- A. It is the final activity for the required work for the project
- B. The early finish and late finish are circular
- C. It is the penultimate work required for the project
- D. The scheduler forgot to add the successor activities

Answer: A

Explanation:

* Activity 11001 Characteristics:

Activity 11001 (Spillway - Concrete) is logically defined as the final activity in the project.

Final activities in a project typically do not have successor activities since they signify project completion.

* Exclusion of Other Options:

Option A: Circular logic does not apply since the scheduling logic is linear and follows standard precedence diagramming methods.

Option B: Activity 11001 is not penultimate but the final activity.

Option C: The scheduler's error is highly unlikely in a controlled environment following PSP principles.

* Verification with PSP Guidelines:

The PSP Study Guide explains that final activities represent the culmination of a project's logical sequence and typically lack successors (Ref. PSP Study Guide, Chapter 2A: Logical Sequencing).

NEW QUESTION # 135

What owner action could have mitigated the late completion of the project?

- A. Prepare better structural steel drawings.
- B. Self-perform more of the work.
- C. Hire a more senior project manager.
- D. Use a procurement agent to monitor and expedite equipment deliveries.

Answer: D

Explanation:

* Mitigating Late Completion:

A procurement agent could monitor and expedite long-lead equipment, reducing delivery delays that often affect project timelines.

* Evaluation of Other Options:

A: Hiring a senior project manager may not address the specific issue.

B: Self-performing may not resolve procurement delays.

D: Better structural steel drawings relate to design, not equipment delays.

* Verification with PSP Guidelines:

PSP emphasizes early identification and mitigation of procurement risks (Ref. PSP Study Guide, Chapter 2B: Procurement and Supply Chain Management).

NEW QUESTION # 136

What is the remaining work duration of Active D?

Refer to the time-scaled network diagram and other information to answer the following questions. Please consider this to be the entire network.

- A. 4.
- B. 8.
- C. 0
- D. 3.

Answer: A
