## APMG-International Agile Project Management (AgilePM) Foundation Exam Sample Questions (Q136-Q141):

### NEW QUESTION # 136

How does DSDM differ from most other Agile approaches?

- A. It focuses on the development of products
- **B. It focuses on the entire project lifecycle**
- C. It focuses on the delivery of products
- D. It focuses on the collaborative working of teams

**Answer: B**

Explanation:

DSDM differs from most other Agile approaches because it focuses on the entire project lifecycle<sup>456</sup>. This includes pre-project, feasibility, foundations, development, and deployment phases, ensuring a comprehensive approach to project management.

#### NEW QUESTION # 137

What DSDM product describes how the benefits have actually accrued following a period in live operation?

- A. Project Review Report
- B. Delivery Plan
- **C. Benefits Assessment**
- D. Prioritized Requirement List

**Answer: C**

Explanation:

The DSDM product that describes how the benefits have actually accrued following a period in live operation is the Benefits Assessment<sup>3</sup>. This product is used to assess the actual benefits realized after the solution has been in use<sup>3</sup>.

#### NEW QUESTION # 138

How does DSDM differ from most other Agile approaches?

- A. It focuses on the development of products
- **B. It focuses on the entire project lifecycle**
- C. It focuses on the delivery of products
- D. It focuses on the collaborative working of teams

**Answer: B**

#### NEW QUESTION # 139

Where information is constantly changing, which of the following would typically be the least effective way to communicate it?

- **A. Written document**
- B. Email
- C. Teleconference
- D. Video conference

**Answer: A**

Explanation:

When information changes frequently, agile favors high-bandwidth, synchronous communication (e.g., video/teleconferences, facilitated sessions) that enables rapid clarification, shared understanding, and immediate adjustment. Static written documents become quickly outdated, encourage lag between change and consumption, and invite misinterpretation without fast feedback loops. Even email, while asynchronous, can be used for rapid, lightweight updates-but it still lacks the immediacy and richness of dialogue. AgilePM stresses visible progress, collaborative workshops, and frequent reviews to keep everyone aligned as facts evolve. Therefore, in a high-change context, a written document is typically the least effective mechanism to keep stakeholders synchronized, whereas live conversations and demonstrations better support timely inspection and adaptation.

#### NEW QUESTION # 140

Both numerical and subjective methods can build a picture of how effective your change interventions are. Which type of measure can help us to understand why, how, or what happened behind certain behaviors?

- A. Quantitative.
- B. Lagging.
- **C. Qualitative.**

- D. Leading

**Answer: C**

Explanation:

Qualitative Measures: These provide insight into the underlying reasons, motivations, and emotions behind behaviors. Examples include interviews, open-ended surveys, and focus groups.

Other Options:

B: Quantitative measures focus on numerical data but lack context.

C: Leading indicators predict future performance but don't explain behavior.

D: Lagging indicators reflect past performance, not the reasons behind it.
