“Eh kayaknya ada yang kurang?” kata Jiwa menatap piring nya sendiri. Otaknya bekerja keras mencari apa yang salah dari menunya.

“Enak kok, ga ada bumbu yang kurang” alis Jiwa menekuk begitu penasaran dengan apa yang kurang dari masakannya. Matanya berkelana di sepanjang *kitchen set* mencoba mencari *clue*.

“Kok adek ngeluarin kentang?” Ucapnya saat menyadari ada kentang yang tertinggal. Matanya menatap kentang yang kini dia pegang mencoba mengingat hingga pupil matanya melebar.

“AAAAA tadi mau buat sayur sop!” teriaknya kesal sendiri. Bibirnya melengkung ke bawah, dia usap-usap kentang yang sedang ada di dalam genggamannya itu. “Buat makan malam ya?” Ucapnya seolah membujuk agar kentang tidak marah padanya

## Oracle Project Management Cloud 2025 Implementation Professional Sample Questions (Q89-Q94):

NEW QUESTION # 89

You search for resources to fulfill a project resource request but are unable to proceed after receiving the following error message: "The search for resources cannot be completed because the project resource search index is not available. Contact your help desk." Identify the cause for this error message. (Choose the best answer.)

- A. The most recent update of the index finished successfully.
- **B. The index is in the process of being updated.**
- C. The index has been built.
- D. The index is not in the process.

**Answer: B**

Explanation:

Ref: <https://docs.oracle.com/en/cloud/saas/project-portfolio-management/19a/fapfm/implementing-project-execution-management-applications.htm#FAPFM1724547> Topic - Submitting the Process to Maintain Project Resource Search Index: Procedure Submit the Maintain Project Resource Search Index job set to update the resources that appear on the Search and Evaluate Resources page when a resource manager searches for resources to fulfill project resource requests. The job set consists of a set of processes that facilitate efficient and rapid searches for qualified resources.

Resource managers can't search for resources or view resource details if the search index isn't available for a project resource request with qualifications or keywords. For project resource requests without qualifications and keywords, resource managers can search for and evaluate resources based on resource availability even if the search index isn't current or available.

Caution: The search index isn't available if the Maintain Project Resource Search Index job set process fails, or while the process is running.

#### NEW QUESTION # 90

Your customer has different accounting and project accounting periods, and sometimes enters invoices with an invoice date in the open project accounting and closed accounting periods. Which two statements are true about how project accounting and accounting dates will be populated in such invoices? (Choose two.)

- A. Project accounting date is the last day of the open project accounting period.
- B. Accounting date is the first day of the first open accounting period.
- C. Project accounting date is the same as the original invoice date.
- **D. Project accounting date is the first day of the first open project accounting period.**
- **E. Accounting date is the same as the original invoice date.**

**Answer: D,E**

Explanation:

When an invoice is entered with an invoice date in the open project accounting and closed accounting periods, the accounting date is the same as the original invoice date, but the project accounting date is the first day of the first open project accounting period. This ensures that the invoice is accounted in the correct accounting period and recognized in the correct project accounting period.

#### NEW QUESTION # 91

Which three can be tracked as Status tracking for Project Invoice Approval Notifications? (Choose three.)

- **A. Person assigned for approval**
- B. Date-wise updates to the document
- **C. Prior actions**
- D. Pre-approval activities
- **E. Persons with whom it is still pending approval**

**Answer: A,C,E**

Explanation:

Status tracking is a feature that allows you to track the progress and history of project invoice approval notifications. Status tracking provides information such as who approved or rejected the invoice, when and why they took the action, who is currently assigned to approve or reject the invoice, etc. Three of the information that can be tracked as status tracking for project invoice approval notifications are:

\* Person assigned for approval: This shows the name of the person who is currently assigned to approve or reject the invoice notification.

\* Prior actions: This shows the list of actions that have been taken on the invoice notification by previous approvers or rejectors, such as approve, reject, request information, etc.

\* Persons with whom it is still pending approval: This shows the list of persons who are still in the approval chain for the invoice notification and have not taken any action yet. Pre-approval activities and date-wise updates to the document are not information that can be tracked as status tracking for project invoice approval notifications. Pre-approval activities are tasks that need to be performed before submitting an invoice for approval, such as validating or transferring the invoice. Date-wise updates to the document are changes that are made to the invoice document after it has been submitted for approval, such as adjusting or reversing the invoice.
