Platform-App-Builder Exam can be taken either online or at a physical testing center. Salesforce Certified Platform App Builder certification is valid for three years, after which the individual needs to retake the exam to maintain their certification status.

Salesforce Certified Platform App Builder Sample Questions (Q178-Q183):

NEW QUESTION # 178

An app builder wants to create a new field using Schema Builder.
Who will get access to the new field by default?

- A. Internal profiles
- B. No profiles

- C. Standard profiles
- **D. All profiles**

Answer: D

Explanation:

Explanation

All profiles will get access to the new field by default when it is created using Schema Builder. The app builder can modify the field-level security settings later to restrict access for certain profiles. Standard profiles, no profiles, and internal profiles are not correct options.

NEW QUESTION # 179

Cloud Kicks works on an annual subscription model. When a sales rep marks an opportunity as closed won, a new opportunity should automatically be created for the renewal. The contracts team works outside of Salesforce but also needs to be notified about closed deals in order to initiate the contract process with the customer.

Which automation solution would meet these requirements?

- A. Validation Rule
- B. Workflow Rule
- C. Approval Process
- **D. Process Builder**

Answer: D

NEW QUESTION # 180

Which opportunity standard field is available to be configured directly? Choose3

- **A. Type**
- B. Forecast category
- **C. Lead source**
- **D. Stage**

Answer: A,C,D

Explanation:

The opportunity standard fields that are available to be configured directly are Stage, Lead Source, and Type. These fields can be modified by editing their picklist values, adding or removing values, or changing their default values. Option A is incorrect because Forecast Category is not a standard field on the opportunity object, but rather a system field that is automatically derived from the Stage field.

NEW QUESTION # 181

The app builder at AW Computing has been asked to track the number of times a case has been reopened.

Which solution should the app builder utilize to help with this request?

- A. Screw flow
- B. Process Builder
- C. Apex Trigger
- **D. Scheduled Triggered flow**

Answer: D

Explanation:

A Scheduled Triggered flow can be used to increment a custom field on the Case object each time the case is reopened, effectively tracking the number of reopenings.
