At least 2/3 top 500 global companies choose Cisco electronic business software products as their key products or daily use. So if you get a Cisco certification you will be outstanding over others. Candidates want to pass 300-640 exam, the fastest and convenient method is to use our 300-640 Study Guide, many candidates choose this method to pass exam. You also can make this as practice exam materials or use test engine file to test like the real test scene.

Cisco Implementing Cisco Data Center AI Infrastructure Sample Questions (Q16-Q21):

NEW QUESTION # 16

A Cisco UCS C885A M8 server contains a GPU sled configured with six power supply units (PSUs) in an N+2 redundancy configuration. The workload on the GPU sled is currently drawing a load of 4500W. Using Power Save Mode, how many PSUs can be placed into standby mode to improve power efficiency without compromising redundancy?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: C

Explanation:

With six PSUs in an N+2 configuration and a 4500W load, at least two PSUs must remain available to carry the active workload, and two additional PSUs must remain available to preserve redundancy. Therefore, four PSUs must stay active, allowing two PSUs to be placed into standby mode for power efficiency without compromising the N+2 redundancy requirement.

NEW QUESTION # 17

A network administrator configures RDMA over Converged Ethernet version 2 (RoCEv2). Which transport protocol does RoCEv2 use at Layer 4?

- A. UDP
- B. SCTP
- C. ICMP
- D. TCP

Answer: A

Explanation:

RoCEv2 encapsulates RDMA traffic over UDP/IP, enabling routable RDMA communication across Layer 3 networks. TCP introduces retransmission and latency overhead unsuitable for high-performance GPU communication. SCTP and ICMP are not used for RoCEv2 transport.

NEW QUESTION # 18

Which function is provided through natural language processing?

- A. annotation of data transmission protocols for device authorization
- B. filtration of duplicate entries from transaction records
- C. compression of large configuration files for storage efficiency
- D. automated conversion of spoken or written content into structured data

Answer: D

Explanation:

Natural language processing enables systems to interpret, process, and transform human language from spoken or written inputs into structured data that applications can analyze, search, classify, or use for automation.

NEW QUESTION # 19

A network engineer is deploying an AI training fabric using Cisco Nexus switches with RoCEv2 enabled. During testing, packet drops occur when traffic bursts exceed buffer capacity. Which feature should be configured to minimize congestion and improve lossless Ethernet performance for GPU traffic?

- A. DHCP Snooping
- B. Storm Control
- C. Priority Flow Control
- D. BPDU Guard

Answer: C

Explanation:

Priority Flow Control (PFC) allows selective pausing of traffic classes during congestion, which is critical for RoCEv2 environments carrying GPU-to-GPU communication. AI workloads are highly sensitive to packet loss and retransmissions. BPDU Guard and DHCP Snooping are security features, while Storm Control only limits broadcast or multicast traffic and does not create lossless behavior for RDMA traffic.

NEW QUESTION # 20

An engineer deploys BGP EVPN in a Cisco VXLAN fabric. Which route type advertises MAC and IP binding information for endpoints?

- A. Type 2
- B. Type 1
- C. Type 4
- D. Type 5

Answer: A

Explanation:

EVPN Type 2 routes advertise MAC and optional IP bindings for endpoints, enabling efficient host reachability in VXLAN overlays. Type 5 routes advertise IP prefixes, while Types 1 and 4 handle Ethernet segment and multihoming information. AI fabrics rely heavily on accurate endpoint advertisement for scalability.

NEW QUESTION # 21

Many candidates who take the qualifying exams are not aware of our products and are not guided by our systematic guidance, and our users are much superior to them. In similar educational products, the 300-640 quiz guide is absolutely the most practical. Also, from an economic point of view, our Implementing Cisco Data Center AI Infrastructure exam dumps is priced reasonable, so the 300-640 test material is very responsive to users, user satisfaction is also leading the same products. So economical and practical learning platform, I believe that will be able to meet the needs of users. Users can deeply depend on our Implementing Cisco Data Center AI Infrastructure exam dumps when you want to get a qualification. There may be many problems and difficulties you will face, but believe in our Implementing Cisco Data Center AI Infrastructure exam dumps if you want to be the next beneficiary, our 300-640 Quiz guide is not only superior in price than any other makers in the educational field, but also are distinctly superior in the quality of our products.
