P.S. Free 2026 Nokia 4A0-D01 dumps are available on Google Drive shared by Real4Prep: <https://drive.google.com/open?id=1FjJM4I-Z1-wF4Zjybv3ufMGPbramJNC>

Our company attaches great importance on improving the 4A0-D01 study prep. In addition, we clearly know that constant improvement is of great significance to the survival of a company. The fierce competition in the market among the same industry has long existed. As for our 4A0-D01 exam braindump, our company masters the core technology, owns the independent intellectual property rights and strong market competitiveness. What is more, we have never satisfied our current accomplishments. Now, our company is specialized in design, development, manufacturing, marketing and retail of the 4A0-D01 Test Question, aimed to provide high quality product, solutions based on customer's needs and perfect service of the 4A0-D01 exam braindump. At the same time, we have formed a group of passionate researchers and experts, which is our great motivation of improvement. Every once in a while we will release the new version study materials. You will enjoy our newest version of the 4A0-D01 study prep after you have purchased them. Our ability of improvement is stronger than others. New trial might change your life greatly.

When you choose to attempt the mock exam on the Nokia 4A0-D01 practice software by Real4Prep, you have the leverage to custom the questions and attempt it at any time. Keeping a check on your Nokia Data Center Fabric Fundamentals Exam exam preparation will make you aware of your strong and weak points. You can also identify your speed on the practice software by Real4Prep and thus manage time more efficiently in the actual Nokia exam.

Authorized 4A0-D01 Exam Dumps, 4A0-D01 Reliable Braindumps Free

The language in our Nokia 4A0-D01 test guide is easy to understand that will make any learner without any learning disabilities, whether you are a student or a in-service staff, whether you are a novice or an experienced staff who has abundant experience for many years. It should be a great wonderful idea to choose our 4A0-D01 Guide Torrent for sailing through the difficult test.

Nokia 4A0-D01 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">This section of the exam measures skills of a Network Automation Specialist and introduces the principles of Event Driven Automation in SR Linux environments. It covers integration with Kubernetes and explores core use cases such as intent-based automation for fabrics and services, as well as enhanced network observability.
Topic 2	<ul style="list-style-type: none">Nokia DC Fabric Solution: This section of the exam measures skills of a Data Center Network Engineer and covers the architecture and benefits of modern Layer 3 data center networks. It includes an overview of BGP-based routing, VXLAN and EVPN overlays for multi-tenant environments, and key features of the SR Linux operating system. The section also explains how APIs are used for external configuration and introduces the Fabric Services System's management capabilities.
Topic 3	<ul style="list-style-type: none">SR Linux Logging, Monitoring, and Filtering: This section of the exam measures skills of a Data Center Network Engineer and addresses how to implement logging, monitoring, and traffic filtering in SR Linux. It explains log file usage, ACL types, CPM filtering, and packet capture filters. Configuration tasks involve applying ACLs and monitoring network activity using capture tools.

Nokia Data Center Fabric Fundamentals Exam Sample Questions (Q35-Q40):

NEW QUESTION # 35

Which of the following statements about SR Linux interfaces is FALSE?

- A. Network interfaces are associated with physical ports on the linecards.
- B. Only one management interface is allowed.
- C. The loopback interface is a physical interface directly connected to another interface on the same chassis.
- D. Layer 2 parameters such as MTU are configured at the SR Linux interface level while Layer 3 parameters are configured at the subinterface level.

Answer: C

Explanation:

The loopback interface in SR Linux is a logical, virtual interface used for management and routing purposes; it is not a physical interface directly connected to another interface on the same chassis.

NEW QUESTION # 36

Which of the following statements about the data center's leaf-spine topology (clos network) is FALSE?

- A. It uses ECMP to distribute traffic across duplicate links.
- B. It provides a consistent path for east-west traffic.
- C. It uses the spanning tree protocol to avoid forwarding loops.
- D. Each leaf router is connected to all the spine routers in the cluster.

Answer: C

Explanation:

The leaf-spine (Clos) topology does not use the spanning tree protocol because it relies on equal-cost multipath (ECMP) routing to prevent loops and efficiently utilize all available paths. Spanning tree is typically avoided in modern data center fabrics to enable full bandwidth utilization.

NEW QUESTION # 37

When autoboot flag is set in grub.cfg, which of the following is NOT performed as part of the Zero Touch Provisioning (ZTP) autoboot process?

- A. Uses Nokia's Fabric Services System to deploy the digital sandbox automatically
- B. Uses the Web or FTP server to provide the RPM packages and any necessary images
- C. Downloads and executes provisioning scripts
- D. Uses the DHCP server to provide the IP address and default gateway

Answer: A

Explanation:

The ZTP autoboot process does not automatically use Nokia's Fabric Services System to deploy the digital sandbox; it focuses on network boot, DHCP IP assignment, and downloading/executing provisioning scripts from web or FTP servers.

NEW QUESTION # 38

Which of the following statements about IP-VRFs in Nokia's SR Linux is FALSE?

- A. Packets in an IP-VRF are forwarded based on the destination IP address.
- B. An IP-VRF is a Layer 3 network instance.
- C. The router maintains a distinct route table for each IP-VRF instance.
- D. Multiple servers can be connected to the same subnet in an IP-VRF.

Answer: D

Explanation:

Multiple servers connected to the same subnet typically reside within the same Layer 2 domain or MAC-VRF. IP-VRFs operate at Layer 3 and segment routing and forwarding by separate routing tables, so multiple servers on the same subnet are not a function of IP-VRF.

NEW QUESTION # 39

Which of the following statements about Zero Touch Provisioning (ZTP) is FALSE?

- A. ZTP allows a router to become operational in the network without any pre-provisioning.
- B. The ZTP process relies on a DHCP server for an IP address.
- **C. The ZTP process downloads a provisioning script defined in the TLS profile.**
- D. The ZTP process is managed by the ZTP application in Nokia SR Linux.

Answer: C

Explanation:

The ZTP process downloads a provisioning script typically from a defined URL or server, not from a TLS profile. The TLS profile is used for securing communications but does not define the provisioning script location.

NEW QUESTION # 40

.....

We are in a constant state of learning new knowledge, but also a process of constantly forgotten, we always learned then forgot, how to solve this problem, the answer is to have a good memory method, our 4A0-D01 study materials will do well on this point. Our 4A0-D01 Study Materials have their own unique learning method, abandon the traditional rote learning, adopt diversified memory patterns, such as the combination of text and graphics memory method, to distinguish between the memory of knowledge.
