## AVIXA Certified Technology Specialist Sample Questions (Q68-Q73):

### NEW QUESTION # 68

In the scope of work (SOW), an interface is described as being installed in the lectern. While the work is underway onsite, the client asks for the interface to be moved to a table next to the lectern. What is the proper response from the technician?

- A. Advise the project manager of the request.
- B. Follow the direction of the client and advise the project manager of the change.
- C. Follow the direction of the client, making a note in the job diary.
- D. Advise the client that moving the interface is out of the scope and install the interface in the lectern.

**Answer: A**

Explanation:

If a client requests a change to the scope of work, such as relocating equipment, the technician should advise the project manager. This ensures that the request is documented and assessed for impact on the project scope, budget, and timeline, maintaining proper project management protocols.

CTS Technology Specialist Reference

According to CTS standards, scope changes should be communicated to project management to ensure appropriate adjustments and approvals are made.

### NEW QUESTION # 69

In sound, amplitude is perceived as

- A. frequency
- B. **loudness**
- C. pitch
- D. tone

#### Answer: B

Explanation:

Amplitude refers to the strength or intensity of a sound wave and is directly related to how loud the sound is perceived. The greater the amplitude, the louder the sound. Pitch (Option A) relates to frequency, not amplitude, while tone (Option B) is more about the quality or character of sound. Frequency (Option D) determines the pitch, not the loudness.

### NEW QUESTION # 70

What would be the BEST way to verify proper performance of a CAT cable fitted with a new termination?

- A. connect the cable to a reference unit to check against it
- B. **use a cable tester and run a protocol**
- C. use a multimeter to test if the pins have a connection
- D. connect the source and sync, then verify there is a picture

#### Answer: B

Explanation:

Using a cable tester and running a protocol is the best way to verify the proper performance of a CAT cable with a new termination. Cable testers can check for continuity, wiring configuration, signal quality, and performance standards compliance (e.g., Cat 5e, Cat 6). They can detect faults such as open circuits, short circuits, and incorrect wiring, ensuring the cable is terminated correctly and capable of supporting the desired network speeds and protocols.

### NEW QUESTION # 71

When planning video content with a client, it is important to get their Pantone data (PMS) to ensure

- A. the displayed type face is the correct size and style.
- B. **the displayed colors match printed colors.**
- C. the displayed logo is the proper size and style.
- D. their confidence monitor size is large enough.

#### Answer: B

Explanation:

Pantone data (PMS) is used to ensure color consistency between digital displays and printed materials. This is critical in branding to maintain accurate color representation across different mediums, particularly for logos and brand colors.

CTS Technology Specialist Reference

CTS guidelines on content creation emphasize color matching as a key consideration for client branding, often involving Pantone color standards to achieve consistency.

### NEW QUESTION # 72

What is a MAIN benefit of an externally managed AV/IT service?

- A. on-demand availability of computer system resources

- B. reduce costs for business-software
- C. cost reduction in operations through clear responsibilities
- D. complete outsourcing of the AV/IT department

**Answer: C**
