DOWNLOAD the newest Free4Dump CISSP PDF dumps from Cloud Storage for free: [https://drive.google.com/open?id=1octTM4utpEPJQ\\_yQ1VmKGRCWiv7Lro\\_A](https://drive.google.com/open?id=1octTM4utpEPJQ_yQ1VmKGRCWiv7Lro_A)

Free4Dump Certified Information Systems Security Professional (CISSP) (CISSP) exam dumps save your study and preparation time. Our experts have added hundreds of Certified Information Systems Security Professional (CISSP) (CISSP) questions similar to the real exam. You can prepare for the Certified Information Systems Security Professional (CISSP) (CISSP) exam dumps during your job. You don't need to visit the market or any store because Free4Dump Certified Information Systems Security Professional (CISSP) (CISSP) exam questions are easily accessible from the website.

To be eligible for the ISC CISSP Certification Exam, candidates must have a minimum of five years of experience in two or more of the eight domains of the CISSP Common Body of Knowledge (CBK). Candidates who do not have the required experience can still take the exam, but will only be awarded an Associate of ISC<sup>2</sup> designation until they meet the experience requirements.

## Recommended CISSP Exam Questions To Pass In First Try

We are so popular for that we have a detailed and perfect customer service system. Firstly, only 5 to 10 minutes after the customer's online payment of CISSP actual exam is successful, you can receive an email from the customer service and immediately start learning. We also have dedicated staff to check and update CISSP Exam Questions every day, so you can get the latest information of CISSP exam materials whenever you buy it. Secondly, we provide 24-hour round-the-clock service to customers. We can solve any problems about CISSP study materials for you whenever and wherever you need it.

## ISC Certified Information Systems Security Professional (CISSP) Sample Questions (Q724-Q729):

### NEW QUESTION # 724

Under MAC, which of the following is true?

- A. All that is expressly permitted is forbidden.
- **B. All that is not expressly permitted is forbidden.**
- C. None of the choices.
- D. All that is not expressly permitted is not forbidden.

**Answer: B**

Explanation:

It is important to note that mandatory controls are prohibitive (i.e., all that is not expressly permitted is forbidden), not permissive.

Only within that context do discretionary controls operate, prohibiting still more access with the same exclusionary principle. In this type of control system decisions are based on privilege (clearance) of subject (user) and sensitivity (classification) of object (file). It requires labeling.

### NEW QUESTION # 725

A database view is the results of which of the following operations?

- A. Join, Insert, and Project.
- **B. Join, Project, and Select.**
- C. Join, Project, and Create.
- D. Join and Select.

**Answer: B**

Explanation:

Explanation/Reference:

Explanation:

SQL offers three classes of operators for creating views: select, project, and join.

The select operator serves to shrink the table vertically by eliminating unwanted rows (tuples).

The project operator serves to shrink the table horizontally by removing unwanted columns (attributes).

Most commercial implementations of SQL do not support a project operation, instead projections are achieved by specifying the columns desired in the output.

The join operator allows the dynamic linking of two tables that share a common column value.

Incorrect Answers:

A: SQL offers three classes of operators for creating views: select, project, and join. However, modern implementations of SQL do not support a project operation, instead projections are achieved by specifying the columns desired in the output. Nevertheless, project is a SQL operator.

B: Insert is a SQL command used to insert data into a table. It is not used to output a view.

C: Create is a SQL command used to create a new database, table, view, or index. However, the data or output of the view requires a select statement to shrink the table vertically by not showing unwanted rows, a project operation that shrinks the table horizontally by not showing unwanted columns, and a join statement when data from more than one table is required.

### NEW QUESTION # 726

The strength of RSA public key encryption is based on the:

- A. Difficulty in finding logarithms in a finite field.
- **B. Difficulty in finding the prime factors of very large numbers.**
- C. Fact that only one key is used.
- D. Difficulty of multiplying two large prime numbers.

**Answer: B**

Explanation:

The correct answer is "Difficulty in finding the prime factors of very large numbers".

Answer "Difficulty in finding the prime factors of very large numbers" applies to public key algorithms such as Diffie-Hellman and Elliptic Curve.

Answer "Difficulty of multiplying two large prime numbers" is incorrect because it is easy to multiply two large prime numbers.

Answer "Fact that only one key is used" refers to symmetric key encryption.

### NEW QUESTION # 727

Which of the following embodies all the detailed actions that personnel are required to follow?

- **A. Procedures**

- B. Standards
- C. Baselines
- D. Guidelines

**Answer: A**

Explanation:

Procedures are step-by-step instructions in support of the policies, standards, guidelines and baselines. The procedure indicates how the policy will be implemented and who does what to accomplish the tasks."

Standards is incorrect. Standards are a "Mandatory statement of minimum requirements that support some part of a policy, the standards in this case is your own company standards and not standards such as the ISO standards"

Guidelines is incorrect. "Guidelines are discretionary or optional controls used to enable individuals to make judgments with respect to security actions."

Baselines is incorrect. Baselines "are a minimum acceptable level of security. This minimum is implemented using specific rules necessary to implement the security controls in support of the policy and standards." For example, requiring a password of at least 8 character would be an example. Requiring all users to have a minimum of an antivirus, a personal firewall, and an anti spyware tool could be another example.

### NEW QUESTION # 728

Which of the following is currently the most recommended water system for a computer room?

- A. dry pipe
- **B. preaction**
- C. wet pipe
- D. deluge

**Answer: B**

Explanation:

The answer: Preaction combines both the dry and wet pipe systems and allows manual intervention before a full discharge of water on the equipment occurs. Source: KRUTZ, Ronald L. & VINES, Russel D., The CISSP Prep Guide: Mastering the Ten Domains of Computer Security, page 334.

### NEW QUESTION # 729

.....

As you know, the first-class quality always come with the first service. That is exactly what describe our CISSP exam materials. No only that our CISSP training guide can attract you for its best quality, but also you will be touched by the excellent service. If you have any question about our CISSP Learning Engine, our service will give you the most professional suggestion and help. And we work 24/7 online. So you can always find we are accompanying you.
