Fast Download Test Sharing-and-Visibility-Architect Objectives Pdf – The Best Test Quiz for Sharing-and-Visibility-Architect - Reliable Free Sharing-and-Visibility-Architect Vce Dumps

In reaction to the phenomenon, therefore, the Sharing-and-Visibility-Architect test material is reasonable arrangement each time the user study time, as far as possible let users avoid using our latest Sharing-and-Visibility-Architect exam torrent for a long period of time, it can better let the user attention relatively concentrated time efficient learning. The Sharing-and-Visibility-Architect practice materials in every time users need to master the knowledge, as long as the user can complete the learning task in this period, the Sharing-and-Visibility-Architect test material will automatically quit learning system, to alert users to take a break, get ready for the next period of study.

Salesforce Certified Sharing and Visibility Architect Sample Questions (Q41-

Q46):

NEW QUESTION # 41

Universal Containers is implementing a community of High-Volume Community users. Community users should be able to see records associated to their Account or Contact record. The Architect is planning to use a Sharing Set to provide access to the records. When setting up the Sharing Set, certain objects are not available in the list of Available Objects. Which two reasons explain why an object is excluded from the list of Available Objects in a Sharing Set?

- A. The object is a custom object, and therefore not available for a sharing set.
- B. The object's Organization-Wide sharing setting is set to Public Read/Write.
- C. The custom object does not have a lookup to Accounts or Contacts.
- D. The object's Organization-Wide sharing setting is set to Private.

Answer: B,C

Explanation:

Explanation

Two reasons why an object is excluded from the list of available objects in a sharing set are that the object's organization-wide sharing setting is set to public read/write, or that the custom object does not have a lookup to accounts or contacts. A sharing set is used to grant access to records based on a user's account or contact, and it only works for objects that have private or public read only sharing settings. Custom objects are available for a sharing set if they have a lookup to accounts or contacts

NEW QUESTION # 42

If OWD is Public Read Only, what are sharing access options

- A. Read, - Read/Write

Answer: A

NEW QUESTION # 43

Mary is Joe's manager in the Role Hierarchy. The organization-wide default for a custom Invoice object is Public Read-Only, and Mary's profile is not granted the Read permission for the Invoice object.

Which action can Mary take on Joe's invoice records?

- A. View Only
- B. None
- C. Read/Write

Answer: B

Explanation:

Even though Mary is Joe's manager in the Role Hierarchy, the lack of Read permission for the Invoice object on Mary's profile prevents her from viewing Joe's invoice records. Salesforce enforces object-level permissions, which override sharing rules, OWD settings, and role hierarchy. Without the Read permission on the Invoice object, Mary cannot access the records, even with Public Read-Only OWD or Role Hierarchy privileges.

* Role Hierarchy and Object Permissions

NEW QUESTION # 44

Besides their own team accounts, sales managers at Universal Containers need to have READ access to all accounts of the same segment in other countries. Role hierarchy was implemented accordingly (based on countries), but a sales manager in the US is complaining that he cannot view account records of the same segment in Canada. What should be done to grant access in a proper way?

- A. Create criteria-based sharing rules to grant access to account records that have the same segment to all sales manager roles.
- B. Create an owner-based sharing rule to grant access to account records that have the same segment to all sales manager

roles.

- C. Change the role hierarchy and put all of the sales managers in the US and Canada in the same role.
- D. Create a public group and include all accounts of the same segment and grant access through a permission set.

Answer: B

Explanation:

An Owner-Based Sharing Rule An owner-based sharing rule opens access to records owned by certain users. For example, a company's sales managers need to see opportunities owned by sales managers in a different region. The U.S. sales manager could give the APAC sales manager access to the opportunities owned by the U.S. team using owner-based sharing.
