More importantly, we provide all people with the trial demo for free before you buy our C_ACDET_2506 Exam Torrent and it means that you have the chance to download from our web page for free; you do not need to spend any money.

SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite Sample Questions (Q23-Q28):

NEW QUESTION # 23

During a Bluefield migration, you discover missing flex master data templates. What do you do?

- A. Rebuild them manually in production
- B. Defer to post-go-live
- C. Ignore them
- D. Use reporting workaround

Answer: A

Explanation:

In a Bluefield deployment scenario, SAP Ariba requires that all Flex Master Data (FMD) templates and their associated data be present in the Production environment before migrating related configuration elements. If you find missing FMD templates during migration, the recommended approach is to manually recreate the missing templates in Production and load the relevant data. This is essential to maintain integrity because many custom fields depend on these templates, and missing templates can cause migration failures or broken references. Deferring or ignoring the issue risks operational disruptions and data inconsistencies. Reporting workarounds do not address template dependencies and therefore are ineffective. This aligns with SAP's guidance on master data migration within Bluefield scenarios to ensure successful, error-free deployments.

NEW QUESTION # 24

What is the key role of the SAP Deployment Lead assigned to the project?

- A. To advise the customer and partner in solution configurations
- **B. To act as the liaison between the customer and SAP Support in resolving technical issues and manage customer escalations**
- C. To perform configuration changes required to the SAP Ariba Strategic Sourcing suite solutions
- D. To test and validate the solution prior to go-live

Answer: B

Explanation:

The SAP Deployment Lead acts as the primary liaison between the customer and SAP Support, managing technical issues, escalations, and coordination during the deployment lifecycle. They oversee environment readiness, migration activities, and issue resolution. Advising on configurations is typically the Functional Lead's role, configuration changes are done by consultants, and testing is led by the customer or testing teams. The Deployment Lead focuses on technical project management and communication.

NEW QUESTION # 25

You need to revise a published form template.

What steps do you follow?

- **A. Create a new version, edit, test, and publish**
- B. Edit directly in production
- C. Clone and change ID
- D. Delete and recreate

Answer: A

NEW QUESTION # 26

A standard field is not available in reporting. A Greenfield customer needs to be able to report on the data captured in that standard field. How can this be achieved?

- A. Under Field Configurations, search for the field in the appropriate class, mark the field reportable, save and publish.
- B. The system makes all fields reportable after a system refresh.
- **C. Create a custom field that can be marked reportable, default the custom field to the standard field value, publish, and then pull the field into reporting.**
- D. All standard fields are reportable by default.

Answer: C

Explanation:

Some standard fields in SAP Ariba are not reportable by design and cannot be made reportable through configuration changes. The recommended workaround is to create a custom field that is marked as reportable, then set its default value to the standard field's value using an expression. Once published, this custom field can be included in reports, effectively surfacing the data previously inaccessible for reporting. System refreshes do not convert non-reportable standard fields to reportable. Marking the original standard field as reportable is not possible if the option is disabled by design.

NEW QUESTION # 27

A French translation of a custom field label needs to be updated.
Where do you update it?

- A. Layout tab
- B. Customization Manager → Views
- **C. AML & Translations Upload**
- D. Field Configuration Label

Answer: C

NEW QUESTION # 28
