- A. Only the physical dimensions of new hardware
- B. The color scheme of existing hardware
- C. The compatibility of hardware and software components
- D. The age of the existing hardware

Answer: C

NEW QUESTION # 55

Your customer wants to add a second HPE Synergy frame to an existing logical enclosure Based on a single HPE Synergy frame. The customer wants to use a highly available master setup.

Which procedures should be performed during the expansion process? (Select two.)

- A. Create a new logical interconnect group and enclosure group for two frames setup
- B. Modify an existing logical interconnect to include second HPE Synergy frame.
- C. Re-parent an existing enclosure group to the new logical interconnect group.
- D. Move one of the master modules to the appropriate interconnect bay in the second frame.
- E. Create a new logical enclosure based on both HPE Synergy frames.

Answer: B,D

Explanation:

To expand an existing logical enclosure based on a single HPE Synergy frame to include a second frame and ensure a highly available master setup, the following steps should be performed:

- * Modify an existing logical interconnect to include the second HPE Synergy frame: This step involves updating the logical interconnect configuration to encompass the new frame, ensuring network connectivity and consistency across both frames.
- * Move one of the master modules to the appropriate interconnect bay in the second frame: To achieve a highly available master setup, one of the master modules should be relocated to the second frame, providing redundancy and high availability for the management components.
