If you want to FCP_FWAD-7.4 practice testing the product of ExamPrepAway, feel free to try a free demo and overcome your doubts. A full refund offer according to terms and conditions is also available if you don't clear the Fortinet FCP_FWAD-7.4 Practice Test after using the FCP - FortiWeb 7.4 Administrator (FCP_FWAD-7.4) exam product. Purchase ExamPrepAway best FCP_FWAD-7.4 study material today and get these stunning offers.

Fortinet FCP_FWAD-7.4 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Deployment and Configuration: This section of the exam measures the skills of Network Security Engineers and covers the ability to identify FortiWeb deployment requirements and configure essential system settings. Candidates are expected to set up server pools, security policies, and protected hostnames to ensure seamless deployment. To maintain operational efficiency, they must also configure FortiWeb high availability (HA) for fault tolerance and troubleshoot deployment or system-related issues.
Topic 2	<ul style="list-style-type: none">Machine Learning (ML): This section tests the skills of Application Security Engineers in leveraging machine learning to enhance web application security. Candidates will configure machine learning algorithms to detect anomalies, mitigate bot-based threats, and secure APIs through AI-driven analysis. Understanding how to fine-tune these ML-based security measures is crucial for ensuring robust application protection against evolving cyber threats.
Topic 3	<ul style="list-style-type: none">Web Application Security: This domain evaluates the ability of Cybersecurity Specialists to implement advanced threat mitigation strategies using FortiWeb. Candidates must configure the system to block known attacks, ensure comprehensive web application protection, and troubleshoot threat detection or mitigation-related issues. Additionally, they are expected to set up API protection mechanisms to secure web-based interactions from potential threats.
Topic 4	<ul style="list-style-type: none">Encryption, Authentication, and Compliance: This section of the exam assesses the expertise of Security Analysts in mitigating web application vulnerabilities through encryption and authentication mechanisms. Candidates must configure various access control methods, track user authentication, and prevent attacks targeting authentication systems. They must also implement SSL inspection and offloading techniques to enhance security and troubleshoot encryption or authentication-related issues effectively.

We make sure that the Fortinet FCP_FWB_AD-7.4 exam questions prices are affordable for everyone. All three ExamPrepAway FCP_FWB_AD-7.4 exam practice test questions formats are being offered at the lowest price. Just get benefits from this cheap FCP - FortiWeb 7.4 Administrator FCP_FWB_AD-7.4 Exam Questions price and download it right now.

Fortinet FCP - FortiWeb 7.4 Administrator Sample Questions (Q32-Q37):

NEW QUESTION # 32

You are using HTTP content routing on FortiWeb. Requests for web app A should be forwarded to a cluster of web servers which all host the same web app. Requests for web app B should be forwarded to a different, single web server. Which is true about the solution?

- A. The server policy applies the same protection profile to all its protected web apps.
- B. Static or policy-based routes are not required.
- C. To achieve HTTP content routing, you must chain policies: the first policy accepts all traffic, and forwards requests for web app A to the virtual server for policy A. It also forwards requests for web app B to the virtual server for policy B. Policy A and Policy B apply their app-specific protection profiles, and then distribute that app's traffic among all members of the server farm
- D. You must put the single web server into a server pool in order to use it with HTTP content routing.

Answer: C

NEW QUESTION # 33

Refer to the exhibits.

ID	IP/Domain	Status	Port	HTTP/2	Inherit Health Check	Server Health Check	Backup Server	SSL
1	10.0.1.21	Enable	80	Disable	Yes		Disable	Disable
2	10.0.1.22	Enable	80	Disable	Yes		Disable	Disable

Edit Virtual Server

Name	vserver1
Use Interface IP	<input checked="" type="checkbox"/>
IPv4 Address	10.0.1.8/255.255.255.0
IPv6 Address	::/0
Interface	port1

FortiWeb is configured in reverse proxy mode and it is deployed downstream to FortiGate. Based on the configuration shown in the exhibits, which of the following statements is true?

- A. You must disable the Preserve Client IP setting on FortiGate for this configuration to work.
- B. The configuration is incorrect. FortiWeb should always be located upstream to FortiGate.
- C. FortiGate should forward web traffic to the server pool IP addresses.
- D. FortiGate should forward web traffic to virtual server IP address.

Answer: D

NEW QUESTION # 34

Refer to the exhibit.

Model Settings Model Status

Edit Model Settings

Sampling Settings

Client Identification Method: IP and User-Agent

Sampling Time per Vector: 5 Minutes (1 – 10)

Sample Count per Client per Hour: 3 (1 – 60)

Sample Count: 1000 (10 – 10000)

Model Building Settings

Model Type: Moderate

Anomaly Detection Settings

Anomaly Count: 3 (1 – 65535)

Bot Confirmation:

Dynamically Update Model:

Action Settings

Action: Deny (no log)

Block Period: 60 Seconds (1 – 3600)

Severity: High

Trigger Policy: Please Select

Many legitimate users are being identified as bots. FortiWeb bot detection has been configured with the settings shown in the exhibit. The FortiWeb administrator has already verified that the current model is accurate.

What can the administrator do to fix this problem, making sure that real bots are not allowed through FortiWeb?

- A. Enable Bot Confirmation
- B. Disable Dynamically Update Model
- C. Change Action under Action Settings to Alert
- D. Change Model Type to Strict

Answer: A

NEW QUESTION # 35

You are using HTTP content routing on FortiWeb. You want requests for web application A to be forwarded to a cluster of web servers, which all host the same web application. You want requests for web application B to be forwarded to a different, single web server.

Which statement regarding this solution is true?

- A. You must create static routes on the FortiWeb to allow these requests.
- B. You must chain policies so that all requests go to the virtual server for policy A first, and then redirect requests for web application B to go to the virtual server for policy B
- C. The server policy always applies the same web protection profile to both web application A and web application B.
- D. You must put the single web server for application B into a server pool and use it with HTTP content routing.

Answer: D

Explanation:

To forward requests for web application B to a single web server, you would configure FortiWeb to use HTTP content routing and create a server pool specifically for web application B. In FortiWeb, server pools are used to group servers together based on application requirements, and you can configure the pool to contain only a single web server for application B.

NEW QUESTION # 36

Examine the following code snippet:

```
servers:  
- url: 'http://petstore.swagger.io/v1'  
paths:  
/pets:  
get:  
summary: List all pets  
operationId: listPets  
tags:  
- pets  
parameters:  
- name: limit  
in: query  
description: How many items to return at one time (max 100)  
required: true  
schema:  
$ref: '#/components/schemas/ref'
```

What is this a snippet from?

- A. An API machine learning (ML) configuration file
- **B. An API schema file**
- C. An XML schema file
- D. An HTTP request restriction file

Answer: B

NEW QUESTION # 37

.....

The high efficiency method is targeted learning rather than comprehensive learning. Comprehensive learning can improve your basic knowledge but it is not the best to clear exams and obtain certifications. Our valid Fortinet FCP_FWB_AD-7.4 exam cram review can help you pass this subject in a short time. If your goal is passing all exams and obtain a useful certification. The best shortcut is to buy Valid FCP_FWB_AD-7.4 Exam Cram Review. Most experienced people can prove that. Good products are here waiting for you.
