CheckPoint 156-315.81 Authentic Exam Questions - 156-315.81 Test Testking

Our 156-315.81 study tool prepared by our company has now been selected as the secret weapons of customers who wish to pass the exam and obtain relevant certification. If you are agonizing about how to pass the exam and to get the CheckPoint certificate, now you can try our learning materials. Our reputation is earned by high-quality of our learning materials. Once you choose our training materials, you chose hope. Our learning materials are based on the customer's point of view and fully consider the needs of our customers. If you follow the steps of our 156-315.81 Exam Questions, you can easily and happily learn and ultimately succeed in the ocean of learning. Next, I will detail the relevant information of our learning materials so that you can have a better understanding of our 156-315.81 guide training.

CheckPoint 156-315.81 is an important exam for those who are looking to become Check Point Certified Security Experts. Check Point Certified Security Expert R81 certification is recognized globally and is highly valued in the IT industry. 156-315.81 exam is designed to test the candidate's knowledge and skills in implementing, managing, and troubleshooting Check Point Security solutions.

CheckPoint 156-315.81 exam is ideal for security professionals who wish to validate their skills and knowledge in Check Point's R81 security solution. It is especially beneficial for security administrators, engineers, architects, and consultants who work with Check Point security systems. Check Point Certified Security Expert R81 certification can help professionals advance their careers and demonstrate their expertise in Check Point security solutions.

The Check Point Certified Security Expert R81 certification is a valuable credential for IT professionals who work with Check Point security solutions. Check Point Certified Security Expert R81 certification is recognized globally and is highly respected in the industry. It provides a competitive edge to the certified professionals in the job market, as it demonstrates their expertise in network security and Check Point security solutions. Furthermore, the certification is valid for two years, and to maintain the certification, the

certified professionals must complete continuing education credits or pass a recertification exam.

CheckPoint Check Point Certified Security Expert R81 Sample Questions (Q362-Q367):

NEW QUESTION # 362
After finishing installation admin John likes to use top command in expert mode. John has to set the expert-password and was able to use top command. A week later John has to use the top command again, He detected that the expert password is no longer valid. What is the most probable reason for this behavior?

- A. "write memory" was not issued on clish
- B. changes are only possible via SmartConsole
- C. "save config" was not issued in expert mode
- D. "save config" was not issued on clish

Answer: D

Explanation:
Explanation
The most probable reason for the expert password to be no longer valid after a week is that save config was not issued on clish. The clish command set expert-password sets the expert password for the current session only. To make the password persistent, the clish command save config must be issued after setting the expert password2. The other options are not relevant for setting the expert password. NEW QUESTION # 363
What is the purpose of extended master key extension/session hash?

- A. UDP VOIP protocol extension
- B. In case of TLS1.x it is a prevention of a Man-in-the-Middle attack/disclosure of the client-server communication
- C. Special TCP handshaking extension
- D. Supplement DLP data watermark

Answer: B

Explanation:
The extended master key extension/session hash is a feature introduced in TLS 1.3 to prevent a Man-in-the-Middle attack/disclosure of the client-server communication. It works by generating a unique session hash for each connection, which is derived from the master key and other parameters. This session hash is then used to authenticate the application data and the end-of-handshake messages, ensuring that no one can tamper with or eavesdrop on the communication. Reference: Check Point Security Expert R81 Course, TLS 1.3 RFC

NEW QUESTION # 364
What command can you use to have cpinfo display all installed hotfixes?

- A. cpinfo -hf
- B. cpinfo installed_jumbo
- C. cpinfo -y all
- D. cpinfo -get hf

Answer: C

NEW QUESTION # 365
Which statement is false in respect of the SmartConsole after upgrading the management server to R81.10?

- A. Yes, using CPUSE you can make the installer available in the Web Portal of the Management Server
- B. Yes. You can download the SmartConsole directly from the Download Center
- C. Yes, the SmartConsole Upgrade package can be installed using CPUSE

- D. As far as you use version R80.40, no upgrade is needed due to compatibility mode

Answer: D

Explanation:
Explanation
The statement that is false in respect of the SmartConsole after upgrading the management server to R81.10 is that as far as you use version R80.40, no upgrade is needed due to compatibility mode. This is false because SmartConsole R80.40 is not compatible with R81.10 management server and you need to upgrade your SmartConsole to R81.10 as well. The other statements are true and valid ways to obtain the SmartConsole upgrade package. References: [Check Point Security Expert R81 Installation and Upgrade Guide], page 18.

NEW QUESTION # 366
What is the purpose of Captive Portal?

- A. It provides remote access to SmartConsole
- B. It manages user permission in SmartConsole
- C. It authenticates users, allowing them access to the Gaia OS
- D. It authenticates users, allowing them access to the Internet and corporate resources

Answer: D

Explanation:
Explanation
Captive Portal is a feature of Identity Awareness Software Blade that enables you to identify users who are not authenticated by other methods, such as Active Directory or VPN. Captive Portal redirects users to a web page where they can enter their credentials and be authenticated by an external server, such as LDAP or RADIUS.
After authentication, users can access the Internet and corporate resources according to the security policy rules that apply to their identity.
