NSE6_FSR-7.3 Flexible Testing Engine & NSE6_FSR-7.3 Latest Study Notes

When you are struggling with those troublesome reference books; when you feel helpless to be productive during the process of preparing different exams (such as NSE6_FSR-7.3 exam); when you have difficulty in making full use of your sporadic time and avoiding procrastination. It is time for you to realize the importance of our NSE6_FSR-7.3 Test Prep, which can help you solve these annoyance and obtain a NSE6_FSR-7.3 certificate in a more efficient and productive way. As long as you study with our NSE6_FSR-7.3 exam questions for 20 to 30 hours, you will be confident to take and pass the NSE6_FSR-7.3 exam for sure.

Fortinet NSE6_FSR-7.3 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Security Management: This section covers how Security Engineers implement role-based access control (RBAC) and set up team structures within FortiSOAR to streamline security management.
Topic 2	<ul style="list-style-type: none">• System Monitoring and Maintenance: For FortiSOAR Administrators, this domain covers using various tools for system monitoring to ensure consistent performance. This includes how to regularly oversee FortiSOAR processes, along with other critical functions.
Topic 3	<ul style="list-style-type: none">• System Operation: For System Engineers, this section covers Elasticsearch data management that may need to be externalized or migrated to accommodate system needs. Additionally, this section covers configuring the recommendation engine and utilizing the war room functionality.
Topic 4	<ul style="list-style-type: none">• System Configuration: FortiSOAR requires careful setup of applications for FortiSoar System Administrators. It covers system fixtures, and proxy settings to function optimally.
Topic 5	<ul style="list-style-type: none">• SOC and SOAR Overview: Security Engineers can gain an understanding of SOC and SOAR deployment requirements, including licensing management for FortiSOAR.

Fortinet NSE 6 - FortiSOAR 7.3 Administrator Sample Questions (Q31-Q36):

NEW QUESTION # 31

An administrator wants to collect and review all FortiSOAR log files to troubleshoot an issue. Which two methods can they use to accomplish this? (Choose two.)

- A. Download the logs from the GUI.
- B. Enter the `caacta log -collect` directory command.
- C. Review the contents of `/var/log/messages`.
- D. Enter the `csacta services -status` command, and then copy the output.

Answer: A,B

Explanation:

Administrators can collect and review FortiSOAR logs for troubleshooting in two primary ways. First, they can download logs directly from the GUI, which provides access to various logs through an intuitive interface. Secondly, using the command-line interface, the `csacta log --collect` command can be used to gather all logs within a specified directory, enabling more detailed offline analysis. Both methods offer comprehensive log collection to aid in diagnosing and resolving issues.

NEW QUESTION # 32

View the exhibit:

What does the command output mean?

```
root@fortisoar ~]# csadm db --check-externalization
The file db_external_config.yml does not exist. Failed to connect the instance.
[root@fortisoar ~]#
```

- A. The configuration to enable database externalization has not been completed.
- B. The local PostgreSQL database is configured on the FortiSOAR instance.
- C. The local PostgreSQL database is disabled on the FortiSOAR instance.
- D. There is no connectivity between the PostgreSQL databases of the primary and secondary FortiSOAR instances.

Answer: A

NEW QUESTION # 33

Which statement about licensing on FortiSOAR is true? (Choose one answer)

- A. The evaluation license has an expiry date but no limit on user count.3
- B. A FortiSOAR VM with a perpetual license needs access to update.fortiguard.net.1
- C. The subscription license requires connectivity to globalupdate.fortinet.net to retrieve information.
- D. The perpetual trial license has a limit on actions per day but no limit on user count.2

Answer: C

Explanation:

Comprehensive and Detailed Explanation From FortiSOAR 7.3 Exact Extract study guide:

According to the FortiSOAR 7.3 Deployment and Administration Guide under the "Licensing FortiSOAR" section:

* Connectivity Requirements:For the FortiSOAR license deployment and validation process to succeed, the instance must have outbound connectivity tohttps://globalupdate.fortinet.net. This URL is specifically used by the FortiSOAR license manager to fetch entitlements, verify the subscription status, and retrieve product information from the Fortinet licensing servers. If this connectivity is blocked (and a FortiManager is not being used as a local FDN proxy), the license deployment will fail.4

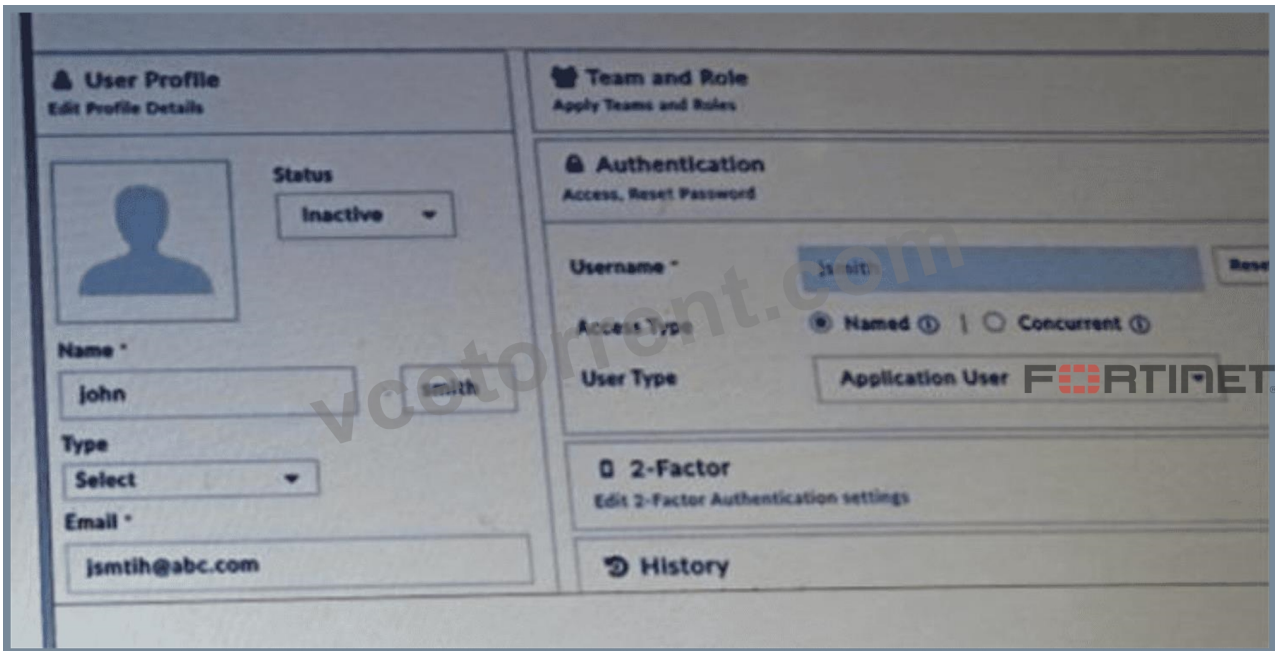

* License Limits:Every FortiSOAR license-whether Perpetual, Subscription, or Trial-strictly enforces a maximum number of active users(concurrent or named) and often a limit on the number of automation actions per day.5

* Perpetual Trial Licenses(often called "Free Trial") are restricted to a specific user count (typically 2 or 3) and a daily action limit (e.g., 200 or 1000 actions). Therefore, options C and D are incorrect as they suggest "no limit on user count."

* URL Clarification:While update.fortiguard.net is a common Fortinet endpoint for security signatures (IPS/AV), FortiSOAR's specific licensing and entitlement communication is directed to the globalupdate.fortinet.net service.

NEW QUESTION # 34

Refer to the exhibit.

Why is this user's account inactive? (Choose one answer)

- A. The user has exceeded the maximum number of authentication tries for a one-hour period.
- B. The user does not have a valid email ID for the account.
- C. The user has exceeded the maximum number of allowed user accounts.
- D. The user has not reset the password for the account.

Answer: C

Explanation:

Comprehensive and Detailed Explanation From FortiSOAR 7.3 Exact Extract study guide:

According to the FortiSOAR 7.3 Administration and Deployment Guides, specifically in the "Licensing FortiSOAR" and "Security Management" sections:

* Licensing Enforcement:FortiSOAR strictly enforces the number of active users based on the installed license. The license specifies the maximum number of active users allowed in the system at any given point in time.

* User Status (Active vs. Inactive):When the number of active users reaches the limit defined by the license, any additional users created or imported will be set to an Inactive status by default. An administrator cannot change their status to "Active" until an existing
