

NLN NEX New Real Test & NEX Valid Test Vce

What's more, part of that NewPassLeader NEX dumps now are free: https://drive.google.com/open?id=1vNo_HJJ1WnDlnzL9-e-U_hONNFLGwaM

If you are already an employee or busy in your routine, you can prepare Nursing Entrance Exam (Math, Science and Verbal) (NEX) exam quickly with NewPassLeader pdf questions. NEX pdf exam questions help applicants study for the Nursing Entrance Exam (Math, Science and Verbal) (NEX) exam at any time from any location. With the pdf questions, it will be easy for you to complete the Nursing Entrance Exam (Math, Science and Verbal) (NEX) exam preparation in a short time.

The three formats of NEX practice material that we have discussed above are created after receiving feedback from thousands of professionals around the world. You can instantly download the Nursing Entrance Exam (Math, Science and Verbal) (NEX) real questions of the NewPassLeader right after the payment. We also offer our clients free demo version to evaluate the of our Nursing Entrance Exam (Math, Science and Verbal) (NEX) valid exam dumps before purchasing.

NEX Valid Test Vce | NEX Latest Test Guide

If our Nursing Entrance Exam (Math, Science and Verbal) guide torrent can't help you pass the exam, we will refund you in full. If only the client provide the exam certificate and the scanning copy or the screenshot of the failure score of NEX Exam, we will refund the client immediately. The procedure of refund is very simple. The client can contact us by sending mails or contact us online. We will solve your problem as quickly as we can and provide the best service. Our after-sales service is great as we can solve your problem quickly and won't let your money be wasted.

NLN Nursing Entrance Exam (Math, Science and Verbal) Sample Questions (Q124-Q129):

NEW QUESTION # 124

An acid needs to be diluted at a ratio of 5 grams of acid per 3 liters of water. How many grams of acid are needed for a solution of 24 liters of water to maintain the ratio?

- A. 40 grams
- B. 14.4 grams
- C. 360 grams
- D. 1.6 grams

Answer: A

Explanation:

This is a ratio and proportion problem. The given ratio is 5 grams of acid for every 3 liters of water. First determine how many groups of 3 liters are in 24 liters: $24 \div 3 = 8$. Each group requires 5 grams of acid, so multiply: $8 \times 5 = 40$ grams. Therefore, option C is correct. Option D results from dividing instead of multiplying. Option B is excessively large and unrealistic. Ratio problems on the NEX require identifying the scaling factor before multiplying.

NEW QUESTION # 125

In the human male, which of these structures produces sperm cells?

- A. Cowper's glands
- B. Prostate gland
- C. Epididymis
- **D. Testes**

Answer: D

Explanation:

Sperm cells are produced in the testes, specifically within tightly coiled structures called seminiferous tubules.

The process of sperm production is known as spermatogenesis and requires hormones such as testosterone.

Cowper's glands and the prostate gland do not produce sperm; instead, they secrete fluids that contribute to semen and help protect and nourish sperm cells. The epididymis is responsible for sperm maturation and storage but does not produce sperm. The NEX Science exam often tests reproductive anatomy by asking students to distinguish between sperm production, maturation, and transport. Understanding the specific role of each male reproductive structure is essential. Since only the testes are responsible for the formation of sperm cells, option C is the correct answer.

NEW QUESTION # 126

Reading Comprehension

Passage:

Balanced nutrition includes consuming a variety of foods to obtain essential vitamins and minerals. Diets lacking in key nutrients can lead to deficiencies, fatigue, and impaired body function.

What is the main purpose of the passage?

- A. To explain how digestion works
- B. To list common vitamin supplements
- C. To promote calorie restriction
- **D. To emphasize the importance of a varied diet**

Answer: D

Explanation:

The passage focuses on the importance of balanced nutrition and the need to consume a variety of foods to maintain health. It warns that diets lacking essential nutrients can cause health problems. Option B accurately summarizes the purpose of the passage. Option A is incorrect because supplements are not discussed. Option C is unrelated, and option D contradicts the message of balance. On the NEX exam, purpose questions require identifying the author's intent rather than focusing on minor details.

NEW QUESTION # 127

On Isle Royale, the natural predator of the moose is the wolf. In 1970, the moose population on Isle Royale was almost double that of wolves. By 1980, the moose population had been reduced to half that of 1970, while the number of wolves had almost tripled.

Which of the following statements best explains these events?

- A. Disease had eliminated much of the moose population and wolves thrived due to less competition with moose for resources.
- B. Wolves breed more than moose and therefore were able to increase their numbers more rapidly.
- **C. As the wolf population grew in size, the moose population was being driven down by increased predation.**
- D. Hunting from 1970 to 1980 eliminated much of the moose population and made room for more wolves.

Answer: C

Explanation:

This question tests understanding of predator-prey relationships, a key ecology concept on the NEX Science exam. Wolves are the natural predators of moose on Isle Royale. When the moose population was initially high, there was an abundant food supply for wolves. This allowed the wolf population to increase significantly. As the number of wolves increased, predation pressure on the moose population also increased, leading to a sharp decline in moose numbers. This inverse relationship between predator and prey populations is a classic ecological pattern. There is no evidence in the question to suggest disease, human hunting, or breeding rate differences as the primary cause. Instead, the changes in population sizes are best explained by increased predation. The NEX often

assesses whether students can interpret real-world ecological data and recognize how population dynamics are influenced by natural predator-prey interactions.

NEW QUESTION # 128

Reading Comprehension

Passage:

Health literacy refers to a person's ability to understand health information and make informed decisions.

Individuals with limited health literacy may have difficulty following medical instructions or managing chronic conditions.

What is the primary focus of the passage?

- A. Comparing education levels
- B. Teaching medical terminology
- C. Describing chronic disease treatments
- D. Explaining health literacy and its importance

Answer: D

Explanation:

The passage defines health literacy and explains why it is important for managing health and following medical instructions. Option B best captures the main focus. The other options address topics not discussed.

On the NEX exam, purpose questions often begin with a definition followed by explanation, signaling that the passage is meant to inform rather than persuade or compare.

NEW QUESTION # 129

.....

A certificate for candidates means a lot. It not only means that your efforts are valid, but also means that your ability has been improved. NEX exam bootcamp will make your efforts receive rewards. Our NEX exam dumps contain the most of knowledge points, they will help you to have a good command of the knowledge as well as improve your ability in the process of learning the NEX Exam Bootcamp. In addition, we are pass guaranteed and money back guaranteed if you fail to pass the exam dumps, so you don't need to worry that you will waste your money.
