## 2026 CHFM Visual Cert Exam | Trustable 100% Free Reliable CHFM Braindumps Book

With pass rate reaching 98.75%, CHFM exam torrent has received great popularity among candidates, and they think highly of the

exam dumps. In addition, CHFM exam braindumps are high-quality and accuracy, because we have professionals to verify the answers to ensure the accuracy. CHFM exam dumps have most of knowledge points for the exam, and you can master the major points through practicing. In addition, we have online and offline chat service for CHFM Exam Dumps, and they possess the professional knowledge for the exam. If you have any questions about CHFM exam materials, you can have a conversation with us.

## Medical Professional Certified Healthcare Facility Manager (CHFM) certification exam Sample Questions (Q90-Q95):

### NEW QUESTION # 90

Child abduction system evaluation is best accomplished by

- A. the safety committee.
- B. risk managers.
- C. security professionals.
- D. administration.

**Answer: C**

Explanation:

The evaluation of child abduction systems—such as infant security alarms, electronic tagging devices, and controlled access systems—falls under the expertise of security professionals. These professionals are trained to test, monitor, and validate the effectiveness of electronic security and surveillance systems. Their role ensures that abduction-prevention technology is properly installed, maintained, and capable of responding effectively in an emergency.

\* Correct Answer (B. security professionals): According to the CHFM exam content outline under Compliance, healthcare facilities are expected to implement and evaluate security measures that meet regulatory and safety requirements. The responsibility for the technical and functional evaluation of systems like infant abduction alarms lies with trained security staff.

\* Incorrect Options:

\* A. administration: While hospital administration sets policy and allocates resources, they are not directly responsible for evaluating technical systems.

\* C. the safety committee: Safety committees review incidents and provide oversight but do not conduct system-level technical evaluations.

\* D. risk managers: Risk managers focus on identifying potential liability and compliance issues but rely on security professionals to conduct the detailed evaluation of child abduction systems.

Relevance to CHFM Compliance Domain:

Within the Compliance domain of the CHFM exam, managers must demonstrate knowledge of regulatory standards for security in healthcare facilities, particularly in sensitive areas such as maternity wards.

Evaluation of abduction-prevention systems aligns directly with security operations, which are managed and verified by trained security professionals to ensure compliance with The Joint Commission (TJC), CMS, and industry best practices.

References:

American Hospital Association (AHA), CHFM Candidate Handbook - Exam Content Outline, "Compliance" domain: includes responsibilities for security and safety system evaluation.

The Joint Commission (TJC), Environment of Care Standards - Requirements for infant and pediatric abduction prevention measures.

NFPA 99: Health Care Facilities Code - Security system integration into patient safety measures.

### NEW QUESTION # 91

When storing oil or petroleum products over 1,320 gallons above ground or 42,000 gallons underground, a Spill Prevention, Control, and Countermeasure (SPCC) program is required in accordance with

- A. The Joint Commission Utility Management standards.
- B. Federal Regulations 40 CFR Part 112 Oil Pollution Act.
- C. NFPA 430 Storage of Liquid and Solid Oxidizers.
- D. OSHA Regulations 1926.153 Liquefied Petroleum Gas Act.

**Answer: B**

Explanation:

The requirement for Spill Prevention, Control, and Countermeasure (SPCC) planning is specifically mandated under Federal Regulations 40 CFR Part 112, under the Clean Water Act (Oil Pollution Act amendments).

Facilities with aboveground storage exceeding 1,320 gallons or underground storage over 42,000 gallons must develop and

implement an SPCC plan to prevent oil discharges into navigable waters.

Correct Answer (A): Federal 40 CFR Part 112 establishes the threshold quantities and program requirements.

B (Joint Commission): TJC standards govern utility management but do not set SPCC requirements.

C (OSHA 1926.153): This regulation applies to liquefied petroleum gas safety, not petroleum or oil spill prevention.

D (NFPA 430): Governs oxidizers, not oil storage or spill prevention.

References:

Federal Regulation 40 CFR Part 112, Oil Pollution Prevention.

American Hospital Association, CHFM Candidate Handbook - Compliance and Environment of Care standards reference environmental and regulatory codes.

### NEW QUESTION # 92

A measured carbon dioxide level of 1,500 ppm in an area of a facility may indicate

- A. humidity/dewpoint problems.
- B. air exchange rates are within design.
- C. vehicular exhaust entering the area.
- D. lack of outside air.

**Answer: D**

Explanation:

Acceptable indoor CO<sub>2</sub> concentrations in healthcare facilities are generally expected to remain below 1,000 ppm, as recommended by ASHRAE Standard 62.1 (Ventilation for Acceptable Indoor Air Quality). A reading of 1,500 ppm typically signals inadequate ventilation and insufficient outside air being introduced into the space. This is a direct indicator of poor dilution of indoor contaminants.

Correct: Lack of outside air (C) - High CO<sub>2</sub> concentrations are directly linked to reduced outside air supply.

Incorrect:

A). Within design - Not correct, since 1,500 ppm exceeds design thresholds.

B). Vehicular exhaust - Would raise CO and NO<sub>x</sub> levels, not primarily CO<sub>2</sub>.

D). Humidity/dewpoint - Unrelated to CO<sub>2</sub> measurement.

References:

ASHRAE 62.1: Ventilation for Acceptable Indoor Air Quality.

CHFM Candidate Handbook - Maintenance and Operations domain: ventilation standards.

---

### NEW QUESTION # 93

In an outpatient clinic classified as a business occupancy, The Joint Commission requires fire drills to be held how often?

- A. once a month
- B. every 6 months
- C. every 3 months
- D. every 12 months

**Answer: D**

Explanation:

The Joint Commission (TJC) aligns with NFPA 101: Life Safety Code. For business occupancies (such as outpatient clinics), the requirement is that fire drills be conducted annually (every 12 months).

Quarterly (every 3 months) drills are required for healthcare occupancies (hospitals, nursing care).

Outpatient business occupancies are less stringent.

References:

NFPA 101: Life Safety Code - Business Occupancy section.

The Joint Commission, Environment of Care Standards - Fire drill requirements.

CHFM Candidate Handbook - Compliance domain.

---

### NEW QUESTION # 94

A construction project in a cafeteria should not start until which of the following is present?

- A. staffing
- **B. funding**
- C. approval from a clinical director
- D. security authorization

**Answer: B**

Explanation:

Construction projects in healthcare facilities must have secured funding before starting. While approvals, staffing, and security considerations are important, the project cannot begin without the capital budget authorization. This aligns with AIA project delivery requirements and AHA/ASHE guidance for healthcare construction projects.

References: AIA A201 General Conditions; AHA/ASHE CHFM Handbook - Planning, Design, and Construction domain.

## NEW QUESTION # 95

.....

The Medical Professional CHFM certification exam is most useful for candidates who are from the working class, but students who are still in school can also use Medical Professional CHFM dumps in place of searching for other exam-related literature. In order to put it simply, we can state that the Medical Professional CHFM Practice Questions are the only thing that can save you from failing the challenging CHFM certification exam.
