

Top Fortinet NSE7_SSE_AD-25 Certification Questions & Authoritative Real4dumps - Leader in Certification Exam Materials

P.S. Free & New NSE7_SSE_AD-25 dumps are available on Google Drive shared by Real4dumps:
<https://drive.google.com/open?id=1hemYeQC4l1imQRGeT9AtbH8f3Z-NmPs>

The Real4dumps is committed to providing the best possible study material to succeed in the Fortinet NSE 7 - FortiSASE 25 Enterprise Administrator (NSE7_SSE_AD-25) exam. With actual PDF questions, customizable practice exams, and 24/7 support, customers can be confident that they are getting the best possible prep material. The Real4dumps NSE7_SSE_AD-25 is an excellent choice for anyone looking to advance their career with the certification. Buy Now.

Highlight a person's learning effect is not enough, because it is difficult to grasp the difficulty of testing, a person cannot be effective information feedback, in order to solve this problem, our NSE7_SSE_AD-25 real exam materials provide a powerful platform for users, allow users to exchange of experience. Here, the all users of our NSE7_SSE_AD-25 learning reference files can through own id to login to the platform, realize the exchange and sharing with other users, even on the platform and more users to become good friends, encourage each other, to deal with the difficulties encountered in the process of preparation each other. Our NSE7_SSE_AD-25 learning reference files not only provide a single learning environment for users, but also create a learning atmosphere like home, where you can learn and communicate easily.

2026 Fortinet High-quality NSE7_SSE_AD-25: Fortinet NSE 7 - FortiSASE 25 Enterprise Administrator Certification Questions

Whether you are a student or a professional who has already taken part in the work, you must feel the pressure of competition now. However, no matter how fierce the competition is, as long as you have the strength, you can certainly stand out. It's not easy to become better. Our NSE7_SSE_AD-25 exam questions can give you some help. After using our NSE7_SSE_AD-25 Study Materials, you can pass the NSE7_SSE_AD-25 exam faster and you can also prove your strength. Of course, our NSE7_SSE_AD-25 study materials can bring you more than that. You will have a brighter future with the help of our NSE7_SSE_AD-25 exam questions.

Fortinet NSE 7 - FortiSASE 25 Enterprise Administrator Sample Questions (Q66-Q71):

NEW QUESTION # 66

Refer to the exhibits.

Jumpbox and Windows-AD are endpoints from the same remote location. Jumpbox can access the internet through FortiSASE, while Windows-AD can no longer access the internet. Based on the information in the exhibits, which reason explains the outage on Windows-AD? (Choose one answer)

- A. The FortiClient version installed on Windows-AD does not match the expected version on FortiSASE.
- **B. The device security posture for Windows-AD has changed.**
- C. The remote VPN user on Windows-AD no longer matches any VPN policy.
- D. Windows-AD is excluded from FortiSASE management.

Answer: B

Explanation:

In FortiSASE, Zero Trust Network Access (ZTNA) tags-also known as security posture tags-are used to dynamically grant or deny access based on the real-time security state of an endpoint. This mechanism ensures that only devices meeting specific compliance requirements can access protected resources or the internet.

* Endpoint Analysis: The Managed Endpoints exhibit shows that while Jumpbox only has the FortiSASE-Compliant tag, the Windows-AD endpoint has been assigned both FortiSASE-Compliant and FortiSASE-Non-Compliant tags. This indicates that a security posture check on the Windows-AD device has failed, triggering a rule that applies the non-compliant tag.

* Policy Evaluation: The Secure Internet Access Policy table shows two custom policies. The first policy, named Non-compliant, uses the FortiSASE-Non-Compliant tag as its source and has the action set to Deny. The second policy, Web Traffic, allows access for FortiSASE-Compliant users.

* Root Cause of Outage: Because FortiSASE (powered by FortiOS) processes security policies in a top- down sequence, the "Non-compliant" policy is evaluated first. Since Windows-AD matches the source criteria for this "Deny" policy, its traffic is blocked before it can reach the "Accept" policy.

Although the exhibit shows a warning icon for the FortiClient version on Windows-AD, the direct cause of the internet outage is the explicit Deny policy triggered by the change in the device's security posture (the application of the Non-Compliant tag).

NEW QUESTION # 67

Refer to the exhibits. A FortiSASE administrator has configured FortiSASE as a spoke to a FortiGate hub. The tunnel is up to the FortiGate hub. However, the remote FortiClient is not able to access the web server hosted behind the FortiGate hub.

Based on the exhibits, what is the reason for the access failure?

□

- A. The hub firewall policy does not include the FortiClient address range.
- **B. The server subnet BGP route was not received on FortiSASE.**
- C. A private access policy has denied the traffic because of failed compliance
- D. The hub is not advertising the required routes.

Answer: B

Explanation:

The FortiSASE BGP learned routes do not include the 10.160.160.0/24 subnet (server network).

Although the FortiGate hub is advertising this route (10.160.160.0/24) to FortiSASE, it is not visible in the FortiSASE BGP route table - indicating a routing issue. Without this route, FortiSASE cannot forward traffic from FortiClient to the server.

NEW QUESTION # 68

When accessing the FortiSASE portal for the first time, an administrator must select data center locations for which three FortiSASE components? (Choose three.)

- A. Authentication
- **B. Points of presence**
- **C. Logging**
- D. SD-WAN hub

- E. Endpoint management

Answer: B,C,E

Explanation:

When accessing the FortiSASE portal for the first time, an administrator must select data center locations for the following FortiSASE components:

* Endpoint Management:

* The data center location for endpoint management ensures that endpoint data and policies are managed and stored within the chosen geographical region.

* Points of Presence (PoPs):

* Points of Presence (PoPs) are the locations where FortiSASE services are delivered to users.

Selecting PoP locations ensures optimal performance and connectivity for users based on their geographical distribution.

* Logging:

* The data center location for logging determines where log data is stored and managed. This is crucial for compliance and regulatory requirements, as well as for efficient log analysis and reporting.

References:

FortiSASE 23.2 Documentation: Explains the importance of selecting data center locations for various FortiSASE components.

NEW QUESTION # 69

Which service is included in a secure access service edge (SASE) solution, but not in a security service edge (SSE) solution?

- A. CASB
- B. SWG
- C. SD-WAN
- D. ZTNA

Answer: C

Explanation:

SD-WAN is a networking component included in a SASE solution but not in an SSE solution. SSE focuses solely on security services (like ZTNA, SWG, and CASB), while SASE combines both networking (e.g., SD-WAN) and security into a unified cloud-delivered service.

NEW QUESTION # 70

Refer to the exhibit.

Which type of information or actions are available to a FortiSASE administrator from the following output?

(Choose one answer)

- A. Administrators can view and configure endpoint profiles and ZTNA tags.
- B. Administrators can view application details, such as vendor, version, and installation dates to identify unwanted or outdated software.
- C. Administrators can view and configure automatic patching of endpoints, and first detected date for applications.
- D. Administrators can view latest application version available and push updates to managed endpoints.

Answer: B

Explanation:

The provided exhibit (image_57e69d.jpg) displays the Software Installations dashboard within the FortiSASE portal. This dashboard is a key component of the endpoint visibility and management features provided by the integrated FortiClient EMS functionality.

* Visible Metadata: The output provides a granular list of all software detected on managed endpoints, including the application Name, the Vendor (e.g., Igor Pavlov, Microsoft Corporation, Adobe), the specific Version currently installed, and critical timestamps such as First Detected and Last Installed.

* Administrative Utility: This information allows an administrator to audit the software environment effectively. By reviewing these details, they can identify unwanted software (PUA), shadow IT, or outdated software versions that may possess known vulnerabilities.

* Actions Available: While the primary view is informational, the presence of the View Endpoints button (visible in the top-left)

allows administrators to pivot from a specific application to a list of all individual devices where that software is present, facilitating targeted remediation.

* Analysis of Incorrect Options:

* Option A: While FortiSASE manages profiles and tags, this specific "Software Installations" view is focused purely on software inventory.

* Option B: Although the "First Detected" date is visible, FortiSASE does not support "automatic patching" of third-party software directly from this inventory screen.

* Option C: The dashboard shows what is installed, not the "latest available" version in the market, nor does it provide a mechanism to "push updates" to these third-party applications.

NEW QUESTION # 71

.....

The NSE7_SSE_AD-25 software supports the MS operating system and can simulate the real test environment. In addition, the NSE7_SSE_AD-25 software has a variety of self-learning and self-assessment functions to test learning outcome, which will help you increase confidence to pass exam. The contents of the three versions are the same. Each of them neither limits the number of devices used or the number of users at the same time. You can choose according to your needs. NSE7_SSE_AD-25 Study Materials provide 365 days of free updates, you do not have to worry about what you missed.
