For example, PDF format of Chrome-Enterprise-Administrator Guide Torrent is printable and boosts instant access to download. You can learn at any time, and you can update the Chrome-Enterprise-Administrator exam questions freely in any day of one year.

Google Chrome-Enterprise-Administrator Exam Syllabus Topics:

Topic	Details
Topic 1	• Chrome Enterprise Management Fundamentals: This section of the exam measures skills of a Chrome Device Administrator and covers the foundational elements of managing Chrome in an enterprise. It includes understanding how policies are applied and resolved, differentiating managed browsers from profiles, and describing how policies work. It also covers Chrome's built-in security features, how extensions are used and deployed, and how the release cycle and channels are managed.
Topic 2	• Analyze Chrome Data: This section of the exam measures skills of a Chrome Data Analyst and focuses on using the Google Admin console to view, analyze, and troubleshoot browser data. It includes reviewing reports, diagnosing browser or update issues, investigating performance problems, and identifying security risks based on log events and Chrome activity.
Topic 3	• Manage Chrome Enterprise in the Cloud: This section of the exam measures skills of a Cloud Systems Administrator and focuses on preparing and configuring environments for Chrome cloud management. Candidates must demonstrate how to verify domains, use admin roles, configure organizational structures, deploy enrollment tokens, enable reporting, and maintain Chrome using the Google Admin console.
Topic 4	• Chrome Updates: This section of the exam measures skills of a Chrome IT Policy Analyst and addresses the various update methods available for Chrome. It includes selecting the right update strategy for different business and security needs, managing compliance across platforms, and adapting update methods based on environmental changes or risks.
Topic 5	• Chrome Extensions: This section of the exam measures skills of an Endpoint Security Manager and involves managing Chrome extension policies. It includes designing extension management strategies, handling extension exemptions, creating approval workflows, and assessing extensions for their risk and compliance with business continuity requirements.

Latest Chrome-Enterprise-Administrator Exam Review Exam Pass Certify | Google Chrome-Enterprise-Administrator Valid Test Pattern

You no longer have to buy information for each institution for an Chrome-Enterprise-Administrator exam, nor do you need to spend time comparing which institution's data is better. Chrome-Enterprise-Administrator provides you with the most comprehensive learning materials. Our company employs the most qualified experts who hold a variety of information. At the same time, they use years of experience to create the most scientific Chrome-Enterprise-Administrator Learning Engine.

Google Professional Chrome Enterprise Administrator Certification Exam Sample Questions (Q24-Q29):

NEW QUESTION # 24
How often do extensions update"?

- A. Extensions only update when the user manually initiates the update process from the Chrome Web Store's extension management page
- B. When Chrome is running, the update occurs within the first few minutes of launching Chrome and then again every few hours Updates occur when users sign into the Chrome Web Store
- C. When Chrome is not running, the update occurs within the first few minutes of OS loading and then again every few hours when a new version is available in the Chrome Web Store, even when Chrome is not running
- D. Extensions update immediately whenever the developer publishes a new version to the Chrome Web Store, regardless of whether Chrome is running

Answer: B

Explanation:
Chrome checks for extension updates periodically when the browser is running. This check typically happens within the first few minutes of launching Chrome and then again every few hours. While updates are triggered by developers publishing to the Chrome Web Store, the actual update on the user's browser happens when Chrome is active and performs these periodic checks. Option A is incorrect as extensions generally don't update when Chrome is not running. Option C describes a manual update process, which is not the default behavior. Option D is incorrect because the update on the user's end is dependent on Chrome being active and checking for updates.

NEW QUESTION # 25
An organization has a critical extension that is force-installed on managed Chrome browsers to meet specific security needs Additionally, the organization has specified that when extensions are unpublished from the Chrome Web Store, they are also disabled The extension has been taken over by a malicious actor and has been unpublished from the Chrome Web Store What impact will this have to the force-installed extension?

- A. The force-installed extension will observe no change
- B. The force-installed extension will automatically be disabled
- C. The force-installed extension will be disabled for existing users only
- D. The admin will receive an alert in the Google Admin console to remediate the conflict

Answer: B

Explanation:
If an extension that is force-installed via policy is unpublished from the Chrome Web Store, the Chrome browser will detect this status and automatically disable the extension on managed devices. This is a security mechanism to prevent the continued use of potentially compromised or no longer maintained extensions.

NEW QUESTION # 26
An organization has Chrome set to auto-update The security team runs a compliance report from Chrome Enterprise Core and notices that some rarely used machines are showing an old version of Chrome However, when an engineer logs in to these PCs and

checks Chrome directly, the correctupdated version appears What is the most likely reason for this discrepancy?

- A. The machine has a different version of Chrome installed that is not managed via auto update
- B. Network setting is blocking the unattended auto-update check
- C. The display version does not update until Chrome is launched
- D. The auto-update feature is malfunctioning and not updating Chrome until it is launched

Answer: C

Explanation:
The most likely reason for this discrepancy is that the version reported in the Chrome Enterprise Core compliance report might not be updated in real-time until Chrome is actively running and checks in. When an engineer logs in and launches Chrome, it likely completes the update process and reports the correct version.
The auto-update feature generally works in the background, and a completely different unmanaged version (option C) or a persistent network block (option D) would likely prevent updates even when Chrome is launched. A malfunctioning auto-update (option A) is less likely to resolve itself upon manual launch.

NEW QUESTION # 27
The cyber risk team is conducting a review of software permissions The team needs an export of all installed browser extensions with a medium or high risk score and more than five permissions Where in the Google Admin console can an administrator generate this list?

- A. Reporting -> Audit and Investigation -> Chrome Insights Report
- B. Chrome Browser -> Reports -> Apps & extensions usage
- C. Chrome Browser -> Apps & Extensions -> All Browsers
- D. Chrome Browser -> Managed Browser -> All Browsers

Answer: B

Explanation:
The "Chrome Browser -> Reports -> Apps & extensions usage" section in the Google Admin console provides detailed information about installed extensions, including permissions and a risk assessment (if available through integrated security features). This report allows administrators to filter and analyze extensions based on their risk score and the number of permissions they request, enabling them to identify extensions that meet the cyber risk team's criteria.

NEW QUESTION # 28
Where can information about all of the profiles associated with a browser be found*?

- A. Chrome Insights report
- B. Managed devices
- C. Managed browsers detail
- D. Chrome log events

Answer: C

Explanation:
The "Managed browsers detail" page in the Google Admin console provides specific information about individual managed Chrome browser instances. This includes details about the profiles associated with that browser, such as the signed-in users and their management status. Chrome log events might contain some profile-related information but are more focused on actions. The"Managed devices" section primarily focuses on ChromeOS devices. The "Chrome Insights report" provides a high-level overview rather than detailed profile information for a specific browser instance.

NEW QUESTION # 29
......

There are some prominent features that are making the Chrome-Enterprise-Administrator exam dumps the first choice of Chrome-Enterprise-Administrator certification exam candidates. The prominent features are real and verified Professional Chrome Enterprise Administrator Certification Exam exam questions, availability of Chrome-Enterprise-Administrator exam dumps in three different

formats, affordable price, 1 year free updated Chrome-Enterprise-Administrator Exam Questions download facility, and 100 percent Google Chrome-Enterprise-Administrator exam passing money back guarantee.
