100% Pass Newest EXIN - CDCS Training Solutions

In a year after your payment, we will inform you that when the CDCS exam guide should be updated and send you the latest version. Our company has established a long-term partnership with those who have purchased our CDCS exam questions. We have made all efforts to update our products in order to help you deal with any change, making you confidently take part in the CDCS exam. Every day they are on duty to check for updates of CDCS Study Materials for providing timely application. We also welcome the suggestions from our customers, as long as our clients propose rationally. We will adopt and consider it into the renovation of the CDCS exam guide. Anyway, after your payment, you can enjoy the one-year free update service with our guarantee.

We give priority to the relationship between us and users of the CDCS preparation materials, as a result of this we are dedicated to create a reliable and secure software system not only in payment on CDCS training quiz the but also in their privacy. So we have the responsibility to delete your information and avoid the leakage of your information about purchasing CDCS Study Dumps. We believe that mutual understanding is the foundation of the corporation between our customers and us.

New CDCS Test Sample, Exam Sample CDCS Online

Dear customers, if you are prepared to take the exam with the help of excellent CDCS learning materials on our website, the choice

is made brilliant. Our CDCS training materials are your excellent choices, especially helpful for those who want to pass the exam without bountiful time and eager to get through it successfully. Let us take a try of our amazing CDCS Exam Questions and know the advantages first!

EXIN CDCS Exam Syllabus Topics:

Topic	Details
Topic 1	• Data Centre Environmental Considerations and Efficiency: This section evaluates the proficiency of data center professionals in addressing environmental factors and promoting efficiency within data center operations. The target audience, including data center managers and engineers, will be tested on their ability to identify and implement measures that enhance energy efficiency, cooling management, and sustainable practices.
Topic 2	• Data Centre Life Cycle and Standards: This section of the exam measures the skills of data center professionals and covers the various stages involved in the life cycle of a data center, from planning and design to implementation and decommissioning.
Topic 3	• Designing and Implementing a Data Centre: In this module, the exam assesses the knowledge of Exin data center professionals tasked with the design and implementation of data centers. Candidates will learn the key principles of creating an efficient data center layout, including considerations for scalability, redundancy, and security.

EXIN EPI Certified Data Centre Specialist Sample Questions (Q39-Q44):

NEW QUESTION # 39
An air-conditioner unit needs to be selected. Two types are available:
Unit-A has a Sensible Heat Ratio (SHR) of 0.7.
Unit-B has a Sensible Heat Ratio (SHR) of 0.9.
From an efficiency point of view, which one should be selected?

- A. Unit B
- B. Not relevant, as Sensible Heat Ratio is only specified for air-conditioner equipment to indicate the ratio between intake temperature and exhaust temperature.
- C. It does not matter, as the Sensible Heat Ratio has nothing to do with efficiency.
- D. Unit A

Answer: A

Explanation:
From an efficiency standpoint, Unit B with a Sensible Heat Ratio (SHR) of 0.9 is preferable. A higher SHR indicates that a greater proportion of the air conditioner's capacity is dedicated to sensible cooling (temperature reduction) rather than latent cooling (moisture removal). In data centers, sensible cooling is more critical since IT equipment primarily generates heat without adding significant moisture.
Detailed Explanation:
An SHR of 0.9 means that 90% of the cooling capacity is used for sensible cooling, which is more efficient for environments like data centers where humidity control is typically less of a concern. Opting for an air conditioner with a higher SHR ensures that most of the cooling energy is focused on temperature reduction, making Unit B more efficient in this scenario.
EPI Data Center Specialist References:
EPI data center best practices recommend choosing cooling units with higher SHR values in data centers, as they better match the cooling needs of IT equipment. High SHR units improve cooling efficiency by concentrating on sensible heat removal, which is vital for maintaining the optimal thermal environment.

NEW QUESTION # 40
A data center is in an area where utility power is highly available-only a few outages per year, typically <1 hour per event and <50 hours/year not available. What type of generators should be installed?

- A. A combination of standby, prime, and continuous sized to 500% of the load

- B. Continuous generators in at least N+1
- C. Standby generators, ideally in an N+1 configuration
- D. Standby generators; no N+1 needed as the risk of a failure to start is negligible

Answer: C

Explanation:
With infrequent/short outages, Standby (Emergency Standby Power, ESP) generators are appropriate; N+1 mitigates failure-to-start risk and supports concurrently maintainable designs.
References: ISO 8528-1 (generator rating definitions: ESP/PRP/Continuous), ANSI/TIA-942-B §6.2 (electrical redundancy).

NEW QUESTION # 41

Smoke sensors must be installed in the computer room. What is the minimum density?

- A. 1 per 10 m²
- B. 1 per 5 m²
- C. 1 per 40 m²
- D. 1 per 25 m²

Answer: D

Explanation:
NFPA 75 (Standard for IT Equipment Protection) and NFPA 72 (Fire Alarm Code) recommend installing at least one smoke detector per 250 ft² (#25 m²) in IT rooms. This ensures early detection in high-value environments.
* A and B are far too dense, exceeding NFPA minimums.
* D is too sparse and would not meet early detection requirements.
Therefore, the correct standard density is 1 per 25 m².
References: NFPA 75 §5.4.3, NFPA 72 Table 17.6.3.5.1.

NEW QUESTION # 42

When shielding material reaches its saturation point, what will be the impact?

- A. The shielding material will reach its optimal shielding performance state.
- B. The shielding material will increase its permeability factor.
- C. The shielding material will no longer be able to attenuate (reduce) additional EMF.
- D. The shielding material will reach its maximum electrically charged state.

Answer: C

Explanation:
When shielding material reaches its saturation point, it can no longer effectively attenuate additional EMF. At saturation, the material's ability to absorb or redirect magnetic fields is exhausted, meaning it cannot provide further shielding beyond this point. Additional EMF exposure would pass through the material without significant reduction.
Detailed Explanation:
Saturation occurs when the material's magnetic domains are fully aligned with the magnetic field, leaving no capacity to absorb or deflect further EMF. This can happen with high EMF levels, beyond the material's design limits, resulting in a breakdown of shielding effectiveness.
EPI Data Center Specialist References:
EPI guidelines on EMF management indicate that selecting appropriate shielding materials with sufficient capacity is essential to prevent saturation and ensure continuous protection. Saturation limits should be considered during design to avoid compromised shielding performance.

NEW QUESTION # 43

In which stage of the data center life cycle does testing and commissioning take place?

- A. Operate/optimize stage
- B. Design stage
- C. Retire stage

- D. Implement stage

Answer: D

Explanation:
The data center life cycle is typically divided into four stages:
* Design (scope, architecture, planning)
* Implement (construction, installation, testing & commissioning)
* Operate/Optimize (day-to-day operations, maintenance, continuous improvement)
* Retire (decommissioning and migration)
Testing and commissioning occur in the Implement stage, after construction but before handover. This includes Integrated Systems Testing (IST), which validates that all systems (electrical, cooling, fire protection, telecom) perform to design intent and redundancy requirements.
Without commissioning, the data center cannot be certified or considered operational.
References: Uptime Institute Commissioning Guidelines, ANSI/TIA-942-B Annex F (Lifecycle), ISO/IEC 30182.

NEW QUESTION # 44

......

Our team regularly modified it to provide you with the real and updated CDCS pdf exam questions every time. The applicants are informed of these new changes till three months after purchase from the 2Pass4sure. The 2Pass4sure gives its applicants a EXIN CDCS web-based practice test software that doesn't require installation. EXIN CDCS Practice Test is compatible with all operating systems, including iOS, Mac, and Windows. You can use this EXIN CDCS practice test on any browser on any device anywhere. You need to sign in to a verified account on our website to use the entire premium EXIN CDCS practice test questions.
