EC-COUNCIL EC-Council Certified CISO (CCISO) Sample Questions (Q375-Q380):

NEW QUESTION # 375

Which of the following is a benefit of information security governance?

- A. Reduction of the potential for civil and legal liability
- B. Questioning the trust in vendor relationships.
- C. Increasing the risk of decisions based on incomplete management information.
- D. Direct involvement of senior management in developing control processes

Answer: A

Explanation:

Benefits of Information Security Governance:

- * Governance frameworks establish accountability and ensure compliance with legal, regulatory, and organizational requirements.
- * By implementing robust governance, organizations reduce the risk of data breaches, fraud, and other incidents that could lead to legal actions.

Legal and Civil Liability Considerations:

- * The CCISO program emphasizes the importance of aligning security practices with laws and regulations to avoid non-compliance penalties and lawsuits.

Supporting Reference:

- * The CCISO material discusses how effective governance minimizes exposure to risks that could result in legal liabilities, supporting organizational resilience and reputation.

NEW QUESTION # 376

Which of the following is considered the MOST effective tool against social engineering?

- A. Anti-phishing tools
- B. Effective Security Vulnerability Management Program
- C. Effective Security awareness program
- D. Anti-malware tools

Answer: C

Explanation:

An effective security awareness program is the most powerful tool against social engineering. Training employees to recognize and respond to threats like phishing and other manipulative tactics significantly reduces the risk of successful attacks. While anti-phishing and anti-malware tools (A, C) offer technical defenses, they cannot replace the importance of informed and vigilant employees. Security Vulnerability Management (D) addresses technical vulnerabilities but is less focused on human risk.

NEW QUESTION # 377

A recent audit has identified a few control exceptions and is recommending the implementation of technology and processes to address the finding. Which of the following is the MOST likely reason for the organization to reject the implementation of the recommended technology and processes?

- A. The organization has purchased cyber insurance
- B. The risk tolerance of the organization permits this risk
- C. The CIO of the organization disagrees with the finding
- D. The auditors have not followed proper auditing processes

Answer: B

Explanation:

Risk Tolerance and Control Exceptions:

- * Organizations define their risk tolerance levels based on strategic objectives and resources.
- * If a risk is within acceptable tolerance, additional controls may not be necessary.

Why This is Correct:

- * The decision aligns with the organization's established risk management framework and priorities.

Why Other Options Are Incorrect:

- * A. Improper Audit Process: Unlikely; audits follow structured methodologies.
- * B. CIO Disagreement: Decisions are based on risk tolerance, not individual opinions.
- * D. Cyber Insurance: Mitigates financial loss but doesn't eliminate risk.

References: EC-Council emphasizes that risk tolerance guides decisions on implementing controls, ensuring alignment with organizational objectives.

NEW QUESTION # 378

SCENARIO: Critical servers show signs of erratic behavior within your organization's intranet. Initial information indicates the systems are under attack from an outside entity. As the Chief Information Security Officer (CISO), you decide to deploy the Incident Response Team (IRT) to determine the details of this incident and take action according to the information available to the

team.

In what phase of the response will the team extract information from the affected systems without altering original data?

- A. Response
- B. Follow-up
- C. Recovery
- **D. Investigation**

Answer: D

Explanation:
Scenario4
