Exam Salesforce Plat-Admn-301 Topics - Plat-Admn-301 Valid Exam Forum

With more than thousands of satisfied applicants in multiple countries, we guarantee that you will clear the Salesforce Plat-Admn-301 exam as quickly as possible by using our product. In this way, Exams.Solutions save you time and money. In addition to all these excellent offers, in any case despite properly studying with Plat-Admn-301 Practice Test material.

Salesforce Plat-Admn-301 Exam Syllabus Topics:

Topic	Details

Topic 1	<ul style="list-style-type: none"> • Cloud Applications: This section of the exam measures skills of Salesforce Consultant and covers the standard Salesforce capabilities that support sales and service operations. It includes features such as products, price books, schedules, orders, quotes, and the tools that help with forecasting and territory management. The section also describes how to create Salesforce Knowledge articles, manage entitlements, support service workflows, and enable interactions through chat, case feed, Omni-Channel, console apps, and Experience Cloud sites. It also introduces the broader Salesforce suite that extends core platform functionality.
Topic 2	<ul style="list-style-type: none"> • Auditing and Monitoring: This section of the exam measures skills of a Salesforce Support Specialist and covers the tools used to monitor system behavior and review user activity. It includes understanding debug logs, setup audit trail, and methods for ensuring sensitive data is handled correctly in both production and sandbox environments. It also explains how to review and troubleshoot security settings, including recognizing pending updates that might affect system access.
Topic 3	<ul style="list-style-type: none"> • Data and Analytics Management: This section of the exam measures skills of Salesforce Data Analyst and covers data quality assessment, data enrichment, and duplicate management. It explains how to choose appropriate reporting and analytics tools for advanced requirements, including custom report types, snapshots, formulas, joined reports, and dashboard configurations. It also covers methods for connecting external data sources using big objects, external objects, data warehouses, data lakes, and Salesforce Connect. Finally, it describes the suitable tools and methods for importing data, including Data Loader, Data Import Wizard, and external IDs.

Salesforce Certified Platform Administrator II Sample Questions (Q87-Q92):

NEW QUESTION # 87

Dream house Realty has created a custom object to track its Open Houses with a master-detail relationship up to a custom object for Properties. Agents need to quickly calculate the number of Open House records in a status or Pending so they can see the value from the Property record.

What feature should the administrator implement?

- A. Lightning Component
- B. Formula Fields
- C. visualforce Page
- **D. Roll-Up Summary**

Answer: D

Explanation:

A roll-up summary field is used to display a value in a master record based on the values of a set of related detail records. In this case, the administrator can create a roll-up summary field on the Properties object that counts the number of Open House records in a Pending status. References: https://help.salesforce.com/s/articleView?id=sf.fields_about_roll_up_summary_fields.htm&type=5

NEW QUESTION # 88

An administrator created and activated several record-triggered flows that are configured to run before the record is saved on the same object.

What should the administrator consider about the order of execution for flows?

- A. The flows will execute in alphabetical order based on their names.
- **B. The order of flow execution is unpredictable.**
- C. The last created date of the flow will determine the order.
- D. The flow type will determine the order of execution.

Answer: B

Explanation:

When you have multiple record-triggered flows that are configured to run before the record is saved on the same object, the order of flow execution is unpredictable. This means that you cannot guarantee which flow will run first or last, or how they will affect each

other's field updates. Therefore, you should avoid creating multiple before-save flows on the same object and instead consolidate them into one flow if possible.

References: https://help.salesforce.com/s/articleView?id=sf.flow_considerations_recordtriggered_before.htm&type=5

NEW QUESTION # 89

The administrator at Universal Containers does a soft launch of the Salesforce Authenticator app and allows users to optionally use it to log in. The administrator would now like to look at how many users have successfully used it since it was rolled out.

What are two ways the administrator can get this information?

Choose 2 answers

- A. Open the Login Access Policies in Setup which shows how many users are using MFA.
- B. Create a new view in Identity Verification History, specifying Method.
- C. Run a session setting report, specifying login methods by user.
- D. The order of flow execution is unpredictable

Answer: B,C

Explanation:

Salesforce Authenticator is an app that allows users to verify their identity when logging in to Salesforce using two-factor authentication (2FA). 2FA adds an extra layer of security by requiring users to enter a verification code or approve a notification on their mobile device after entering their username and password.

To look at how many users have successfully used Salesforce Authenticator since it was rolled out, an administrator can use two ways:

* A) Run a session setting report, specifying login methods by user.

A session setting report is a report that shows information about users' login sessions, such as login time, location, IP address, browser, platform, etc. A session setting report can also show the login methods used by users, such as password, verification code, or notification. By running a session setting report, specifying login methods by user, an administrator can see how many users have used Salesforce Authenticator to log in to Salesforce. References: https://help.salesforce.com/s/articleView?id=sf.reports_session.htm&type=5

* C) Create a new view in Identity Verification History, specifying Method.

Identity Verification History is a page that shows the history of identity verification attempts for each user in the org. Identity verification history includes information such as date, time, status, method, and IP address of each attempt. By creating a new view in Identity Verification History, specifying Method as a filter criterion, an administrator can see how many users have used Salesforce Authenticator to verify their identity when logging in to Salesforce. References: https://help.salesforce.com/s/articleView?id=sf.identity_verification_history.htm&type=5

identity_verification_history.htm&type=5

NEW QUESTION # 90

Select power users want the ability to make configuration changes to a specific custom object.

What tool should the administrator assign to the power users to enable this?

- A. View Setup and Configuration
- B. Delegated Administration
- C. Modify All Data
- D. Sharing Rule

Answer: B

Explanation:

Delegated Administration is a feature that allows administrators to delegate some administrative tasks to other users without giving them full access to Setup. Delegated administrators can manage users and assign permissions for specific custom objects, tabs, apps, and fields. This can help reduce the workload of the system administrator and empower power users to make configuration changes to a specific custom object

NEW QUESTION # 91

The administrator at Cloud Kicks is troubleshooting an issue one user is having with a flow. They have decided to add a debug log to that user.

What debug log category should be used?

- A. Callout
- B. System
- **C. Workflow**
- D. Database

Answer: C

Explanation:

Workflow is the debug log category that should be used to troubleshoot an issue with a flow. Workflow is a debug log category that captures information about workflow rules, flows, processes, approval processes, and entitlement processes. Workflow can help identify errors or issues related to these automation tools by showing details such as evaluation criteria, actions executed, variables assigned, and outcomes reached.

NEW QUESTION # 92

.....
