

DP-700 Dumps Download - DP-700 Relevant Questions

DP-700 Exam Dumps: Concentrate on Microsoft PDF Questions for Efficient Certification Preparation - [MicrosoftDumps.US](https://www.microsoftdumps.us)

Using our best Microsoft DP-700 exam dumps to pass a Microsoft Azure exam shows your abilities with a solid comprehension of the material and increases the value of the Implementing Data Engineering Solutions Using Microsoft Fabric exam. In the current times, to be competitive, you need a valid and accredited certificate to realize your future goals, and it's not an easy task. You should use DP-700 pdf dumps of MicrosoftDumps because these are authentic and valid. Moreover, utilizing the updates of the DP-700 pdf questions and answers can bring significant results in the DP 700 certification. It is always recommended to focus on the material thoroughly and take the DP-700 braindumps with honesty.

Grab the DP-700 Exam Questions with a Promise of Success

Pass the Implementing Data Engineering Solutions Using Microsoft Fabric certification exam through the guidance of the DP-700 pdf dumps and obtain the latest preparation material. The Microsoft DP-700 questions provided are collections of real exam questions and answers that are collected and made available online as PDF files. Get the DP-700 dumps to pass a Microsoft Azure exam with reliable tips easily accessible in digital formats. This preparational material is always ideal to prepare for the Microsoft Azure exam using verified study materials and by spending the necessary time and effort to gain a deep understanding of the subject. The DP-700 practice questions will guarantee that you have the knowledge and skills needed to succeed in your chosen field.

Leverage the Genuine DP-700 Dumps PDF and Practice Questions

Experts recommend the use of DP 700 dumps pdf of MicrosoftDumps for Microsoft Azure exam. Using DP-700 pdf dumps is considered excellent, so handle Implementing Data Engineering Solutions Using Microsoft Fabric exam preparation seriously and become proficient. Achieving the highest grades in the DP-700 exam questions advances your professional standing in the field. The DP 700 dumps are designed to test your knowledge and skills in a specific field; go through them with honesty and reach success on the first attempt. It's always best to prepare for the Implementing Data Engineering Solutions Using Microsoft Fabric exam using genuine DP-700 questions and answers and practice resources, as well as by acquiring practical experience in the field.

Get Microsoft Certified and Proficient In Your Field with Continuous Guidance

We would advise you to approach your Microsoft Azure exam with dedication, rely on your knowledge, and prepare with the DP-700 pdf dumps questions to succeed. Get the DP 700 pdf

What's more, part of that Pass4suresVCE DP-700 dumps now are free: <https://drive.google.com/open?id=1Z-ixN6nr84yJZT76tsxOt2b9vaCgIUUU>

It is inconceivable that Pass4suresVCE Microsoft DP-700 test dumps have 100% hit rate. The dumps cover all questions you will encounter in the actual exam. So, you just master the questions and answers in the dumps and it is easy to pass DP-700 test. As one of the most important exam in Microsoft certification exam, the certificate of Microsoft DP-700 will give you benefits. And you must not miss the opportunity to pass DP-700 test successfully. If you fail in the exam, Pass4suresVCE promises to give you FULL REFUND of your purchasing fees. In order to successfully pass the exam, hurry up to visit Pass4suresVCE.com to know more details.

Microsoft DP-700 Exam Syllabus Topics:

Section	Objectives
Secure and govern data in Microsoft Fabric	- Data governance and compliance • 1. Microsoft Purview integration • 2. Data lineage and cataloging
	- Implement data security • 1. Workspace and item-level permissions • 2. Row-level security and column-level security

- Ingest batch and streaming data into Microsoft Fabric

- 1. Ingest streaming data using Real-Time Analytics
- 2. Use Dataflows Gen2 for ingestion
- 3. Use Pipelines for data movement

Design and implement data ingestion solutions

- Integrate external data sources

- 1. Connect to Azure data services
- 2. Connect to on-premises and SaaS sources

- Monitor pipelines and workloads

- 1. Configure alerts and logging
- 2. Monitor data pipeline runs

Manage and monitor data solutions

- Optimize performance and reliability

- 1. Spark job optimization
- 2. Capacity and workload management in Fabric

- Data modeling and lakehouse transformation

- 1. Delta Lake optimization
- 2. Medallion architecture (Bronze/Silver/Gold)

Develop data transformation solutions

- Transform data using Spark in Fabric

- 1. PySpark data processing
- 2. Notebooks in Microsoft Fabric

Updated DP-700 Practice Exam Questions

Only by practising our DP-700 exam braindumps on a regular base, you will see clear progress happened on you. Besides, rather than waiting for the gain of our DP-700 practice guide, you can download them immediately after paying for it, so just begin your journey toward success now. With our DP-700 learning questions, you will find that passing the exam is as easy as pie for our DP-700 study materials own 100% pass guarantee.

Microsoft Implementing Data Engineering Solutions Using Microsoft Fabric Sample Questions (Q93-Q98):

NEW QUESTION # 93

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a Fabric eventstream that loads data into a table named Bike_Location in a KQL database. The table contains the following columns:

BikepointID

Street

Neighbourhood

No_Bikes

No_Empty_Docks

Timestamp

You need to apply transformation and filter logic to prepare the data for consumption. The solution must return data for a neighbourhood named Sands End when No_Bikes is at least 15. The results must be ordered by No_Bikes in ascending order.

Solution: You use the following code segment:

```

bike_location
| filter Neighbourhood == "Sands End" and No_Bikes >= 15
| sort by No_Bikes
| project BikepointID, Street, Neighbourhood, No_Bikes, No_Empty_Docks, Timestamp
| project BikepointID, Street, Neighbourhood, No_Bikes, No_Empty_Docks, Timestamp

```

Does this meet the goal?

- A. Yes
- B. no

Answer: B

Explanation:

This code does not meet the goal because it uses sort by without specifying the order, which defaults to ascending, but explicitly mentioning asc improves clarity.

Correct code should look like:

```

bike_location
| filter Neighbourhood == "Sands End" and No_Bikes >= 15
| sort by No_Bikes asc
| project BikepointID, Street, Neighbourhood, No_Bikes, No_Empty_Docks, Timestamp

```

NEW QUESTION # 94

You need to return records ingested during the last 540 seconds.

Which KQL filter should you use?

- A. | where SecondsAgo = datetime_diff(' second ', ingestion_time(), now()) <= 540
- B. | where SecondsAgo = datetime_diff(' second ', JobEndTime, JobStartTime) <= 540
- C. | where SecondsAgo = datetime_diff(' second ', now(), ingestion_time()) <= 540
- D. | where SecondsAgo = datetime_diff(' second ', now(), JobStartTime) <= 540

Answer: C

NEW QUESTION # 95

HOTSPOT

You have a Fabric workspace that contains a warehouse named DW1. DW1 contains the following tables and columns.

Table name	Column name	Description
SalesOrderDetail	ProductID	Contains the product ID of the ordered product
SalesOrderDetail	ModifiedDate	Contains the date of an order
SalesOrderDetail	OrderQty	Contains the order quantity
Product	ProductID	Contains the unique ID of a product
Product	Name	Contains a product name

You need to create an output that presents the summarized values of all the order quantities by year and product. The results must include a summary of the order quantities at the year level for all the products.

How should you complete the code? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

(SO.ModifiedDate) AS OrderDate
 SELECT CAST
 SELECT CONVERT
 SELECT YEAR
 ,P.Name AS ProductName
 ,SUM(SO.OrderQty) AS OrderQty
 FROM [dbo].[SalesOrderDetail] SO
 INNER JOIN [dbo].[Product] P
 ON P.ProductID = SO.ProductID
 GROUP BY
 CUBE(YEAR(SO.ModifiedDate), P.Name)
 GROUPING SETS ((YEAR(SO.ModifiedDate), P.Name), (YEAR(SO.ModifiedDate)))
 ROLLUP(YEAR(SO.ModifiedDate), P.Name)
 YEAR(SO.ModifiedDate), P.Name
 ORDER BY OrderDate

NEW QUESTION # 96

You need to ensure that the authors can see only their respective sales data.

How should you complete the statement? To answer, drag the appropriate values to the correct targets. Each value may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content. NOTE: Each correct selection is worth one point.

Values

- AuthorsSales
- AuthorEmail
- AuthorsSales.AuthorEmail
- BLOCK
- FILTER
- INLINE
- SCHEMABINDING
- USER_NAME()

Answer Area

CREATE FUNCTION dbo.tvf_rlspredicate(@Author AS varchar(50)) ☐ No
 RETURNS TABLE ☐
 WITH
 AS ☐
 RETURN SELECT 1 AS tvf_rlspredicate_result ☐
 WHERE @Author =
 GO
 CREATE SECURITY POLICY RLSFilter
 ADD FILTER PREDICATE Security.tvf_rlspredicate(AuthorEmail)
 ON
 WITH (STATE = ON)

Answer:

Explanation:

Values

- AuthorsSales
- AuthorEmail
- AuthorsSales.AuthorEmail
- BLOCK
- FILTER
- INLINE
- SCHEMABINDING
- USER_NAME()

Answer Area

```

CREATE FUNCTION dbo.tvf_rlspredicate(@Author AS varchar(50))
    RETURNS TABLE
WITH SCHEMABINDING
AS
    RETURN SELECT 1 AS tvf_rlspredicate_result
WHERE @Author = USER_NAME()
GO

CREATE SECURITY POLICY RLSFilter
ADD FILTER PREDICATE Security.tvf_rlspredicate(AuthorEmail)
ON AuthorsSales
WITH (STATE = ON)

```

No ☐

Explanation:

Values

- AuthorsSales
- AuthorEmail
- AuthorsSales.AuthorEmail
- BLOCK
- FILTER
- INLINE
- SCHEMABINDING
- USER_NAME()

Answer Area

```

CREATE FUNCTION dbo.tvf_rlspredicate(@Author AS varchar(50))
    RETURNS TABLE
WITH SCHEMABINDING
AS
    RETURN SELECT 1 AS tvf_rlspredicate_result
WHERE @Author = USER_NAME()
GO

CREATE SECURITY POLICY RLSFilter
ADD FILTER PREDICATE Security.tvf_rlspredicate(AuthorEmail)
ON AuthorSales
WITH (STATE = ON)

```

NEW QUESTION # 97

You have a Fabric warehouse named DW1 that contains a Type 2 slowly changing dimension (SCD) dimension table named DimCustomer. DimCustomer contains 100 columns and 20 million rows. The columns are of various data types, including int, varchar, date, and varbinary.

You need to identify incoming changes to the table and update the records when there is a change. The solution must minimize resource consumption.

What should you use to identify changes to attributes?

- A. a hash function to compare the attributes in the source table.
- B. a direct attributes comparison across the attributes in the DimCustomer table.
- C. a hash function to compare the attributes in the DimCustomer table.
- D. a direct attributes comparison for the attributes in the source table.

Answer: A

NEW QUESTION # 98

.....

The clients can download our DP-700 exam questions and use our them immediately after they pay successfully. Our system will send our DP-700 learning prep in the form of mails to the client in 5-10 minutes after their successful payment. The mails provide the links and if only the clients click on the links they can log in our software immediately to learn our DP-700 Guide materials. It is fast and convenient!
