

# 300-540 Related Exams - High-quality 300-540 Certification Materials and Pass-Sure Designing and Implementing Cisco Service Provider Cloud Network Infrastructure New Braindumps Questions

P.S. Free & New 300-540 dumps are available on Google Drive shared by ValidBraindumps: <https://drive.google.com/open?id=1ftqbgV9nvw5WcmppmM-kaSZD0aWIDYWm5>

300-540 study dumps have a pass rate of 98% to 100% because of the high test hit rate. So our exam materials are not only effective but also useful. If our candidates have other things, time is also very valuable. It is very difficult to take time out to review the 300-540 Exam. But if you use 300-540 exam materials, you will learn very little time and have a high pass rate. Our 300-540 study materials are worthy of your trust.

## Cisco 300-540 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>High Availability: This section of the exam measures the skills of Cloud Infrastructure Architects and covers the design and implementation of redundancy and resiliency mechanisms in virtualized network functions and distributed cloud platforms. It includes data plane redundancy for VNFs, high availability within a single VIM control plane, and resilient compute, vNIC, and top-of-rack switching. The exam requires an understanding of multi-homing, EVLAG configurations, virtual private cloud deployment, and ECMP strategies for NFVI integrations with physical routing protocols such as BGP, OSPF, and IS-IS. Candidates must also recommend suitable high-availability models involving DNS, routing, and load balancing.</li></ul>

Topic 2	<ul style="list-style-type: none"> <li>• <b>Virtualized Architecture:</b> This section of the exam measures the skills of Cloud Network Engineers and covers the foundational concepts of virtualized infrastructures used in modern service provider and cloud environments. Candidates are expected to understand constraints in IaaS designs, determine appropriate cloud service models, and demonstrate awareness of container orchestration compared to traditional virtual machines. The exam also evaluates the ability to implement key virtualization functions such as NFV, VNF, NSO, and virtualized Cisco platforms. Learners must be able to deploy NFV with automation tools, manage VNF onboarding, work with NSO-driven orchestration, and use protocols like NETCONF, RESTCONF, REST APIs, and gNMI within automated cloud ecosystems. A general understanding of supporting platforms such as OpenStack also forms part of the required knowledge in this domain.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>• <b>Security:</b> This section of the exam measures the skills of Network Security Engineers and covers the implementation of infrastructure-level protection in cloud and NFVI ecosystems. It includes topics such as ACLs, uRPF, RTBH, router hardening, BGP flowspec, TACACS, and MACSEC. Candidates should understand DoS mitigation methods and apply security practices within NFVI, focusing on API protection, securing the control and management plane, and segmentation strategies in service provider cloud environments. The domain also evaluates basic knowledge of TLS, mTLS, and general cloud security solutions related to DNS protection, zero-day defenses, and malware detection.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>• <b>Service Assurance and Optimization:</b> This section of the exam measures the skills of Cloud Operations Engineers and covers assurance mechanisms used to maintain performance, stability, and visibility across NFVI environments. It includes network assurance concepts such as MANO frameworks, VNF workload monitoring, VIM control plane KPIs, and streaming telemetry with gRPC and gNMI. Candidates must understand cloud infrastructure performance monitoring tools, including SR-PM, NetFlow, IPFIX, syslog, SNMP traps, RMON, cloud agents, and automated fault management systems. The domain also touches on diagnosing NFVI-related errors and optimizing VNFs using techniques such as SR-IOV and software-accelerated virtual switching technologies like DPDK and VPP.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>• <b>Cloud Interconnect:</b> This section of the exam measures the skills of Service Provider Network Engineers and covers how large networks interconnect with cloud platforms and carrier-neutral facilities. Candidates are expected to understand various connectivity options to cloud providers, customer sites, and other neutral facilities, as well as evaluate WAN connectivity models such as direct connect, MPLS or segment routing, and IPsec VPN links. The domain also includes the ability to troubleshoot advanced data center interconnect solutions, including EVPN VXLAN, EVPN over SR</li> <li>• MPLS, ACI-based connectivity, and pseudowire architectures supporting cloud-to-cloud and cloud-to-edge communication.</li> </ul>

## 300-540 Certification Materials, 300-540 New Braindumps Questions

To help you get the Cisco exam certification, we provide you with the best valid 300-540 pdf prep material. The customizable and intelligence 300-540 test engine will bring you to a high efficiency study way. The 300-540 test engine contains self-assessment features like marks, progress charts, etc. Besides, the Easy-to-use 300-540 layout will facilitate your preparation for 300-540 real test. You can pass your 300-540 certification without too much pressure.

## Cisco Designing and Implementing Cisco Service Provider Cloud Network Infrastructure Sample Questions (Q54-Q59):

### NEW QUESTION # 54

A common DoS mitigation technique is:

- A. Using a single firewall
- B. Removing all filters
- C. Rate limiting
- D. Increasing bandwidth

**Answer: C**

**NEW QUESTION # 55**

Automation in deploying NFV can reduce:

- **A. The need for manual configuration**
- B. Network reliability
- C. Software-defined networking capabilities
- D. The speed of service delivery

**Answer: A**

**NEW QUESTION # 56**

The primary purpose of container orchestration tools like Kubernetes is to:

- **A. Manage the lifecycle of containers**
- B. Manage physical server allocations
- C. Increase manual intervention in container management
- D. Decrease the scalability of applications

**Answer: A**

**NEW QUESTION # 57**

Carrier-neutral facilities enhance cloud connectivity by offering:

- A. Limited scalability options
- B. Single-tenant data center operations
- **C. Multiple connectivity options including Direct Connect and MPLS**
- D. Direct access to only one cloud provider

**Answer: C**

**NEW QUESTION # 58**

ACI (Application Centric Infrastructure) is designed to:

- **A. Simplify the operational management of data centers**
- B. Increase manual configuration requirements
- C. Focus on physical, rather than virtual, network infrastructure
- D. Reduce application deployment flexibility

**Answer: A**

**NEW QUESTION # 59**

.....

Dear every IT candidates, here, I will recommend ValidBraindumps 300-540 exam training material to all of you. If you use Cisco 300-540 test bootcamp, you will not need to purchase anything else or attend other training. We promise that you can pass your 300-540 Certification at first attempt. The high pass rate has helped lots of IT candidates get their IT certification. In case of failure, we promise to give you full refund. No help, full refund!
