Topic 5	<ul style="list-style-type: none"> <li>Outbound Processes (Wave Management, Cross-docking, Production Integration): This topic covers combining outbound deliveries using wave management, packing and kitting in outbound processes, and staging products for production.</li> </ul>
Topic 6	<ul style="list-style-type: none"> <li>Cross Topics (Labor Management, Exception Handling, Batches, Serial Numbers): This topic includes setting up labor management and exception handling, and working with additional product information.</li> </ul>
Topic 7	<ul style="list-style-type: none"> <li>Inbound Processes (Value Added Services, Cross-docking, Quality Management): This topic includes executing inbound processes with value added services (VAS) or deconsolidation, and setting up deliveries for cross-docking (CD) or quality inspection (QIE).</li> </ul>
Topic 8	<ul style="list-style-type: none"> <li>System Integration, Master Data and Delivery Document Customizing: This focuses on setting up system integration, distributing master data, and customizing delivery documents.</li> </ul>

## 2026 Pass C\_S4EWM\_2023 Exam | Reliable 100% Free Valid Dumps SAP Certified Associate - SAP S/4HANA Cloud Private Edition, Extended Warehouse Management Questions

We also offer our customers with free updates of SAP Dumps for up to 365 days. Customers can also download a free demo to check the features of our SAP Certified Associate - SAP S/4HANA Cloud Private Edition, Extended Warehouse Management (C\_S4EWM\_2023) practice material before making a purchase. The 24/7 support team is always available for your assistance in case of any hitch while using our SAP C\_S4EWM\_2023 Exam product. Buy updated SAP Certified Associate - SAP S/4HANA Cloud Private Edition, Extended Warehouse Management (C\_S4EWM\_2023) practice material of VCEEngine now and become SAP Certified Associate - SAP S/4HANA Cloud Private Edition, Extended Warehouse Management (C\_S4EWM\_2023) certified on the first attempt.

### SAP Certified Associate - SAP S/4HANA Cloud Private Edition, Extended Warehouse Management Sample Questions (Q48-Q53):

#### NEW QUESTION # 48

What are some requirements for automatic wave creation? Note: There are 2 correct answers to this question.

- A. Wave templates with release method "Automatic" are defined.
- B. Split items are created.
- C. Conditions and condition records exist.
- D. Wave templates with one or more options are defined.

**Answer: C,D**

Explanation:

Automatic wave creation in SAP EWM requires the following prerequisites:

- \* A. Conditions and Condition Records Exist:
  - \* Conditions and their associated records are used to define when and how waves are triggered.
  - \* This ensures that wave creation happens automatically based on predefined business rules.
- \* B. Wave Templates with One or More Options Are Defined:
  - \* Wave templates must be created to define parameters such as the wave type and processing options.
  - \* These templates act as a blueprint for automatic wave generation.

Incorrect Options:

- \* C: Split items are unrelated to wave creation.
- \* D: The release method "Automatic" is optional; conditions and templates govern wave creation.

References:

- \* SAP Help Portal: Wave Management and Configuration
- \* SAP EWM Documentation: Automatic Wave Creation

#### NEW QUESTION # 49

You want to use Labor Management. For which combination must you activate Labor Management?

- A. Warehouse number and internal process step
- B. Warehouse number and warehouse process type
- C. Warehouse number and external process step
- D. Warehouse number and labor activity

**Answer: A**

Explanation:

Labor Management Activation

\* To utilize labor management effectively, it must be activated at the warehouse number and internal process step level, as these define the operational tasks within the warehouse.

Excluded Options

- \* A (External Process Step): External steps are not used for labor tracking.

\* C (Warehouse Process Type): While process types are relevant, labor management activation occurs at a higher level.

\* D (Labor Activity): Labor activity is defined within labor management but not used for activation.

SAP S/4HANA Cloud Private Edition Reference

\* Refer to Labor Management Activation and Configuration in EWM.

#### NEW QUESTION # 50

Which document is created in SAP Extended Warehouse Management when you use advanced production integration?

- A. Outbound delivery request
- **B. Production material request**
- C. Production order
- D. Outbound delivery

**Answer: B**

#### NEW QUESTION # 51

What is required to perform explicit counting using the Quality Inspection Engine? Note: There are 2 correct answers to this question.

- A. QM integration
- **B. Sampling procedure**
- **C. Inspection rule**
- D. Work center

**Answer: B,C**

Explanation:

Comprehensive and Detailed In-Depth Explanation:

Explicit counting in the Quality Inspection Engine (QIE) in SAP EWM involves a deliberate count of stock during an inspection, often triggered by quality requirements. Option B ("Sampling procedure") is correct because it defines how many items are inspected (e.g., percentage or fixed number), configured in the quality management (QM) system and linked to EWM. Option C ("Inspection rule") is correct as it specifies the inspection process, including whether explicit counting is required, and is maintained in EWM under SPRO:

SCM Extended Warehouse Management > Quality Management > Inspection Rules. Work center (A) is relevant for production processes, not QIE counting, and QM integration (D) is a prerequisite for QIE but not a direct requirement for explicit counting itself.

#### NEW QUESTION # 52

What are the advantages of using a mobile device during physical inventory? Note: There are 2 correct answers to this question.

- **A. You can use collective counting for bulk storage**
- B. There is a special SAP Fiori app available
- C. Recounting is never required
- **D. It is optional to block bins**

**Answer: A,D**

Explanation:

Comprehensive and Detailed In-Depth Explanation:

Mobile devices enhance physical inventory in SAP EWM. Option A ("You can use collective counting for bulk storage") is correct because RF devices support collective counting, allowing multiple bins to be counted together, configured via transaction /SCWM/RFUI. Option D ("It is optional to block bins") is correct as mobile counting allows flexibility in bin blocking, unlike desktop processes where blocking may be mandatory, set in SPRO: SCM Extended Warehouse Management > Physical Inventory > RF Settings. Option B is incorrect as recounting may still be needed, and option C (SAP Fiori app) is not standard for EWM PI.

#### NEW QUESTION # 53

The candidates can test themselves for the SAP Certified Associate - SAP S/4HANA Cloud Private Edition, Extended Warehouse Management exam day by attempting the SAP Certified Associate - SAP S/4HANA Cloud Private Edition, Extended Warehouse Management C\_S4EWM\_2023 practice test on the software. There is preparation material available on the C\_S4EWM\_2023 Practice Exam software by VCEEngine to study for the SAP C\_S4EWM 2023 test.
