Free Microsoft AZ-104 Updates, AZ-104 Reliable Exam Book

The Pass4Leader offers latest Microsoft Azure Administrator AZ-104 exam questions and answers, with Microsoft AZ-104 exam practice test questions you can ace your Microsoft AZ-104 exam preparation simply and quickly and pass the final AZ-104 Exam easily. The Microsoft AZ-104 exam practice test questions will assist you in Microsoft AZ-104 exam preparation.

Knowing the Exam Profile

Microsoft AZ-104 follows the same pattern as all Microsoft's intermediate-level exams. Therefore, it contains nearly 40-60 questions and the total time duration given to answer them is 180 minutes. While the general passing score of about 70%, a certain number is not disclosed, and it is likely to get changed as per the total number of questions. The tasks are provided in the multiple-choice format but be ready to face the items of other types as well.

The results that you will gain come with lifetime validity. However, the vendor proposes various enhancement options for those who want to pump up their career. Interested candidates can choose to earn the higher-level accreditation of their liking. Also, other than bringing you the Azure Administrator Associate certificate, the exam score will lead to earning some ACE college credits.

When it comes to the cost, candidates will have to pay $165 as an exam fee. One must comprehend the amount is subject to change as per different countries. AZ-104 test can be taken in English, Simplified Chinese, Korean, and Japanese from anywhere in the world via a testing center and online proctored facility.

Microsoft Azure Administrator Sample Questions (Q232-Q237):

NEW QUESTION # 232
You discover that VM3 does NOT meet the technical requirements.
You need to verify whether the issue relates to the NSGs.
What should you use?

- A. Diagram in VNet1
- B. the security recommendations in Azure Advisor
- C. Diagnostic settings in Azure Monitor
- D. IP flow verify in Azure Network Watcher
- E. Diagnose and solve problems in Traffic Manager Profiles

Answer: D

Explanation:
Scenario: Litware must meet technical requirements including:
Ensure that VM3 can establish outbound connections over TCP port 8080 to the applications servers in the Montreal office.
IP flow verify checks if a packet is allowed or denied to or from a virtual machine. The information consists of direction, protocol, local IP, remote IP, local port, and remote port. If the packet is denied by a security group, the name of the rule that denied the packet is returned. While any source or destination IP can be chosen, IP flow verify helps administrators quickly diagnose connectivity issues from or to the internet and from or to the on-premises environment.

Topic 1, Litware, inc.
Existing Environment
The network contains an Active Directory forest named Litware.com. All domain controllers are configured as DNS servers and host the Litware.com DNS zone.
Litware has finance, human resources, sales, research, and information technology departments. Each department has an organizational unit (OU) that contains all the accounts of that respective department. All the user accounts have the department attribute set to their respective department. New users are added frequently.
Litware.com contains a user named User1.
All the offices connect by using private links.
Litware has data centers in the Montreal and Seattle offices. Each data center has a firewall that can be configured as a VPN device.
All infrastructure servers are virtualized. The virtualization environment contains the servers in the following table.
Litware uses two web applications named App1 and App2. Each instance on each web application requires 1GB of memory.
The Azure subscription contains the resources in the following table.
□
The network security team implements several network security groups (NSGs).
Planned Changes
Litware plans to implement the following changes:
* Deploy Azure ExpressRoute to the Montreal office.
* Migrate the virtual machines hosted on Server1 and Server2 to Azure.
* Synchronize on-premises Active Directory to Azure Active Directory (Azure AD).
* Migrate App1 and App2 to two Azure web apps named webApp1 and WebApp2.
Technical Requirements
Litware must meet the following technical requirements:
* Ensure that WebApp1 can adjust the number of instances automatically based on the load and can scale up to five instance*.
* Ensure that VM3 can establish outbound connections over TCP port 8080 to the applications servers in the Montreal office.
* Ensure that routing information is exchanged automatically between Azure and the routers in the Montreal office.
* Enable Azure Multi-Factor Authentication (MFA) for the users in the finance department only.
* Ensure that webapp2.azurewebsites.net can be accessed by using the name app2.Litware.com.
* Connect the New Your office to VNet1 over the Internet by using an encrypted connection.
* Create a workflow to send an email message when the settings of VM4 are modified.
* Create a custom Azure role named Role1 that is based on the Reader role.
* Minimize costs whenever possible.

NEW QUESTION # 236
You have an Azure Storage account named storage1 that uses Azure Blob storage and Azure File storage.
You need to use AzCopy to copy data to the blob storage and file storage in storage1.
Which authentication method should you use for each type of storage? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:
