

# Top Exam Dumps HQT-4160 Demo | High-quality Hitachi HQT-4160: Hitachi Vantara Qualified Professional - VSP 5000 Series Installation 100% Pass

The software is designed for use on a Windows computer. This software helps hopefuls improve their performance on subsequent attempts by recording and analyzing Hitachi Vantara Qualified Professional - VSP 5000 Series Installation (HQT-4160) exam results. Like the actual Hitachi HQT-4160 Certification Exam, Hitachi Vantara Qualified Professional - VSP 5000 Series Installation (HQT-4160) practice exam software has a certain number of questions and allocated time to answer.

The Hitachi HQT-4160 exam consists of 60 multiple-choice questions and has a duration of 90 minutes. The questions cover a range of topics, including installation, configuration, maintenance, and troubleshooting of Hitachi's VSP 5000 series storage systems. HQT-4160 Exam is administered by Pearson VUE, a leading provider of computer-based testing services.

## HQT-4160 Exam Dumps.zip | Reliable HQT-4160 Braindumps Ppt

Some candidates may purchase our HQT-4160 software test simulator for their companies. They will ask us how many personal computers our soft version can be install. In fact we have no limit for computer quantity. So if you purchase our HQT-4160 software test simulator, it supports multi-users at the same time. It can be installed on computers without any limits. If you are a training school, it is suitable for your teachers to present and explain casually. Good HQT-4160 software test simulator have high passing rate and BraindumpsVCE are looking forward to your long-term cooperation.

## Hitachi Vantara Qualified Professional - VSP 5000 Series Installation Sample Questions (Q23-Q28):

NEW QUESTION # 23

How does the management software improve the operation of VSP 5000 systems?

- A. By reducing physical maintenance needs
- B. By simplifying user access controls
- C. By increasing the energy consumption
- **D. By automating routine tasks**

**Answer: D**

Explanation:

The Hitachi VSP 5000 management software provides a centralized interface to monitor, configure, and manage the storage system. One of its key benefits is automation of routine operational tasks, such as:

Creating and provisioning storage volumes

Assigning storage to hosts

Monitoring system health and generating alerts

Performing replication or backup scheduling

Rebuilding or rebalancing RAID groups automatically

Automation reduces manual intervention, minimizes errors, and improves operational efficiency.

#### **NEW QUESTION # 24**

What is a critical step in the pre-installation checklist for ensuring the physical security of the VSP 5000 system?

- A. Installing surveillance cameras in the data center
- **B. Securing the racks to the floor**
- C. Configuring firewall settings
- D. Setting BIOS passwords

**Answer: B**

Explanation:

The Hitachi VSP 5000 is a large enterprise storage system typically installed in data center racks.

A key pre-installation physical security and safety requirement is ensuring that racks are properly anchored or secured to the floor.

This step is critical because:

The storage system is heavy and tall, creating a tip-over risk.

Anchored racks improve stability during maintenance (when components are extended).

It protects equipment from accidental movement or vibration.

Many data center safety standards require rack anchoring before installation.

#### **NEW QUESTION # 25**

Which two part replacements in a VSP 5000 system require blocking the controller? (Choose two.)

- A. Hitachi Interconnect Edge (HIE)
- B. Cache Flash Module (CFM)
- **C. Cache DIMM**
- **D. Controller PCB**

**Answer: C,D**

Explanation:

Controller PCB

Replacing the Controller PCB requires blocking the controller to ensure system integrity and prevent data loss during the hardware change.

Cache DIMM

Cache DIMMs are part of the controller's critical memory subsystem, so the controller must be blocked before replacing any cache DIMMs to avoid corruption and ensure a safe replacement process.

#### **NEW QUESTION # 26**

Which two components are different between VSP 5500 and VSP 5600 systems? (Choose two.)

- A. Hitachi Interconnect Edge (HIE)
- B. Interconnect Switch (ISW)
- C. DKC Power Supply (DKCPS)
- D. Controller Board

**Answer: C,D**

Explanation:

Controller Board

The VSP 5600 controllers use upgraded blades featuring dual 10-core Cascade Lake CPUs and two Compression Accelerator Modules per controller, hardware not present on the VSP 5500 controllers, delivering significantly higher processing and ADR offload capabilities.

DKC Power Supply (DKCPS)

A non-disruptive Data-in-Place upgrade from VSP 5500 to VSP 5600 requires swapping each VSP 5500's DKCPS units for the VSP 5600-specified power supplies, as the newer models use a different PSU design.

### NEW QUESTION # 27

You are installing a new VSP 5500 storage system. Which tool is used to install the initial license keys?

- A. Maintenance Utility
- B. SVP application
- C. Webconsole
- D. Storage Navigator

**Answer: D**

Explanation:

Storage Navigator is the tool used to install the initial license keys on a new VSP 5500 storage system. It provides the necessary interface for license management and activation.

### NEW QUESTION # 28

.....

Our passing rate is 98%-100% and there is little possibility for you to fail in the exam. But if you are unfortunately to fail in the exam we will refund you in full immediately. Some people worry that if they buy our HQT-4160 exam questions they may fail in the exam and the procedure of the refund is complicated. But we guarantee to you if you fail in we will refund you in full immediately and the process is simple. If only you provide us the screenshot or the scanning copy of the HQT-4160 failure marks we will refund you immediately. If you have doubts or other questions please contact us by emails or contact the online customer service and we will reply you and solve your problem as quickly as we can. So feel relieved when you buy our HQT-4160 guide torrent.
