## AD0-E725 Detailed Study Dumps - Reliable AD0-E725 Test Camp

As we entered into such a web world, cable network or wireless network has been widely spread. That is to say, it is easier to find an online environment to do your practices. This version of AD0-E725 test prep can be used on any device installed with web browsers. We specially provide a timed programming test in this online test engine, and help you build up confidence in a timed

exam. With limited time, you need to finish your task in AD0-E725 Quiz guide and avoid making mistakes, so, considering your precious time, we also suggest this version that can help you find out your problems immediately after your accomplishment.

## Adobe Commerce Developer Expert Sample Questions (Q41-Q46):

### NEW QUESTION # 41

A Developer applies multiple quality patches to an Adobe Commerce Cloud store. After deployment, the Developer discovers that one of the patches is causing issues.

What is the correct procedure to safely remove or revert the problematic quality patch?

- A. Delete the quality patch from the file `magento.env.yaml`.
- B. Execute command in `magento-cloud`:  
`./vendor/bin/ece-patches revert <patch-id>`
- C. Delete the quality patch from the file `magento.app.yaml`.

**Answer: B**

Explanation:

The Quality Patches Tool (QPT) in Adobe Commerce Cloud provides a way to apply and revert patches. To safely remove a problematic patch, run:

```
/vendor/bin/ece-patches revert <patch-id>
```

This ensures that the patch is properly removed without affecting other applied patches.

A and C are incorrect because patches are not managed via YAML config files.

Reference:

Adobe Commerce Cloud DevDocs - Quality Patches Tool

### NEW QUESTION # 42

A Developer is writing an integration test. The particular functionality being tested has many admin area configurations that need to be tested.

Which DocBlock annotation should be used to allow configuration settings to be manipulated for testing purposes?

- A. `@testAdminArea`
- B. `@testAdminConfigFixture`
- C. `@testConfigFixture`

**Answer: C**

### NEW QUESTION # 43

A client uses a straightforward custom payment method which allows a pre-generated code to be used as payment. The code is provided directly to customers through email and other communications. The client reports a problem with someone fraudulently guessing the codes correctly. They want to implement an API check that ensures the code exists in their system when the code is applied.

Where should the Developer add this change?

- A. Create a custom validator that will check for this code at the time the order is placed.
- B. Create an after plugin on the `canAuthorize` method and implement the API check there.
- C. Create a before plugin on the `canCapture` method and implement the API check there.

**Answer: A**

Explanation:

The correct approach is to implement a custom payment validator. Validators ensure that the payment method data is validated at the checkout process, before the order is placed.

A (`canCapture`) is used for payment capture operations, not code validation.

C (`canAuthorize`) is used for authorization checks, but not the correct place for validating custom input codes.

B is correct because validators run at checkout, ensuring only valid codes are accepted.

Reference:

Adobe Commerce DevDocs - Custom payment method validators

#### NEW QUESTION # 44

A Developer needs to replicate a recent issue that occurred in the staging environment so it can be tested locally. The Developer decides to dump the staging database and import it into the local setup. Which command should the Developer use to do this?

- A. `vendor/bin/ece-tools db-dump`
- B. `vendor/bin/ece-tools db-snapshot`
- C. `magento-cloud snapshot:db-dump`

**Answer: A**

Explanation:

The correct way to dump a database from an Adobe Commerce Cloud environment is with the `vendor/bin/ece-tools db-dump` command.

A (`db-snapshot`) is not a valid `ece-tools` command.

B is incorrect: `magento-cloud snapshot` commands are for managing whole environment snapshots, not direct DB dumps.

C is correct: `ece-tools db-dump` provides the database export for staging/local replication.

Reference:

Adobe Commerce Cloud DevDocs - `ece-tools db-dump`

#### NEW QUESTION # 45

A customer wants their Adobe Commerce Cloud platform to be upgraded to the latest available official version. They would like to assess the compatibility of their current version compared to the upgraded version.

How should the Developer gather this information and compile an upgrade plan for the customer?

- A. Familiarize themselves with the minimum system requirements of Adobe Commerce.
- B. Run the Site-Wide Analysis Tool (SWAT) which provides detailed information on the system.
- C. Run the command `bin/magento upgrade:compatibility:report` to export the needed information.

**Answer: C**

#### NEW QUESTION # 46

.....

If you have some doubts about the accuracy of AD0-E725 top questions. There are free demo of latest exam cram for you to download. Besides, you can free updating Adobe braindumps torrent one-year after you purchase. We adhere to the principle of No Help, Full Refund, if you failed the exam with our AD0-E725 Valid Dumps, we will full refund you.
