PRINCE2 PRINCE2-Agile-Foundation - PRINCE2 Agile Foundation Perfect Pdf Version

As practice makes perfect, we offer three different formats of PRINCE2 PRINCE2-Agile-Foundation exam study material to practice and prepare for the PRINCE2 Agile Foundation (PRINCE2-Agile-Foundation) exam. Our PRINCE2 PRINCE2-Agile-Foundation practice test simulates the real PRINCE2-Agile-Foundation exam and helps applicants kill exam anxiety. These PRINCE2-Agile-Foundation practice exams provide candidates with an accurate assessment of their readiness for the PRINCE2-Agile-Foundation test.

PRINCE2 PRINCE2-Agile-Foundation (PRINCE2 Agile Foundation) Exam is an essential certification for professionals who are involved in project management. It provides a comprehensive understanding of the PRINCE2 Agile methodology, enabling

professionals to manage projects effectively in a fast-paced environment. PRINCE2 Agile Foundation certification is globally recognized and demonstrates the candidate's proficiency in project management, making them a valuable asset to any organization.

PRINCE2 Agile Foundation certification exam is ideal for professionals who want to develop their knowledge and skills in both PRINCE2 and Agile methodologies. PRINCE2 Agile Foundation certification provides a comprehensive understanding of how to apply both methodologies to manage projects effectively. It covers various aspects of project management, such as project planning, risk management, project monitoring, and control.

PRINCE2 Agile Foundation Sample Questions (Q62-Q67):

NEW QUESTION # 62

Which statement about the 'protect the level of quality' target is CORRECT?

- **A. It delivers the early realization of benefits**
- B. It gives confidence on the progress of the project
- C. It is achieved by allowing enough time for testing
- D. It is achieved by using the same team members

Answer: A

Explanation:

NEW QUESTION # 63

What is used to address aspects of project and product development such as problem solving and release planning?

- **A. Agile workshops**
- B. Project log
- C. Agilometer
- D. Delegation matrix

Answer: A

Explanation:

Agile workshops are collaborative sessions used throughout the project to address various aspects such as problem-solving, release planning, team alignment, and continuous improvement. Workshops encourage open communication, collective decision-making, and foster a shared understanding of goals and challenges.

Unlike a delegation matrix, which defines roles and authorities, or the project log, which records issues and risks, workshops are interactive events that enable timely resolution of challenges. The Agilometer is a diagnostic tool assessing agility maturity but not a problem-solving forum.

Agile workshops embody the agile principle of collaboration and adaptability, enabling teams to respond quickly to issues and refine plans collectively.

NEW QUESTION # 64

Which workshop focuses on team growth and improvements in working practices?

- **A. Team retrospective workshop**
- B. Project kickoff workshop
- C. Team planning workshop
- D. Progress review workshop

Answer: A

Explanation:

The Team Retrospective Workshop is explicitly designed to facilitate team growth and continuous improvement in working practices. It is a fundamental agile practice where the team reflects on the recently completed work or sprint to identify what went well, what didn't, and what could be improved. The goal is to foster an environment of trust and openness, enabling teams to discuss challenges and successes honestly.

Retrospectives promote inspect and adapt principles by encouraging teams to continuously evaluate their processes, collaboration, and tools. They help uncover systemic issues, process bottlenecks, or interpersonal challenges that may be impeding productivity or quality. Teams use this feedback to implement actionable improvements, which can range from adjusting communication methods to refining definitions of done or ready.

This workshop supports a key agile mindset-continuous learning and improvement-which directly contributes to team maturity, performance, and morale. Importantly, retrospectives are not about assigning blame but rather about fostering a growth mindset that accepts change as an opportunity to evolve.

While Project Kickoff Workshops (A) initiate project alignment and Progress Review Workshops (C) monitor project status, they do not primarily focus on team process improvements. The Team Planning Workshop (D) is concerned with planning upcoming work, not retrospection.

In PRINCE2 Agile, retrospectives are a critical tool to blend traditional project management with agile principles by promoting regular reflection and incremental enhancements.

NEW QUESTION # 65

Which statement describes the Kanban approach?

- A. It is an iterative timeboxed approach that helps teams generate value
- B. It has defined processes, products and roles used to iteratively deliver outputs using timeboxing
- C. It was originally focused in creating new companies and is now used to speed up product delivery
- **D. It is used to make system improvements using visualization and by controlling work in progress**

Answer: D

NEW QUESTION # 66

Which statement about the 'accept that the customer doesn't need everything' target is correct?

- A. It is achieved by managing the culture of the team carefully
- B. It can result in the early delivery of a minimum viable product
- C. It gives confidence on the progress of the project
- **D. It allows misunderstandings to be dealt with appropriately**

Answer: D
