect Options:

The other template types listed do not apply for linking fields between the job requisition and offer details templates.

질문 # 42

What permission must be assigned to a user so the user can post a job through Recruiting Posting?

- A. Recruiting Posting
- B. OData API Job Requisition Create
- **C. Manage Recruiting Posting**
- D. OData API Job Requisition Export

정답: C

설명:

In SAP SuccessFactors, the Manage Recruiting Posting permission is required to enable a user to post jobs through Recruiting Posting. This permission grants access to the necessary tools and functionalities within the Recruiting Posting module.

* Assigning Permissions:

* Go to Admin Center > Manage Permission Roles and assign the Manage Recruiting Posting permission to the relevant user role to enable job posting capabilities.

: SAP SuccessFactors Recruiting Posting Configuration Guide - User Permissions for Job Posting

Explanation of Incorrect Options:

Option A (Recruiting Posting): This is not a standalone permission in the system.

Options C and D (OData API permissions): These permissions relate to API access and do not enable direct posting capabilities.

질문 # 43

What field-permission do you configure on the Candidate Profile template?

- A. None read and write for dynamic groups only
- B. None read and write for candidates and dynamic groups
- **C. Read and write permissions for candidates and dynamic groups**
- D. Read and write for candidates only

정답: C

설명:

On the Candidate Profile template, you configure read and write permissions to control access for both candidates and dynamic groups. This allows granular control over which sections of the profile are editable or visible to specific users or groups.

* Steps to Configure:

* Go to the Candidate Profile template XML configuration.

* Define the appropriate read and write permissions for fields based on roles or dynamic groups.

: SAP SuccessFactors Recruiting Management Data Model Guide - Configuring Permissions in the Candidate Profile Template.

Explanation of Incorrect Options:

Option B - None read and write for candidates and dynamic groups: The absence of read and write permissions would limit visibility and editing functions.

Option C - None read and write for dynamic groups only: Permissions can be set selectively, but both candidates and dynamic groups commonly have permissions set.

Option D - Read and write for candidates only: Permissions are typically defined for both candidates and groups, not candidates only.
