ServiceNow Certified Implementation Specialist - Strategic Portfolio Management 認定 CIS-SPM 試験問題 (Q104-Q109):

質問 # 104

On the demand form, what does the Discount Rate impact?

- A. Financial Benefit.
- B. Net Present Value (NPV).
- C. ROI.
- D. Internal Rate of Return %.

正解: B

解説:

According to the ServiceNow documentation¹, the discount rate on the demand form impacts the net present value (NPV) of the demand. The NPV is the difference between the present value of the benefits and the present value of the costs of the demand. The discount rate is the rate used to discount future cash flows to their present value. A higher discount rate means that future cash flows are worth less in the present, and vice versa. The other options are incorrect because:

A . ROI: The ROI (return on investment) is the ratio of the net value to the estimated cost of the demand. The discount rate does not affect the ROI, as both the net value and the estimated cost are based on the present value of the cash flows².

C . Financial Benefit: The financial benefit is the sum of the present value of the benefits of the demand. The discount rate does not affect the financial benefit directly, but only indirectly through the NPV calculation³.

D . Internal Rate of Return %: The internal rate of return % (IRR) is the discount rate that makes the NPV of the demand equal to zero. The discount rate does not affect the IRR, but rather the IRR is derived from the NPV equation⁴.

質問 # 105

Which artifacts can be linked to either a program, a portfolio, both, or neither?

Choose 2 answers

- A. Projects
- B. Demands
- C. Operational plans
- D. Test cases
- E. Stories

正解: A、B

質問 # 106

Which table stores daily capacity of a user?

- A. Resource_Allocation_Daily.

- B. User Profile.
- C. Resource_Event.
- **D. Resource,Aggregate_Daily.**

正解: D

質問 # 107

In order to map custom fields from Microsoft Project to ServiceNow when importing a project, you must first:

- A. Configure the Project form
- B. Export the project to XML format
- C. Import your project
- **D. Create custom fields in your ServiceNow instance**

正解: D

解説:

In order to map custom fields from Microsoft Project to ServiceNow when importing a project, you must first create custom fields in your ServiceNow instance that match the names and data types of the custom fields in Microsoft Project. This will allow you to map the custom fields using a transform map when importing the project. You can find more information about this process in the Product Documentation for ServiceNow.

質問 # 108

Use this table to configure the parameters displayed on a project card on the My Projects Space page of the Project Workspace.

- A. project_template_config
- **B. pm_home_page_config**
- C. pm_project
- D. pm_toplevel_project

正解: B

解説:

According to the ServiceNow documentation¹, the pm_home_page_config table is used to configure the parameters displayed on a project card on the My Projects Space page of the Project Workspace. The other tables are used for different purposes:

pm_project: Stores information about projects².

pm_toplevel_project: Stores information about top-level projects³.

project_template_config: Stores information about project templates.

質問 # 109
