## Palo Alto Networks Cloud Security Professional Sample Questions (Q181-Q186):

### NEW QUESTION # 181

An administrator wants to enforce a rate limit for users not being able to post five (5) .tar.gz files within five (5) seconds.

What does the administrator need to configure?

- A. A ban for DoS protection with an average rate of 5 and file extensions match on .tar.gz on WAAS
- **B. A ban for DoS protection with a burst rate of 5 and file extensions match on .tar.gz on WAAS**
- C. A ban for DoS protection with a burst rate of 5 and file extensions match on .tar.gz on CNNF
- D. A ban for DoS protection with an average rate of 5 and file extensions match on .tar.gz on CNNF

**Answer: B**

### NEW QUESTION # 182

What will happen when a Prisma Cloud Administrator has configured agentless scanning in an environment that also has Host and Container Defenders deployed?

- A. Defender scans will automatically be disabled, so agentless scans are the only scans occurring.
- B. Both agentless and Defender scans will be disabled and an error message will be received.
- C. Agentless scan will automatically be disabled, so Defender scans are the only scans occurring.
- **D. Agentless scans do not conflict with Defender scans, so both will run.**

**Answer: D**

Explanation:

In a Prisma Cloud environment where both agentless scanning and Defender-based scans (Host and Container Defenders) are configured, there is no inherent conflict between these two scanning methods. Both agentless scans and Defender scans are designed to complement each other, providing comprehensive coverage and depth in the security analysis of the environment. Agentless scans offer a broad, less intrusive overview, while Defender scans provide deep, detailed insights into the security posture. Therefore, both types of scans will run concurrently, enhancing the overall security visibility and protection of the environment without disabling or interfering with each other's operations.

The agentless scanning architecture lets you inspect a host and the container images in that host without having to install an agent or affecting its execution. <https://docs.paloaltonetworks.com/prisma/prisma-cloud/prisma-cloud-admin-compute/agentless-scanning/onboard-accounts>

### NEW QUESTION # 183

The security team wants to enable the "block" option under compliance checks on the host.

What effect will this option have if it violates the compliance check?

- A. Additional hosts will be prevented from starting.
- B. Containers on a host will be stopped.
- **C. No containers will be allowed to start on that host.**
- D. The host will be taken offline.

**Answer: C**

Explanation:

Enabling the "block" option under compliance checks on a host in Prisma Cloud signifies a strict enforcement policy, where any container that violates specified compliance checks will be prevented from starting on that host. This preventive measure is crucial for maintaining a secure and compliant cloud environment, ensuring that only containers that meet the organization's compliance and security standards are allowed to run. This approach aligns with Prisma Cloud's proactive security posture management, where potential risks are mitigated before they can impact the cloud environment.

### NEW QUESTION # 184

What improves product operationalization by adding visibility into feature utilization and missed opportunities?

- A. Adoption Advisor
- B. Alarm Advisor
- C. Alarm Center
- D. Alert Center

**Answer: A**

Explanation:

The Adoption Advisor is a feature within Prisma Cloud that aims to improve product operationalization. It provides visibility into how features are utilized, identifies unused capabilities, and suggests ways to leverage the full potential of the platform. Therefore, Option A: Adoption Advisor is the correct answer.

**NEW QUESTION # 185**

Given the following JSON query:

`$.resource[*].aws_s3_bucket exists`

Which tab is the correct place to add the JSON query when creating a Config policy?

- A. Build Your Rule (Run tab)
- B. Remediation
- C. Details
- D. Build Your Rule (Build tab)
- E. Compliance Standards

**Answer: D**

Explanation:

When creating a Config policy in Prisma Cloud and incorporating a JSON query, the correct place to add this query is under the "Build Your Rule (Build tab)" (Option E). This section allows users to define the criteria and conditions for the policy, including specifying JSON or RQL (Resource Query Language) queries that articulate the policy's logic. The "Details" (Option A) tab is typically used for general information about the policy, such as its name and description. The "Compliance Standards" (Option B) tab is for associating the policy with specific compliance frameworks. The "Remediation" (Option C) tab provides guidance on how to remediate any issues detected by the policy. The "Build Your Rule (Run tab)" (Option D) is not a standard option in Prisma Cloud policy configuration.
