Because their time is not enough to prepare for the Order-Management-Administrator exam, and a lot of people have difficulty in preparing for the exam, so many people who want to pass the Order-Management-Administrator Exam and get the related certification in a short time are willing to pay more attention to our Order-Management-Administrator study materials as the pass rate is high as 99% to 100%.

Salesforce Order Management Administrator Accredited Professional Sample Questions (Q29-Q34):

NEW QUESTION # 29
Which three statements are true about change sets?

- A. Changes can be deployed to any instance of Salesforce as long as the destination has approved it
- B. Sending a change set between two orgs requires a deployment connection
- C. A change request should be created when the admin wants to send customizations from the current org to another org
- D. Change sets can only be sent between orgs that are affiliated with a production org
- E. Change sets can contain only modifications made through the Setup menu

Answer: B,D,E

Explanation:
Explanation
Three statements that are true about change sets are:
Sending a change set between two orgs requires a deployment connection. A deployment connection is a link between two orgs that allows one org to send change sets to another org.
Change sets can only be sent between orgs that are affiliated with a production org. A production org is an org that is used for live operations and data, and it can have one or more sandbox orgs that are used for development and testing. Change sets can only be sent from a sandbox org to its associated production org, or from one sandbox org to another sandbox org that shares the same production org.
Change sets can contain only modifications made through the Setup menu. A change set is a collection of metadata components that can be deployed from one org to another. Metadata components are customizations that are made through the Setup menu, such as custom objects, fields, workflows, etc.

NEW QUESTION # 30
An administrator is configuring delivery methods. What two types of records need to be created?

- A. Product Summary
- B. Order Delivery Summary
- C. Delivery Method
- D. Product
- E. Order Delivery Method

Answer: C,E

Explanation:
The Order Delivery Method and Delivery Method objects are used to configure delivery methods for orders. A delivery method is a way of delivering an order to a customer, such as standard shipping, express shipping, or in-store pickup. A Delivery Method record defines the name, description, type, and cost of a delivery method. An Order Delivery Method record associates an order with a delivery method and stores additional information such as the delivery address, tracking number, and status. Reference: Order Management Objects, [Delivery Methods]

NEW QUESTION # 31
An administrator needs to send an Outbound Message to an external accounting system whenever a Fulfillment Order is created.

What is the best practice to create this functionality?

- **A. Create a Process Builder**
- B. Create an Apex Trigger
- C. Create a Workflow Rule
- D. Create a Flow

Answer: A

Explanation:
The best practice to create this functionality is to use a Process Builder. A Process Builder is a declarative tool that allows administrators to automate business processes based on certain criteria and actions. The administrator can create a Process Builder that triggers when a Fulfillment Order is created, and then executes an Outbound Message action that sends the information to the external accounting system. Verified Reference: https://help.salesforce.com/s/articleView?id=sf.process_overview.htm&type=5 https://help.salesforce.com/s/articleView?id=sf.process_action_outbound_message.htm&type=5

NEW QUESTION # 32
A user is encountering an error when attempting to save an Account record. What can an administrator use to research the issue?

- A. The Chrome Dev Tools Console
- **B. A user trace flag and debug log on the affected user**
- C. Lightning Logs within Setup
- D. The Problems tab within the developer console

Answer: B

Explanation:
Explanation
The best way for an administrator to research the issue when a user is encountering an error when attempting to save an Account record is to use a user trace flag and debug log on the affected user. A user trace flag enables debug logging for a specific user, and a debug log captures database operations, system processes, and errors that occur when executing a transaction or running unit tests. The administrator can use these tools to identify the root cause of the error and fix it accordingly. NEW QUESTION # 33
The order object represents which two statements? (Choose 2)

- **A. The customer's intent at the time or purchase**
- B. The invoice data for accounting purposes
- **C. The initial exchange of funds for goods or services**
- D. An overall summary of the order being processed

Answer: A,C
