## SAP Certified Associate - Implementation Consultant - SAP SuccessFactors Learning 認定 C-THR88-2505 試験問題 (Q59-Q64):

### 質問 # 59

Your customer would like to limit access to the online content for a blended item to one segment on the last day of class Which settings do you need to configure?

Note: There are 2 correct answers to this question.

- A. In the item, check the "Content available only during specified segments of a scheduled offering" checkbox
- B. In the item, set "User can access online content without being registered in an offering" to No
- C. In the offering, uncheck the "Allow access to online content during this segment" checkbox for the segment on the last day
- D. In the user record, uncheck the "has access" checkbox on the Online Status tab

正解: A、 B

### 質問 # 60

Your customer decides to map user record data to a custom column in SuccessFactors Learning. In which configuration file do you update the data source mappings in SuccessFactors Learning?

- A. LMS\_AMIN
- B. ENITYJMPOR
- C. CONNECTORS
- D. CONTENT IMPORT

正解: C

### 質問 # 61

Which communication standards would you use to implement an acknowledgement statement that confirms learners have understood specific sections of online content?

- A. SCORM
- B. AICC Wrapper
- C. Browser
- D. Document Type

正解: A

解説:

Step by Step Explanation with exact Extract from SAP SuccessFactors Learning documents:

\* Understanding Acknowledgement Statements:

\* Acknowledgement statements confirm that learners have understood specific sections of online content. In SAP SuccessFactors Learning, these are typically implemented using e-learning standards that support tracking user interactions.

\* Role of SCORM:

\* SCORM (Sharable Content Object Reference Model) is the primary standard used to track learner interactions, including acknowledgements, in SAP SuccessFactors Learning.

\* Extract from SAP SuccessFactors Learning Documentation (SAP Help Portal, Admin Guide, Content Management):

"SCORM (1.2 and 2004) is used to implement and track interactive content, including acknowledgement statements, in SAP SuccessFactors Learning. SCORM content can record learner interactions, such as confirming understanding of specific sections, and report them to the LMS."

\* This confirms option A, as SCORM supports the tracking required for acknowledgement statements.

\* How SCORM Implements Acknowledgements:

\* SCORM content can include interactive elements (e.g., buttons or checkboxes) that learners must complete to acknowledge understanding, with completion data sent to the LMS.

\* Extract from SAP SuccessFactors Learning Documentation (SAP Help Portal, Admin Guide, SCORM Configuration):

"SCORM content can be configured to require learners to acknowledge specific sections, such as through interactive prompts, with completion status recorded in the learner's history."

\* Why Other Options are Incorrect:

\* Option B (AICC Wrapper): AICC is an older standard and less commonly used for interactive acknowledgements compared to SCORM.

"AICC supports basic content tracking but is less flexible than SCORM for interactive elements like acknowledgements" (SAP SuccessFactors Learning Admin Guide).

\* Option C (Browser): The browser is a delivery mechanism, not a standard for tracking acknowledgements.

"Browsers deliver content but do not provide tracking mechanisms for acknowledgements" (SAP SuccessFactors Learning Admin Guide).

\* Option D (Document Type): Document Type refers to file formats, not a communication standard.

"Document Type defines file formats, not tracking standards for learning content" (SAP SuccessFactors Learning Admin Guide).

\* Conclusion:

\* SCORM is the communication standard used to implement acknowledgement statements, as specified in option A.

## 質問 # 62

Statement of what users are expected to know and do once they have completed a specific course of instruction. Please choose the correct answer.

- A. Exam Object
- B. Question
- C. Variant
- **D. Objective**

正解: D

## 質問 # 63

A SuccessFactors Learning customer requires an approval process to be completed successfully whenever users record completion of an existing item for themselves where can this be configured? Note: There are 2 correct answers to this question.

- A. In System Admin -> Configuration
