100% CompTIA DA0-002 Accuracy - DA0-002 Book Pdf

Today, the IT industry is facing fierce competition, you will feel powerless, this is inevitable. All you have to do is to escort your career. Of course, you have many choices. I recommend that you use the Dumpexams CompTIA DA0-002 Exam Questions And Answers, it is a good helper to help your success of IT certification. So what you still waiting for, go to get new Dumpexams CompTIA DA0-002 exam training materials early.

CompTIA Data+ Exam (2025) Sample Questions (Q81-Q86):

NEW QUESTION # 81
Which of the following tables holds relational keys and numeric values?

- A. Fact
- B. Dimensional
- C. Transactional
- D. Graph

Answer: A

Explanation:
This question falls under theData Concepts and Environmentsdomain, focusing on understanding table types in data warehousing.
The task is to identify a table that holds relational keys and numeric values, typically used in a star schema.
* Fact (Option A): Fact tables in a star schema store quantitative data (numeric values, e.g., sales amounts) and foreign keys (relational keys) linking to dimension tables, making this the correct choice.
* Graph (Option B): Graph tables are used in graph databases for relationships (e.g., nodes, edges), not typically for relational keys

and numeric values in a traditional sense.
* Dimensional (Option C): Dimension tables store descriptive attributes (e.g., product names) and primary keys, not typically numeric measures.
* Transactional (Option D): Transactional tables are used in OLTP systems and may contain numeric values, but they're not specifically designed for relational keys in a data warehousing context.
The DA0-002 Data Concepts and Environments domain includes understanding "data schemas and dimensions," and fact tables are designed to hold relational keys and numeric values in a data warehouse.
Reference: CompTIA Data+ DA0-002 Draft Exam Objectives, Domain 1.0 Data Concepts and Environments.

NEW QUESTION # 82

Which of the following allows a data analyst to send out a spreadsheet containing sensitive information without revealing personal details?

- A. Using a UUID in the data file
- B. Redacting all PII
- C. Encrypting the spreadsheet
- D. Adding access controls to the ID column

Answer: B

Explanation:
This question pertains to the Data Governance domain, focusing on data privacy and security. The task is to share a spreadsheet with sensitive information while protecting personal details.
* Using a UUID in the data file (Option A): A UUID (Universally Unique Identifier) can anonymize records, but if other PII (e.g., names) remains, personal details are still exposed.
* Redacting all PII (Option B): Redacting personally identifiable information (PII) removes sensitive details (e.g., names, addresses), ensuring personal information isn't revealed while sharing the spreadsheet.
* Adding access controls to the ID column (Option C): Access controls limit who can view the data, but the question focuses on the spreadsheet content itself, not access.
* Encrypting the spreadsheet (Option D): Encryption protects the file during transmission, but once opened, personal details are still visible unless redacted.
The DA0-002 Data Governance domain includes "data privacy concepts," and redacting PII is the most direct method to protect personal details in a shared spreadsheet.
Reference: CompTIA Data+ DA0-002 Draft Exam Objectives, Domain 5.0 Data Governance.

NEW QUESTION # 83

A company reports on seven years of data in a sales dashboard. The dashboard pulls from a sales database that has 30 years of data. The dashboard performance is slow. Which of the following is the best way to improve the dashboard's performance?

- A. Performing a code review
- B. Adding more RAM and rerunning
- C. Checking network connectivity
- D. Filtering to include only relevant data

Answer: D

Explanation:
This question falls under the Data Governance domain, focusing on optimizing data quality and performance in dashboards. The dashboard is slow because it pulls from a large database (30 years) but only needs seven years of data.
* Performing a code review (Option A): A code review might identify inefficiencies, but it's not the most direct solution for this scenario.
* Checking network connectivity (Option B): Network issues might cause delays, but the primary issue is the data volume, not connectivity.
* Filtering to include only relevant data (Option C): Filtering the data to include only the last seven years reduces the dataset size, directly improving performance by minimizing the data processed.
* Adding more RAM and rerunning (Option D): Adding RAM might help, but it's a hardware solution that doesn't address the root cause of excessive data.
The DA0-002 Data Governance domain includes "data quality control concepts," such as optimizing performance by filtering data to improve efficiency.

Reference: CompTIA Data+ DA0-002 Draft Exam Objectives, Domain 5.0 Data Governance.

NEW QUESTION # 84

An analyst must use the same data to create reports for police patrol supervisors, the city council, and a public website. Which of the following is the best way to differentiate the reports?

- A. Sensitivity
- B. Detail levels
- C. Persona type
- D. Accessibility

Answer: C

Explanation:
This question falls under the Visualization and Reporting domain, focusing on tailoring reports for different audiences. The same data is used for three distinct groups (supervisors, city council, public), requiring differentiation.
* Persona type (Option A): Persona types define the audience's needs and preferences (e.g., supervisors need operational details, the city council needs summaries, the public needs simplified data), making this the best way to differentiate the reports.
* Detail levels (Option B): Detail levels are a result of persona types, not the method of differentiation.
* Accessibility (Option C): Accessibility ensures access for all users (e.g., screen readers), but it's not the primary way to differentiate content.
* Sensitivity (Option D): Sensitivity determines data access (e.g., confidential vs. public), but the scenario implies all reports use the same data, just presented differently.
The DA0-002 Visualization and Reporting domain emphasizes "translating business requirements to form the appropriate visualization," and persona types guide report differentiation for diverse audiences.
Reference: CompTIA Data+ DA0-002 Draft Exam Objectives, Domain 4.0 Visualization and Reporting.

NEW QUESTION # 85

Which of the following best describes a characteristic of a Boolean?

- A. Must be two values only
- B. Must be numeric
- C. Must be system-created
- D. Must be a character

Answer: A

NEW QUESTION # 86

......

As we discussed above that the CompTIA Data+ Exam (2025) (DA0-002) exam preparation material is available in three different formats. One of them is CompTIA DA0-002 PDF questions format which is portable. Users of this format can print CompTIA Data+ Exam (2025) (DA0-002) real exam questions in this file to study without accessing any device. Furthermore, smart devices like laptops, smartphones, and tablets support the DA0-002 PDF Questions. Hence, you can carry this material to any place and revise DA0-002 exam questions conveniently without time restrictions.
