It provides a competitive edge in the job market and demonstrates the candidate's commitment to continuous learning and professional development.

Salesforce Certified Platform App Builder Sample Questions (Q257-Q262):

NEW QUESTION # 257

Universal Containers has a Lightning record page that supports both the mobile app and desktop. An app builder has downloaded a custom Lightning component from AppExchange, but users are unable to view the component on mobile devices.

What can be the issue?

- A. The component has been developed for Desktop Pages.
- **B. The component needs to be activated.**
- C. The record page template is unable to support mobile devices.
- D. The record page needs to be activated.

Answer: B

NEW QUESTION # 258

An app builder needs to change the data type of some custom fields.

Which two limitations should the app builder be aware of when changing the data type of a custom field?

Choose 2 answers

- **A. It is not possible to change the data type of a formula field to any data type.**
- B. It is not possible to change the data type of a field used as an External ID from number to text.
- **C. It is not possible to change the data type of a Text Area (Long) field to Text.**
- D. It is not possible to change the data type of field referenced by Apex code,

Answer: A,C

Explanation:

Changing the data type of custom fields in Salesforce has specific limitations that need to be considered to ensure system integrity and prevent errors:

* A. It is not possible to change the data type of a formula field to any data type. Formula fields are calculated based on other field values and cannot be converted into a storage data type because they do not store data themselves.

* D. It is not possible to change the data type of a Text Area (Long) field to Text. Text Area (Long) fields support up to 131,072 characters, which far exceeds the 255 character limit of standard Text fields.

Converting such a field to a smaller capacity field would potentially lead to data truncation or loss.

For official guidance on data type changes, refer to Salesforce's Custom Field Considerations.

NEW QUESTION # 259

An app builder wants to create a custom object and 10 fields.

What should they use to create the object, fields, and relationships quickly from one place?

- A. Lightning Object Creator
- B. Developer Console
- C. Manage Field Permissions
- **D. Schema Builder**

Answer: D

Explanation:

To create a custom object along with multiple fields and relationships efficiently from a single interface, the Schema Builder is the ideal tool:

* A. Schema Builder. This graphical tool provides a drag-and-drop interface for creating and modifying objects and fields in Salesforce, allowing for a visual layout of database schema.

Steps to use Schema Builder:

* Go to Setup # Schema Builder.

* Drag the 'Object' element into the schema area to create a new custom object.

* Define the object's properties (e.g., label, API name).

* Drag field elements like Text, Number, or Lookup into the object to create fields.

* Configure each field's properties according to your requirements.

* Connect objects via lookup or master-detail relationships by dragging the relationship fields between them.

* Save the layout to create all elements in Salesforce.

For more information, review Salesforce's Schema Builder documentation.

NEW QUESTION # 260

The VP of Sales wants a Chatter post to the All Sales private group when an Opportunity goes to the closed won stage. What two tools should the app builder use to automate this process? (Choose two.)

- A. Workflow
- B. Big Deal Alert
- C. Flow
- D. Process Builder

Answer: C,D

Explanation:

NEW QUESTION # 261

A business user at Universal Containers wants to update an Account directly from an Opportunity record. What should the app builder create to allow the business user to make these edits?

- A. Formula fields displaying the Account fields.
- B. An update record action with a related record component.
- C. An update record action with a details component
- D. Opportunity fields updated by a process.

Answer: B
