## Useful Study Guide & Exam Questions to Pass the Splunk SPLK-4001 Exam

Solve SPLK-4001 Practice Tests to Score High!

[www.CertFun.com](http://www.CertFun.com)

Here are all the necessary details to pass the SPLK-4001 exam on your first attempt. Get rid of all your worries now and find the details regarding the syllabus, study guide, practice tests, books, and study materials in one place. Through the SPLK-4001 certification preparation, you can learn more on the Splunk O11y Cloud Certified Metrics User, and getting the Splunk O11y Cloud Certified Metrics User certification gets easy.

P.S. Free 2025 Splunk SPLK-4001 dumps are available on Google Drive shared by DumpsActual: [https://drive.google.com/open?id=1-J\\_c543HhCPVOWiYZwFP13dAa9w3jIK0](https://drive.google.com/open?id=1-J_c543HhCPVOWiYZwFP13dAa9w3jIK0)

The pass rate is 98.65% for SPLK-4001 study guide, and you can pass the exam just one time. In order to build up your confidence for the exam, we are pass guarantee and money back guarantee. If you fail to pass the exam by using SPLK-4001 exam braindumps of us, we will give you full refund. Besides, SPLK-4001 learning materials are edited and verified by professional specialists, and therefore the quality can be guaranteed, and you can use them at ease. We have online and offline service. If you have any questions for SPLK-4001 Exam Materials, you can consult us, and we will give you reply as quick as possible.

There is a group of experts in our company which is especially in charge of compiling our SPLK-4001 exam engine. There is no doubt that we will never miss any key points in our SPLK-4001 training materials. As it has been proven by our customers that with the help of our SPLK-4001 Test Prep you can pass the exam as well as getting the related SPLK-4001 certification only after 20 to 30 hours' preparation, which means you can only spend the minimum of time and efforts to get the maximum rewards.

## SPLK-4001 Online Version - SPLK-4001 Test Discount Voucher

Trying before buying SPLK-4001 exam braindumps can help you have a deeper understanding of what you are going to buy. We offer you free demo for you to have a try, and you can know what the complete version is like through the free demo. Moreover, SPLK-4001 exam braindumps are high quality and accuracy, and you can use them at ease. We have online and offline service for

you, and they possess the professional knowledge for SPLK-4001 Exam Materials, and if you have any questions, you can contact with us, and we will give you reply as soon as we can.

## Splunk O11y Cloud Certified Metrics User Sample Questions (Q40-Q45):

### NEW QUESTION # 40

A customer is experiencing an issue where their detector is not sending email notifications but is generating alerts within the Splunk Observability UI. Which of the below is the root cause?

- A. The detector has an incorrect signal,
- B. The detector has an incorrect alert rule.
- **C. The detector has a muting rule.**
- D. The detector is disabled.

**Answer: C**

Explanation:

Explanation

The most likely root cause of the issue is D. The detector has a muting rule.

A muting rule is a way to temporarily stop a detector from sending notifications for certain alerts, without disabling the detector or changing its alert conditions. A muting rule can be useful when you want to avoid alert noise during planned maintenance, testing, or other situations where you expect the metrics to deviate from normal. When a detector has a muting rule, it will still generate alerts within the Splunk Observability UI, but it will not send email notifications or any other types of notifications that you have configured for the detector. You can see if a detector has a muting rule by looking at the Muting Rules tab on the detector page. You can also create, edit, or delete muting rules from there. To learn more about how to use muting rules in Splunk Observability Cloud, you can refer to this documentation.

### NEW QUESTION # 41

For a high-resolution metric, what is the highest possible native resolution of the metric?

- A. 2 seconds
- **B. 1 second**
- C. 5 seconds
- D. 15 seconds

**Answer: B**

Explanation:

The correct answer is C. 1 second.

According to the Splunk Test Blueprint - O11y Cloud Metrics User document, one of the metrics concepts that is covered in the exam is data resolution and rollups. Data resolution refers to the granularity of the metric data points, and rollups are the process of aggregating data points over time to reduce the amount of data stored.

The Splunk O11y Cloud Certified Metrics User Track document states that one of the recommended courses for preparing for the exam is Introduction to Splunk Infrastructure Monitoring, which covers the basics of metrics monitoring and visualization.

In the Introduction to Splunk Infrastructure Monitoring course, there is a section on Data Resolution and Rollups, which explains that Splunk Observability Cloud collects high-resolution metrics at 1-second intervals by default, and then applies rollups to reduce the data volume over time. The document also provides a table that shows the different rollup intervals and retention periods for different resolutions.

Therefore, based on these documents, we can conclude that for a high-resolution metric, the highest possible native resolution of the metric is 1 second.

### NEW QUESTION # 42

An SRE creates a new detector to receive an alert when server latency is higher than 260 milliseconds.

Latency below 260 milliseconds is healthy for their service. The SRE creates a New Detector with a Custom Metrics Alert Rule for latency and sets a Static Threshold alert condition at 260ms.

How can the number of alerts be reduced?

- **A. Adjust the Trigger sensitivity. Duration set to 1 minute.**
- B. Adjust the threshold.

- C. Choose another signal.
- D. Adjust the notification sensitivity. Duration set to 1 minute.

**Answer: A**

Explanation:

Explanation

According to the Splunk O11y Cloud Certified Metrics User Track document<sup>1</sup>, trigger sensitivity is a setting that determines how long a signal must remain above or below a threshold before an alert is triggered. By default, trigger sensitivity is set to Immediate, which means that an alert is triggered as soon as the signal crosses the threshold. This can result in a lot of alerts, especially if the signal fluctuates frequently around the threshold value. To reduce the number of alerts, you can adjust the trigger sensitivity to a longer duration, such as 1 minute, 5 minutes, or 15 minutes. This means that an alert is only triggered if the signal stays above or below the threshold for the specified duration. This can help filter out noise and focus on more persistent issues.

### NEW QUESTION # 43

What Pod conditions does the Analyzer panel in Kubernetes Navigator monitor? (select all that apply)

- A. Not Scheduled
- B. Pending
- C. Failed
- D. Unknown

**Answer: A,B,C,D**

Explanation:

The Pod conditions that the Analyzer panel in Kubernetes Navigator monitors are:

Not Scheduled: This condition indicates that the Pod has not been assigned to a Node yet. This could be due to insufficient resources, node affinity, or other scheduling constraints<sup>1</sup> Unknown: This condition indicates that the Pod status could not be obtained or is not known by the system. This could be due to communication errors, node failures, or other unexpected situations<sup>1</sup> Failed: This condition indicates that the Pod has terminated in a failure state. This could be due to errors in the application code, container configuration, or external factors<sup>1</sup> Pending: This condition indicates that the Pod has been accepted by the system, but one or more of its containers has not been created or started yet. This could be due to image pulling, volume mounting, or network issues<sup>1</sup> Therefore, the correct answer is A, B, C, and D.

To learn more about how to use the Analyzer panel in Kubernetes Navigator, you can refer to this documentation<sup>2</sup>.

1: <https://kubernetes.io/docs/concepts/workloads/pods/pod-lifecycle/#pod-phase> 2:

<https://docs.splunk.com/observability/infrastructure/monitor/k8s-nav.html#Analyzer-panel>

### NEW QUESTION # 44

Which of the following is optional, but highly recommended to include in a datapoint?

- A. Metric type
- B. Metric name
- C. Timestamp
- D. Value

**Answer: A**

Explanation:

Explanation

The correct answer is D. Metric type.

A metric type is an optional, but highly recommended field that specifies the kind of measurement that a datapoint represents. For example, a metric type can be gauge, counter, cumulative counter, or histogram. A metric type helps Splunk Observability Cloud to interpret and display the data correctly<sup>1</sup> To learn more about how to send metrics to Splunk Observability Cloud, you can refer to this documentation<sup>2</sup>.

1: <https://docs.splunk.com/observability/gdi/metrics/metrics.html#Metric-types> 2:
