

# NSK300 Learning Materials: Netskope Certified Cloud Security Architect & NSK300 Exam braindumps

What's more, part of that Dumpcollection NSK300 dumps now are free: <https://drive.google.com/open?id=1dUMfRmvOtkg8AGNcedV4xqkINOc5Fhbx>

For certificates who will attend the exam, some practice is evitable. But sometimes, time for preparation is quite urgent. NSK300 exam braindumps of us will help you to use the least time to pass the exam. If you choose the NSK300 exam dumps of us, you just need to spend about 48 to 72 hours to practice and you can pass the exam successfully. In addition, NSK300 Exam Dumps are verified by experienced experts, and the accuracy and correctness can be guaranteed. And we pass guarantee and money back guarantee if can't pass the exam.

## Netskope NSK300 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• <b>Netskope Platform Implementation:</b> This section of the exam measures the abilities of Cloud Security Engineers and focuses on implementing the Netskope Security Cloud Platform using recommended steering architectures and deployment approaches. It includes key concepts such as API-enabled protection and real-time protection features, ensuring candidates understand how to deploy Netskope to secure cloud usage effectively within enterprise networks.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>• <b>Cloud Security Solutions:</b> This section of the exam measures the skills of Cloud Security Analysts and covers the core components and functions of the Netskope Security Cloud Platform. It includes understanding how the platform integrates with enterprise environments, the deployment methods supported by Netskope, and the role of various microservices in delivering cloud-based security. The focus is on ensuring candidates can recognize how Netskope's architecture protects users, applications, and data across cloud services.</li></ul>

Topic 3	<ul style="list-style-type: none"> <li>• <b>Netskope Platform Monitoring:</b> This section of the exam measures the capabilities of Security Operations Center (SOC) Analysts and focuses on monitoring the platform through reporting and analytics tools. It highlights how Netskope insights support visibility into user activity, cloud app behavior, and policy effectiveness to help organizations maintain a continuous cloud security posture.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>• <b>Netskope Platform Troubleshooting:</b> This section of the exam measures the skills of Support Engineers and focuses on identifying and resolving common issues within the Netskope platform. It includes troubleshooting client connectivity problems, analyzing steering methods, resolving general connectivity concerns, and addressing SAML integration issues. The section ensures candidates can diagnose and fix issues that impact platform performance and user access.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>• <b>Netskope Platform Management:</b> This section of the exam measures the skills of Security Administrators and covers essential administrative tasks required to manage the Netskope Security Cloud Platform. It includes managing DLP functions, handling identity integrations, and monitoring Netskope components to maintain platform stability. The domain ensures professionals can manage daily operations and maintain strong access, data, and security controls.</li> </ul>

## The best of Netskope certification NSK300 exam training methods

We offer you free update for 365 days after you purchase NSK300 study materials from us, so that you don't need to spend extra money for the update version. And the update version for NSK300 study materials will be sent to your email address automatically. You just need to check your mail when you need the update version. Besides NSK300 Study Materials are edited by professional experts, they are quite familiar with the dynamics of the exam center. Therefore if you choose NSK300 study materials of us, we will help you pass the exam and get the certificate successfully.

## Netskope Certified Cloud Security Architect Sample Questions (Q24-Q29):

### NEW QUESTION # 24

You are already using Netskope CSPM to monitor your AWS accounts for compliance. Now you need to allow access from your company-managed devices running the Netskope Client to only Amazon S3 buckets owned by your organization. You must ensure that any current buckets and those created in the future will be allowed Which configuration satisfies these requirements?

- A. Steering: Cloud Apps Only Policy type: Real-time Protection  
Constraint: Storage. Bucket Does Not Match \*@myorganization.com Action: Block
- B. Steering: All Web Traffic Policy type: API Data Protection Constraint: Storage, Bucket Does Match  
\*@myorganization.com Action: Allow
- **C. Steering: Cloud Apps Only. All Traffic Policy type: Real-time Protection Constraint: Storage. Bucket Does Match - ALLAccounts Action: Allow**
- D. Steering: Cloud Apps Only, All Traffic Policy type: Real-time Protection Constraint: Storage. Bucket Does Not Match - ALLAccounts Action: Block

**Answer: C**

Explanation:

To allow access from company-managed devices running the Netskope Client to only Amazon S3 buckets owned by the organization, the following configuration satisfies the requirements:

Steering Configuration:

Policy Type: Real-time Protection

Constraint: Storage

Bucket Condition: Bucket Does Match -ALLAccounts

Action: Allow

By configuring the policy to allow traffic from company-managed devices (Netskope Clients) to Amazon S3 buckets, the organization ensures that only buckets owned by the organization are accessible.

The -ALLAccounts condition ensures that both existing and future buckets are allowed.

This configuration aligns with the requirement to allow access to organization-owned buckets while blocking access to other buckets.

#### NEW QUESTION # 25

Your client is an NG-SWG customer. They are going to use the Explicit Proxy over Tunnel (EPoT) steering method. They have a specific list of domains that they do not want to steer to the Netskope Cloud.  
What would accomplish this task"

- A. Use an SSL decryption policy.
- B. Create a real-time policy with a bypass action.
- **C. Define exception domains in the PAC file.**
- D. Define exceptions in the Netskope steering configuration

**Answer: C**

Explanation:

To accomplish the task of not steering specific domains to the Netskope Cloud while using the Explicit Proxy over Tunnel (EPoT) steering method, you would define exception domains in the PAC file (A). This is because the PAC file is used to specify which domains should bypass the proxy and connect directly, thus allowing for granular control over the traffic that is steered to Netskope1.

The use of PAC files for steering exceptions is a standard practice in proxy configurations and is supported by Netskope's EPoT steering method as outlined in their documentation1.

#### NEW QUESTION # 26

You do not want a scheduled Advanced Analytics dashboard to be automatically updated when Netskope makes improvements to that dashboard. In this scenario, what would you do to retain the original dashboard?

- A. Copy the dashboard into your Group or Personal folders and schedule from these folders.
- **B. Download the dashboard you want and Import from File into your Group or Personal folder.**
- C. Create a new dashboard from scratch that mimics the Netskope dashboard you want to use.
- D. Ask Netskope Support to provide the dashboard and import into your Personal folder.

**Answer: B**

Explanation:

To retain the original dashboard without automatic updates due to improvements made by Netskope, you can download the desired dashboard and then import it from a file into your Group or Personal folder.

This approach ensures that you have a static version of the dashboard that won't be affected by future changes or enhancements.

Reference:

The answer is based on general knowledge of dashboard management and customization within Netskope.

#### NEW QUESTION # 27

A company needs to block access to their instance of Microsoft 365 from unmanaged devices. They have configured Reverse Proxy and have also created a policy that blocks login activity for the AD group

"marketing-users" for the Reverse Proxy access method. During UAT testing, they notice that access from unmanaged devices to Microsoft 365 is not blocked for marketing users.

What is causing this issue?

- A. The username in the name ID field does not have the "marketing-users" group name.
- **B. There is a missing group name in the SAML response.**
- C. The username in the name ID field is not in the format of the e-mail address.
- D. There is an invalid certificate in the SAML response.

**Answer: B**

Explanation:

The issue is likely caused by a missing group name in the SAML response (A). When access to Microsoft 365 from unmanaged devices is not blocked as expected, despite having a policy in place, it often indicates that the SAML assertion is not correctly identifying the user as a member of the restricted group. In this case, the "marketing-users" group name should be present in the SAML response to enforce the policy that blocks login activity for this group. If the group name is missing, the policy will not apply, and users will not be blocked as intended. This explanation is consistent with the configuration requirements for access control using SAML responses, as detailed in Netskope's documentation on Reverse Proxy and SAML integration<sup>1</sup>.

### NEW QUESTION # 28

A recent report states that users are using non-sanctioned Cloud Storage platforms to share data. Your CISO asks you for a list of aggregated users, applications, and instance IDs to increase security posture. Which Netskope tool would be used to obtain this data?

- A. Applications in Skope IT
- **B. Advanced Analytics**
- C. Cloud Confidence Index (CCI)
- D. Behavior Analytics

**Answer: B**

Explanation:

To obtain a list of aggregated users, applications, and instance IDs, especially when dealing with non-sanctioned Cloud Storage platforms, the Advanced Analytics (A) tool within Netskope would be used. Advanced Analytics provides in-depth visibility into cloud app usage and activities. It allows security teams to create detailed reports and dashboards that can help identify risks and ensure compliance with company policies by analyzing user behavior, application access, and data movement across the organization<sup>1</sup>.

### NEW QUESTION # 29

.....

In the era of information explosion, people are more longing for knowledge, which brings up people with ability by changing their thirst for knowledge into initiative and "want me to learn" into "I want to learn". As a result, thousands of people put a premium on obtaining NSK300 certifications to prove their ability. With the difficulties and inconveniences existing for many groups of people like white-collar workers, getting a NSK300 Certification may be draining. Therefore, choosing a proper NSK300 study material can pave the path for you, which is also conducive to gaining the certification efficiently.
