

Exam OGEA-101 Outline | Test OGEA-101 Discount Voucher

2025 Latest Braindumpsqa OGEA-101 PDF Dumps and OGEA-101 Exam Engine Free Share: <https://drive.google.com/open?id=1ie3DJm27JfyEq9AcXBk8lNc5lpgGV3T->

We provide you the free download and tryout of our OGEA-101 study tool before your purchase our product and we provide the demo of the product to let the client know our product fully. After you visit the pages of our OGEA-101 test torrent on the websites, you can know the characteristics and merits of the OGEA-101 Guide Torrent. In the pages of our product on the website, you can find the details and guarantee and the contact method, the evaluations of the client on our OGEA-101 test torrent and other information about our OGEA-101 exam questions. So it is very convenient for you.

The Open Group OGEA-101 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Business Architecture: This topic of The Open Group OGEA-101 exam emphasizes the development of business architecture, including baseline and target architectures. It measures the understanding of TOGAF practitioners about business capabilities and processes.
Topic 2	<ul style="list-style-type: none"> ADM Phase Requirements: This topic of the TOGAF Enterprise Architecture Part 1 exam focuses on the specific requirements for each ADM phase, including stakeholder identification and architecture scope definition. It measures the ability of aspiring TOGAF Practitioner to apply these requirements in real-world scenarios.
Topic 3	<ul style="list-style-type: none"> Architecture Governance: This topic of The Open Group OGEA-101 exam covers the governance framework and responsibilities of architecture boards. It evaluates the skills of TOGAF practitioners in establishing governance structures.
Topic 4	<ul style="list-style-type: none"> Introduction to the Architecture Development Method (ADM): The ADM is central to TOGAF, outlining a structured approach to developing and managing enterprise architecture. This section assesses comprehension of TOGAF practitioners about the ADM phases and their application, ensuring they grasp the method's iterative nature, which is vital for the OGEA-101 Exam.
Topic 5	<ul style="list-style-type: none"> Implementation Governance: This topic of The Open Group OGEA-101 exam emphasizes the governance framework for architecture implementation, including compliance processes. It measures the understanding of TOGAF practitioners about governance principles, a key competency for the OGEA-101 exam.

Test OGEA-101 Discount Voucher - Certification OGEA-101 Exam Cost

In recent years, some changes are taking place in this line about the new points are being constantly tested in the TOGAF Enterprise Architecture Part 1 Exam real exam. So our experts highlight the new type of OGEA-101 questions and add updates into the practice materials, and look for shifts closely when they take place. As to the rapid changes happened in this OGEA-101 Exam, experts will fix them and we assure your OGEA-101 exam simulation you are looking at now are the newest version. And we only sell the latest OGEA-101 exam questions and answers.

The Open Group TOGAF Enterprise Architecture Part 1 Exam Sample Questions (Q55-Q60):

NEW QUESTION # 55

The _____ ensures that a project transitioning into implementation also smoothly transitions into appropriate Architecture Governance.

- A. Implementation Strategy
- B. Transition Plan
- **C. Implementation Governance Model**
- D. Migration Plan

Answer: C

Explanation:

The Implementation Governance Model is a framework that defines the roles, responsibilities, processes, and standards for governing the implementation of the target architecture. It ensures that a project transitioning into implementation also smoothly transitions into appropriate Architecture Governance, which is the practice of ensuring compliance with the enterprise architecture and its principles, standards, and goals. The Implementation Governance Model is part of the Implementation and Migration Plan, which is the output of Phase F: Migration Planning of the Architecture Development Method (ADM)¹² References: 1: The TOGAF Standard, Version 9.2, Part II: Architecture Development Method (ADM), Chapter 21: Phase F: Migration Planning 2: The TOGAF Standard, Version 9.2, Part VI: Architecture Capability Framework, Chapter 50: Architecture Governance

NEW QUESTION # 56

Which of the following describes how the Enterprise Continuum is used when developing an enterprise architecture?

- A. To coordinate with the other management frameworks in use
- B. To identify and understand business requirements
- C. To classify architecture and solution assets
- D. To describe how an architecture addresses stakeholder concerns

Answer: C

Explanation:

The Enterprise Continuum consists of two complementary concepts: the Architecture Continuum and the Solutions Continuum¹. The Architecture Continuum provides a consistent way to describe and understand the generic and reusable architecture building blocks, such as models, patterns, and standards, that can be applied and tailored to specific situations². The Solutions Continuum provides a consistent way to describe and understand the specific and implemented solution building blocks, such as products, services, and components, that realize the architecture building blocks³. The Enterprise Continuum enables the reuse and integration of architecture and solution assets across different levels of abstraction, scope, and detail, ranging from foundation architectures to organization-specific architectures¹.

The Enterprise Continuum is used when developing an enterprise architecture to support the following activities¹:

- *Selecting relevant architecture and solution assets from the Architecture Repository or other sources, based on the business drivers, goals, and requirements
 - *Adapting and customizing the architecture and solution assets to suit the specific needs and context of the enterprise
 - *Defining and developing the target architecture and the architecture roadmap, based on the gaps and opportunities identified between the baseline and the target states
 - *Defining and developing the implementation and migration plan, based on the architecture roadmap and the solution building blocks
 - *Governing and managing the architecture and solution assets throughout the architecture lifecycle, ensuring their quality, consistency, and compliance
- References: 1: The TOGAF Standard, Version 9.2 - Enterprise Continuum 2: The TOGAF Standard, Version 9.2 - Architecture Continuum 3: The TOGAF Standard, Version 9.2 - Solutions Continuum

NEW QUESTION # 57

Complete the following sentence. In the ADM, documents which are under development and have not undergone any formal review and approval process are _____

- A. known as "Version 0.1"
- B. called "draft"
- C. invalid
- D. in between phases

Answer: B

NEW QUESTION # 58

Which ADM Phase includes initial implementation planning?

- A. Phase H
- B. Phase A
- C. Preliminary
- D. Phase E

Answer: D

Explanation:

In TOGAF, Phase E (Opportunities & Solutions) is the first phase that transitions from architecture models into actionable implementation. Within Phase E, architects identify candidate implementation projects or work packages, assess dependencies, cost/benefit, constraints, and derive a high-level implementation and migration strategy and initial plans. That means the first planning around how to carry out the architecture begins in Phase E. Later phases refine and govern the implementation (e.g. in Phase F and G), but the initial planning belongs in Phase E. Thus Phase E includes the initial implementation planning.

What should be put in place through organization structures, roles, responsibilities, skills and processes to carry out architectural activity effectively?

- Answer: D**

An EA Capability is the ability of an organization to perform enterprise architecture effectively and efficiently. It involves establishing and maintaining the appropriate organization structures, roles, responsibilities, skills, processes, tools, and governance mechanisms to support the development and use of enterprise architecture. An EA Capability enables the organization to align its business and IT strategies, deliver value from its investments, manage change and complexity, and improve its performance and agility¹²
