

H13-624_V5.5인기자격증 최신시험덤프자료, H13-624_V5.5인증문제

참고: Pass4Test에서 Google Drive로 공유하는 무료 2026 Huawei H13-624_V5.5 시험 문제집이 있습니다:
https://drive.google.com/open?id=1uHy1L7bBkVtx4n7d4t4l6KR_3bUXysOR

우리Pass4Test 사이트에서Huawei H13-624_V5.5관련자료의 일부 문제와 답 등 샘플을 제공함으로 여러분은 무료로 다운받아 체험해보실 수 있습니다.체험 후 우리의Pass4Test에 신뢰감을 느끼게 됩니다.빨리 우리 Pass4Test의 덤프를 만나보세요.

Huawei H13-624_V5.5 시험요강:

주제	소개
주제 1	Basic Storage Technologies: This section of the exam measures the skills of a Storage Engineer and includes fundamental knowledge of storage systems. It covers key concepts such as intelligent storage architecture, RAID levels, storage networking, and widely used data protocols. The section also introduces the structure and function of SAN and NAS environments. A strong grasp of these basic technologies helps professionals support large-scale data infrastructure with efficiency and stability.
주제 2	Storage System O&M Management: This section of the exam measures the skills of a Storage Operations Specialist and covers the daily operational management of Huawei storage systems. It emphasizes practical abilities in system monitoring, troubleshooting, fault handling, and health checks. The goal is to ensure smooth, reliable operations and reduce risks through proactive maintenance and efficient use of Huawei's O&M tools.
주제 3	Huawei Intelligent Storage Products and Features: This section of the exam measures the skills of a Storage Administrator and focuses on Huawei's intelligent storage solutions. It includes understanding product models, management interfaces, and advanced features like storage tuning and data protection. Candidates will explore how to manage system operations, optimize resource usage, and apply Huawei-specific technologies for secure and high-performance storage deployment.
주제 4	Storage Technology Trends: This section of the exam measures skills of a Data Center Specialist and covers the latest advancements in the storage industry. It focuses on emerging technologies that are shaping intelligent storage development, including trends like AI integration, green computing, and cloud-oriented storage evolution. Candidates are expected to understand how these trends influence storage planning and deployment in modern IT environments.

높은 직종율을 자랑하는 H13-624_V5.5인기자격증 최신시험 덤프자료 덤프샘플문제

Pass4Test는 많은 IT인사들이 Huawei인증 시험에 참가하고 완벽한 H13-624_V5.5인증 시험자료로 응시하여 안전하게 Huawei H13-624_V5.5인증 시험자격증 취득하게 하는 사이트입니다. Pass4Test의 자료들은 모두 우리의 전문가들이 연구와 노력 하에 만들어진 것이며 그들은 자기만의 지식과 몇 년간의 연구 경험으로 퍼펙트하게 만들었습니다. 우리 덤프들은 품질은 보장하며 갱신 또한 아주 빠릅니다. 우리의 덤프는 모두 실제 시험과 유사하거나 혹은 같은 문제들을 약속합니다. Pass4Test는 100% 한번에 꼭 고난의도인 Huawei인증 H13-624_V5.5 시험을 패스하여 여러분의 사업에 많은 도움을 드리겠습니다.

최신 HCIP-Storage H13-624_V5.5 무료 샘플문제 (Q56-Q61):

질문 # 56

Regarding the global deduplication technology adopted by the block service, which descriptions are correct for multiple choices ()

- A. Filter data that is not highly repetitive through the opportunity table
- B. The distributed storage space is huge. In order to reduce the memory space consumption of the fingerprint table, the mechanism of the fingerprint opportunity table is introduced
- C. The fingerprint table has a small memory footprint, which can support the deduplication of a larger capacity system
- D. The fingerprint of the data block enters the opportunity table count first, and only the same data block is written to the threshold multiple times before it can enter the fingerprint table to perform deduplication

정답: A,B,C,D

질문 # 57

Which of the following descriptions about the backup integration plan is correct: (multiple choice)

- A. Support deduplication
- B. Support report management
- C. Only 1 backup agent is supported
- D. Support fine-grained recovery

정답: A,B,D

질문 # 58

Assume an industry customer purchased several Huawei flash storage devices for service deployment. During routine management, an engineer found that the host bus adapter (HBA) driver version of the host is outdated and the number of concurrent HBAs was insufficient. As a result, the latency on the host differs greatly from that on the storage side. Which of the following measures can the engineer take to optimize performance?

- A. Use the management software provided by the HBA vendor to query and modify the number of concurrent HBAs.
- B. Upgrade the HBA driver to the latest version.
- C. Change the cache prefetch policy to constant prefetch.
- D. Change the load balancing algorithm of the multipathing software to min-task.

정답: B,D

질문 # 59

Multi-selection On the LINUX client accessing the Oceanstor 9000 cluster, you can adjust the client NFS mounting parameters to improve access.

Ask performance. Regarding the adjustment of NFS mount parameters, which of the following descriptions is correct: (multiple choice)

- A. rsize/wsize is the maximum size of each read and write block, it is recommended to adjust to the maximum
- B. It is recommended not to set noatime, because this parameter will reduce accessibility.
- C. It is recommended to set to async to improve access performance

- 정답: A,C**

- A. Each resource corresponds to an Agent
- B. The dependency between resources can be defined
- C. Dependency between service groups can be defined
- D. In special cases, you can cyclically define resource dependencies

정답: D
