Exam JN0-336 Reference & JN0-336 Exam Certification Cost

After you use JN0-336 real exam，you will not encounter any problems with system. If you really have a problem, please contact us in time and our staff will troubleshoot the issue for you. JN0-336 exam practice's smooth operating system has improved the reputation of our products. We also received a lot of praise in the international community. I believe this will also be one of the reasons why you choose our JN0-336 Study Materials.

Juniper Security, Specialist (JNCIS-SEC) Sample Questions (Q33-Q38):

NEW QUESTION # 33
Exhibit
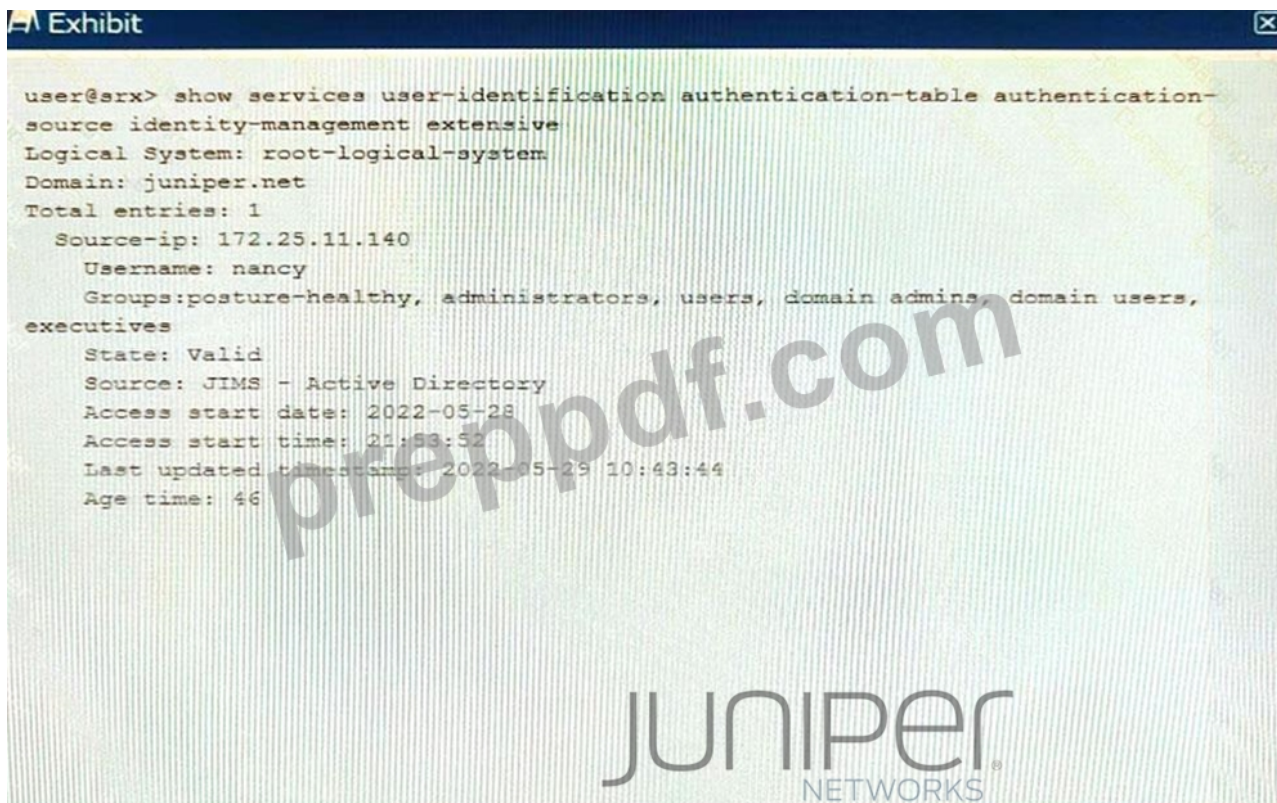

Referring to the exhibit, which two statements are true? (Choose two.)

- A. Nancy logged in to the juniper.net Active Directory domain.
- B. Nancy is a member of the Active Directory sales group.
- C. The IP address of the authenticating domain controller is 172.25.11.140.
- D. The IP address of Nancy's client PC is 172.25.11.

Answer: A,C

NEW QUESTION # 34
Exhibit
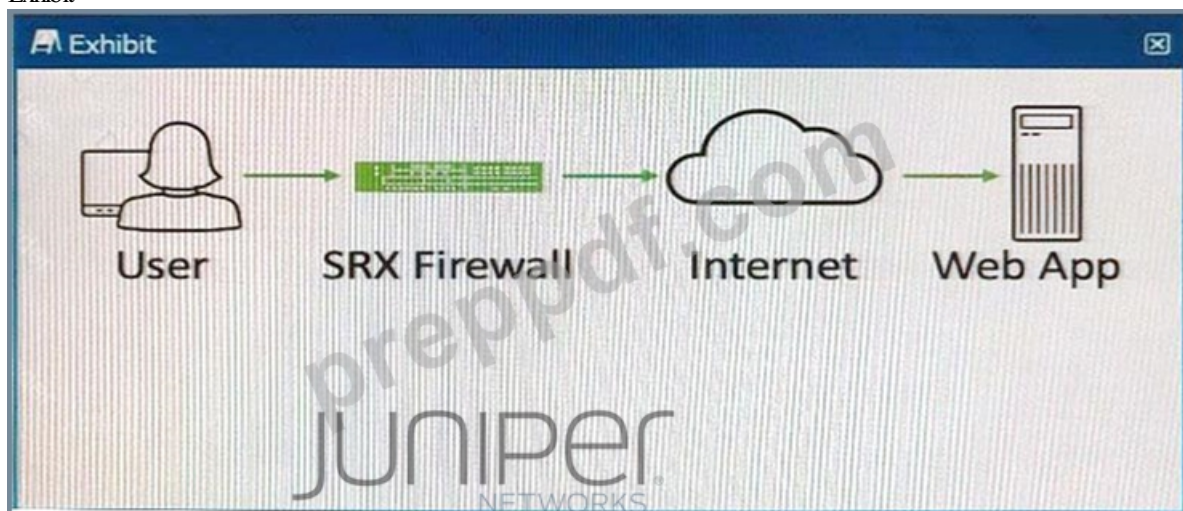

Referring to the exhibit, which two statements describe the type of proxy used? (Choose two.)

- A. forward proxy
- B. client protection proxy
- C. server protection proxy
- D. reverse proxy

Answer: A,D

Explanation:
In the exhibit, the SRX Firewall could be acting as a forward proxy, managing outbound internet requests from internal users or clients within a private network to the internet. Forward proxies are commonly used to control and monitor outbound traffic, provide content caching to improve load times, and enforce company policies.
The scenario can also imply a reverse proxy setup where the SRX Firewall might be configured to direct incoming requests from the internet to the web application. Reverse proxies are used to balance load, enhance security, manage SSL encryption, and provide additional caching functionalities for inbound traffic to servers.

NEW QUESTION # 35
You want to deploy a virtualized SRX in your environment.
In this scenario, why would you use a vSRX instead of a cSRX? (Choose two.)

- A. Only the vSRX provides NAT, IPS, and UTM services
- B. The vSRX supports Layer 2 and Layer 3 configurations.
- C. The vSRX has faster boot times.
- D. Only the vSRX provides clustering.

Answer: B,D

Explanation:
vSRX provides flexible networking capabilities which include support for both Layer 2 (data link) and Layer 3 (network) configurations. This allows it to handle a variety of routing and switching tasks within virtual environments.
Clustering capability, which involves grouping multiple vSRX instances to operate as a single entity for redundancy and high availability, is a feature specific to vSRX. This is critical in environments where continuous uptime and resilience are required.

NEW QUESTION # 36
When a security policy is deleted, which statement is correct about the default behavior of active sessions allowed by that policy?

- A. The active sessions allowed by the policy will be marked as a legacy flow and will continue to be forwarded.
- B. The active sessions allowed by the policy will be dropped.
- C. The active sessions allowed by the policy will continue
- D. The active sessions allowed by the policy will be reevaluated by the cached

Answer: A

Explanation:
When a security policy is deleted, the existing sessions that were previously allowed by that policy are not immediately dropped; instead, they are typically treated as legacy flows. This means they are allowed to continue until they naturally end or until the session timeout is reached. This behavior ensures that deleting a policy does not abruptly disrupt ongoing traffic flows that were previously authorized by that policy. This approach helps in avoiding unintended service disruptions, especially in production environments where active connections may be critical to operations.

NEW QUESTION # 37
Your network uses a single JSA host and you want to implement a cluster.
In this scenario, which two statements are correct? (Choose two.)

- A. The cluster virtual IP will need an unused IP address assigned.
- B. The software versions on both primary and secondary hosts
- C. The primary and secondary hosts must be configured with the same storage devices.
- D. The secondary host can backup multiple JSA primary hosts.

Answer: A,B

Explanation:
According to the Juniper Networks JNCIP-SEC Study Guide, when setting up a cluster with a single JSA host, both the primary and secondary hosts must have the same software version installed. Additionally, an unused IP address must be assigned to the cluster virtual IP. The primary and secondary hosts do not need to be configured with the same storage devices, and the secondary host cannot be used to backup multiple JSA primary hosts.

......

Research indicates that the success of our highly-praised JN0-336 test questions owes to our endless efforts for the easily operated practice system. With the latest JN0-336 test questions, you can have a good experience in practicing the test. Moreover, you have no need to worry about the price, we provide free updating for one year and half price for further partnerships, which is really a big sale in this field. After your payment, we will send the updated JN0-336 Exam to you immediately and if you have any question about updating, please leave us a message.
